K CONNECTORS

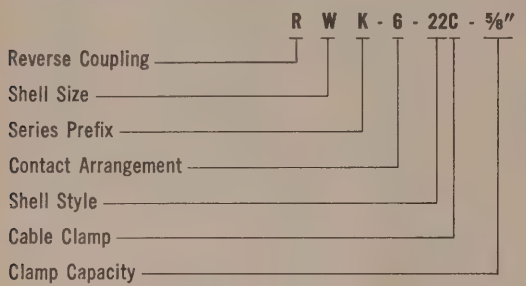
RUGGED CIRCULAR CONNECTORS WITH QUICK CONNECT/DISCONNECT ACME THREADS

K standard circular connectors with special Acme thread coupling are rugged, lightweight and economical. These connectors are extremely versatile, with eight shell types and insert diameters, totaling more than 350 contact arrangements, in a variety of amperage and voltage capacities. K connectors have made the quick disconnect concept a standard in the industry, saving time and money in servicing, assembly, testing and inspection. K connectors are used on aircraft, transmitters, instrument panels, Geiger counters, television cameras, potentiometers, cathode ray recorders and other equipment.

The general basic K series connectors are shown as follows:

- **K/RK** Standard circular connector with special Acme thread couplings for quick connect and disconnect. Used in color and monochrome TV cameras, transmitters, telephone circuits, etc.
- **SK** "BEEP" telephone connectors — special telephone, television applications, and for use on general ground support equipment.

PART NUMBER EXPLANATION



REVERSE COUPLING

R — All female (socket contact) connectors have a stationary coupling nut and the male (pin contact) connectors have rotating coupling threads.

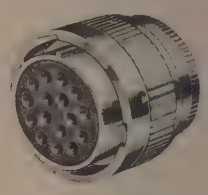
MINIATURE CIRCULAR CONNECTORS

DESIGNED TO MIL-C-26482 SERIES I, SOLDER AND CRIMP CONTACTS

KPT/KPTM/KPSE

This catalog describes CANNON® connectors using MIL-C-26482 Series I type hardware with three-point bayonet coupling and five-key polarization. These miniature circular connectors are grouped into three series ranging from general purpose solder pot connectors . . . to high performance, crimp connectors . . . to connectors with high contact density. This broad range provides the most complete family of 26482 connectors available today. The versatility of these connectors is proven by the fulfillment of requirements ranging from general purpose to space environmental.



In addition to the three basic series, connectors for special applications ar also available. They include RFI filtering versions (with low pass internal filte pin contacts), hermetic connectors for high pressure watertight requirements and twist-on pull-off couplers for MIL-C-26482 plugs.

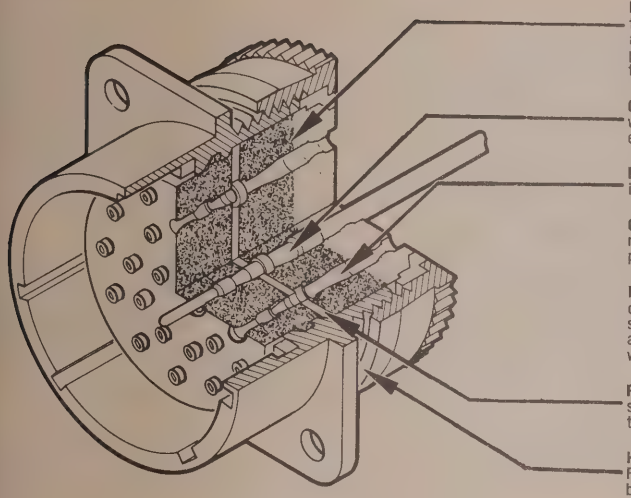
GENERAL PURPOSE, CRIMP CONTACT CONNECTORS
KPTM SERIES



DUAL-SHORE® INSULATOR is integrally molded polychloroprene with a firm front section and a soft resilient rear section that provides a moistureproof seal around each wire. A hard plastic web is molded within the firm front section to prevent over-insertion of the contacts. This construction eliminates the moisture traps characteristic of other types of insulators.

CRIMP, SNAP-IN CONTACTS are to MIL-C-23216 specification and can be crimped with the standard M22520/1 crimp tool. They are especially suited to quick and easy field service by unskilled personnel.

BOW SPRING SOCKET CONTACTS increase socket contact area, provide smooth insertion and prolong connector life.

CLOSED-ENTRY SOCKETS eliminate damage from abuse by test probes and automatically correct misaligned pins. Lead-in chamfers around the socket assures proper mating even with up to .060" misalignment or splay of mating pins.

INTERFACIAL SEALING is assured by raised barriers around each pin contact that compress into the lead-in chamfers at each socket contact. This method provides such a positive seal around each pair of mated contacts that, if several contacts are removed from the insert, there will be no leakage to the remaining contacts when the connector is immersed in water.

POSITIVE STOP, a tough thermoplastic web molded into the DUAL-SHORE insulator, prevents over-insertion of contacts by providing a close-fitting seat for the shoulder of each pin or socket.

HARDWARE is aluminum alloy, finished to QQ-P-416, and conforms to MIL-C-26482. Five key polarization assures correct hardware engagement, and three-point bayonet lock provides quick connect/disconnect. To aid further in sealing, a peripheral neoprene ring is mounted in the receptacle and is compressed by the plug barrel while engaged.

FEATURES

- **unique DUAL-SHORE insulator**
- **crimp snap-in contacts**
- **closed-entry bow spring socket contacts**
- **interfacial sealing**
- **positive stop to prevent over-insertion of contacts**

KPTM connectors are recommended for applications which require an extremely reliable, environment-resistant connector designed for economy, efficiency and simplicity, but not requiring MIL-SPEC qualifications. The KPTM is a version of the KPT with a DUAL-SHORE insulator and MS-3192/3193 crimp snap-in contacts. The DUAL-SHORE insulator is a simple, compact unit with no retaining clips or rings to move or obstruct, and no glued joints to loosen or serve as moisture entry paths.

Interfacial sealing is assured by raised barriers around each pin contact cavity that compress into the lead-in chamfers at each socket contact cavity when mated, providing such a positive seal there will be no leakage when the connector is immersed in water even if several contacts are removed.

KPTM connectors are intermateable, intermountable and interchangeable with all MIL-C-26482 connectors. In fact, they utilize the same crimp, removable (MIL-C-23216) contacts as used in the MIL-qualified KPSE series, thus allowing the user to standardize on one contact for use in both the qualified MS (KPSE) series and the KPTM series.

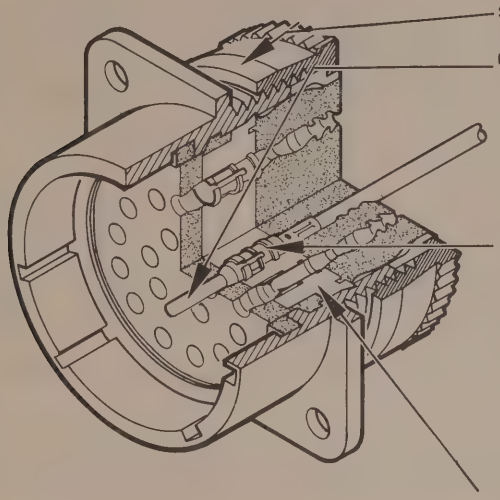
HIGH PERFORMANCE, MIL-C-26842 SERIES I CRIMP CONTACT CONNECTORS

KPSE SERIES



STANDARD MIL-C-26482 HARDWARE mates with any connector designed to MIL-C-26482.

CRIMP, SNAP-IN CONTACTS are designed to MIL-C-23216 and can be crimped with the standard M22520/1 crimp tool.

CLOSED-ENTRY SOCKET CONTACTS eliminate damage from abuse by test probes and help to correct any misaligned pins during engagement.

CONTACT INSERTION is accomplished from the rear of the connector. When the contact is fully inserted, the clip tines snap securely behind the contact shoulder.

CONTACT EXTRACTION is accomplished with a front-inserted extraction tool. Pressing the tool plunger pushes the contact out thru the rear of the connector.

CONTACT RETAINING CLIP is completely encased in a tough plastic wafer to protect the clip from damage.

COMPLETE MOISTURE SEALING is achieved by combining four seals: shell, peripheral, interfacial and wire seals.

SHELL SEAL is effected when the plug shell pushes against the sealing ring in the receptacle when the connectors are mated.

PERIPHERAL SEAL around the edge of the pin insulator is designed so that mating the connector puts tension on the seal and greatly reduces compression set.

INTERFACIAL SEAL is achieved by the insulator faces meeting when the plug and receptacle are mated.

WIRE SEAL is accomplished by a multiple ripple design, exceeding the wire sealing requirements of MIL-C-26482.

POSITIVE INSERT-TO-SHELL MECHANICAL RETENTION with hard plastic wafer firmly locked into a groove in the shell, in addition to a strong adhesive bond between the insert and shell.

FEATURES

- environment-resistant
- voidless integrally molded insulator
- front-release, crimp snap-in contacts
- closed entry socket contacts
- 4 moisture seals for complete sealing
- contact clip protected in hard dielectric
- positive insert-to-shell mechanical retention

KPSE environment-resistant, miniature circular, quick disconnect connectors, qualified to MIL-C-26482, are designed for the exacting requirements of today's electronic industry. The KPSE features an insulator which is mechanically retained in the shell by a positive, hard plastic-to-metal lock retention augmented by a reliable adhesive bond. Complete moisture sealing is achieved by four seals; shell, peripheral, interfacial and wire seals.

Crimp snap-in contacts are retained in clips that are completely encased in a tough hard dielectric wafer, thus protecing the clip tines from damage. Closed-entry socket contacts facilitate positive mating.

The KPSE series is intermateable, intermountable and interchangeable with all MIL-C-26482 connectors, whether crimp or solder type, and is available with many materials, finishes and configurations.

GENERAL PURPOSE, MIL-C-26482 SOLDER CONTACT CONNECTORS

KPT SERIES

FEATURES

- general purpose
- closed-entry socket contacts
- solder termination

KPT connectors are a series of general-purpose, environment-resistant, miniature circular connectors, qualified for use in military applications. These connectors are also widely used in industrial applications calling for quick-disconnect connectors with fixed contacts for solder termination.

The KPT series is intermateable and intermountable with all MIL-C-26482 connectors, whether solder or crimp type and is available with many materials, finishes and configurations.

KPTB CONNECTORS

- general purpose
- double ended pin and socket contacts
- contains KPT socket insert
- nonremovable contacts

KPTB connectors are a series of general purpose, miniature circular connectors, qualified for use in military applications. They are also widely used in industrial applications. The KPTB in a thru-bulkhead version with double faced pin and socket insert construction allowing mating from both ends. They contain KPT socket inserts with feedthru (pin/socket) nonremovable contacts.

The thru-bulkhead receptacle is provided for applications requiring the disconnection of a power source from either side of a panel. A typical connector to be used if air leakage requirements are critical.

ITT CANNON ELECTRIC

MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

MSA / MSB / MSE / MSF / MSR / ER SERIES DESIGNED TO MIL-C-5015

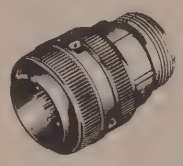
• Uniform high quality • Shell sizes and types for every application • Widest range of contact arrangements

This catalog describes ITT Cannon connectors designed and manufactured to MIL-C-5015, the military specification covering "MS" electrical connectors. These circular connectors were originally designed for aircraft, but are now widely used in many other fields. They are particularly suitable for commercial applications requiring low cost and high reliability.

ITT Cannon is the foremost manufacturer of MS and MS type connectors with the widest range of connector styles, sizes and variations in the industry. These connectors utilize the finest materials, which, along with precision manufacturing and rigid quality control, assure ITT Cannon customers of the finest quality connectors.

GENERAL PURPOSE MS-A, MS-B

Designed to MIL-C-5015, MS-A and MS-B connectors are widely used in aircraft, commercial and industrial applications. MS-A connectors have solid endbells; MS-B connectors have split endbells; MS-C connectors are pressurized. Standard insulation is diayll phthalate. Shells are aluminum alloy. Contacts are silver plated copper alloy.

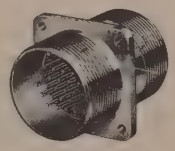


QUICK DISCONNECT CA-AQ AND CA-BQ

CA-AQ and CA-BQ are MS-A and MS-B plugs incorporating a quick-disconnect accessory. The accessory consists of a coupler and an adapter. CA-AQ and CA-BQ connectors are used in quick disconnect applications, such as between breakaway assemblies or where disconnect by a straight-away pull is required.

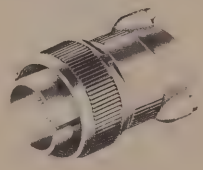
PRESSURIZED BULKHEAD BFR AND TBF

The BFR is a pressurized bulkhead connector that will mate with standard MS plugs. The TBF is a thru-bulkhead version with double faced construction allowing mating from both ends. Both connectors use resilient insulators. Contacts are silver plated copper alloy. Shells are aluminum alloy.



ENVIRONMENTAL RESISTANT MS-E, MS-F, MS-R and F-80 (Solder/Crimp Termination)

MS-E, MS-F and MS-R are similar to MS-A and MS-B connectors but have resilient insulators and wire sealing grommets for extreme environmental conditions and high altitude sealing. MS-E's and MS-F's have a mechanical cable clamp; the MS-R has a shorter, lighter weight endbell without the cable clamp. Both the MS-F and MS-R have O rings to supplement the interfacial seal. Shells are aluminum alloy. Contacts are silver plated copper alloy. The F-80 modification (crimp contact termination) is available in E, R, F and BFR styles with resilient insulators.



POTTING ER CONNECTORS (Solder Contact Termination)

These lightweight potting connectors provide resistance to salt water, fuels, etc., and will withstand the effects of high vibration. 3100 and 3106 connectors with plastic potting cups and resilient inserts meet the requirements of MS3103 and MS25183. Contacts are silver plated copper or brass. ER insulators are resilient; shells are aluminum alloy. A 90° plug (3108ER) is also available.

ACCESSORIES

Accessories to fit MS connectors include junction shells, protective caps, dummy or stowage receptacles, cable clamps, telescoping bushings.

GENERAL INFORMATION

CONTACTS

Pin and socket contacts are designed to resist severe vibration and repeated connection and disconnection. The average force to either engage or separate pin and socket contacts will not exceed the average values given in the latest revision of MIL-C-5015.

Force in Lbs.	Contact Sizes 16	12	8	4	0
Maximum	3.00	5.00	10.00	15.00	20.00
Average	2.10	3.50	7.00	10.50	14.00
Minimum	.25	.50	.75	1.00	2.00

THERMOCOUPLE CONTACTS

Size 12 and 16 contacts, machined from matching thermocouple lead wire alloys, can be supplied in ITT Cannon connectors. These thermocouple contacts maintain continuity from thermal-sensor leads thru a bulkhead or other closures in temperature measuring applications.
These contacts for matching lead wires are detailed by the standards of the Instrument Society of America (I.S.A.):

I.S.A. Standards	Material
J and Y	Iron and constantan
K	Chromel and alumel
T	Copper and constantan

Since the thermocouple connector application determines the soldering methods and materials to be used, thermocouple contacts, identified by permanent markings, are normally supplied with untinned solder pots. Thermocouple contacts are supplied only in connectors having resilient insulators.

WIRING

For class E, R and F connectors, satisfactory moisture sealing will be obtained if AWG and MS wire sizes and insulation outside diameters are governed by this table.

Contact Size	Wire Size (MIL-W-5086)	Insulation OD Limit (inches)
16	16 thru 22	.064 min. to .130 max.
12	12 thru 14	.114 min. to .170 max.
8	8 thru 10	.164 min. to .255 max.
4	4 thru 6	.275 min. to .370 max.
0	0 thru 2	.415 min. to .550 max.

ELECTRICAL SERVICE DATA

Maximum current ratings of contacts and maximum allowable voltage drop under test conditions when assembled as in service are shown below. Maximum total current to be carried per connector is the same as that allowable in wire bundles as specified in MIL-W-5088.

Contact Size	Max. Current Rating (amps)	Test Current (amps)	Potential Drop (millivolts)

HIGH POTENTIAL TEST VOLTAGE

MS connectors show no evidence of breakdown when the test voltage given below is applied between the two closest contacts and between the shell and the contacts closest to the shell for a period of one minute.

MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

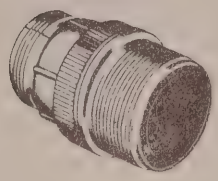
GENERAL PURPOSE MS-A/MS-B



MS-A and MS-B connectors were originally designed and approved under Military Specifications for use in military aircraft. Since then, commercial and industrial demand for these connectors has grown because of their uniform quality, dependability, low cost and interchangeability as prescribed in MIL-C-5015. These MS connectors are available in two classes:

A — Solid endbell with plastic or resilient insulators.

B — Split endbell with plastic insulators for greater accessibility to solder connections.

The MS-A and MS-B are available as plugs or receptacles. The term plug applies to any assembly fixed to the end of a cable. The term receptacle applies to any assembly mounted to a wall or box. MS shells will accept either pin or socket insert assemblies. Socket contacts are the closed-entry type.

Standard MS connectors are available with from 1 to 100 contacts in 15 different insert diameters ranging from .250 to 2.550 inches. Each contact arrangement is available with pin or socket contacts and will mate with all MS type connectors having the same size and contact arrangement.

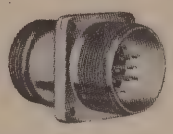
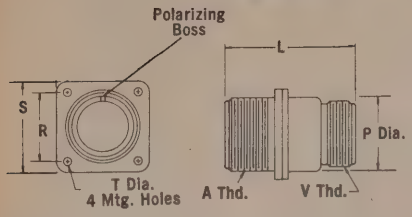
GENERAL PURPOSE MS-A/MS-B

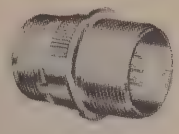
WALL MOUNTING RECEPTACLE
SOLID SHELL
MS3100A

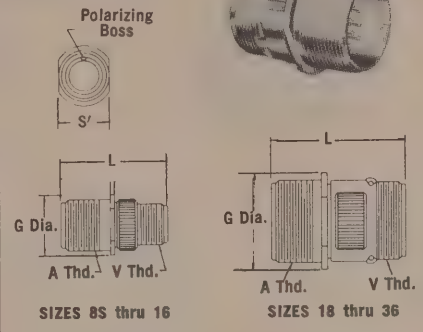




MS3100A wall mounting receptacles are used with the MS3057 cable clamp or with conduit to eliminate need for the conduit box in applications where wires are carried thru walls or bulkheads.

CABLE CONNECTING PLUG
SOLID ENDBELL
MS3101A





MS3101A solid endbell cable connecting plugs are used for cable extension requirements where mounting provisions are unnecessary.

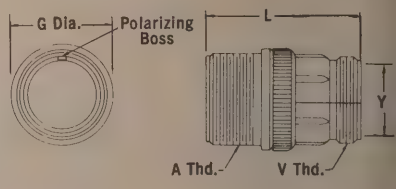
SPLIT ENDBELL
MS3101B

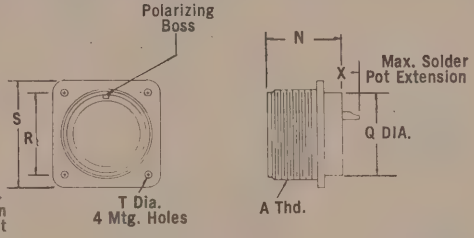
(Available with plastic insulators only)



MS3101B split endbell cable connecting plugs are used for cable extension requirements where mounting provisions are unnecessary.

BOX MOUNTING RECEPTACLE
MS3102A

(Available with plastic or resilient insulators)



The MS3102A box mounting receptacles are used on boxes and equipment cases where no cable support is required.

QUICK DISCONNECT AQ/BQ

CA-AQ and CA-BQ connectors are used in quick disconnect applications, such as between break-away assemblies or where disconnect by a straight-away pull is required.

Quick disconnect accessories (adapters and couplers) fit standard plastic insert MS and CA connectors. The manual coupler replaces the coupling nut on the plug; the adapter screws onto the coupling thread on the receptacle. These accessories are available thru size 28 and may be purchased separately or as part of a standard plastic insert MS or CA connector assembly.

CA22181 ADAPTERS
FOR STANDARD PLASTIC INSULATOR MS AND CA RECEPTACLES

The CA22181 adapter is designed to screw over the coupling threads of a standard MS or CA receptacle with plastic insulator. It has a locking groove, which receives the formed end of the coupler latch when fully engaged.

Adapters may be ordered as part of a standard plastic insulator MS or CA receptacle, or they may be ordered separately. To order adapters separately, a listing is given in the table below. To order complete assemblies (standard plastic insulator MS or CA receptacles with adapters), see page 60.

CA22182 COUPLERS
FOR STANDARD PLASTIC INSULATOR MS AND CA PLUGS

CA22182 couplers are designed to replace the coupling nut on standard ITT Cannon plastic insulator MS or CA connectors. A standard manual coupler (AQ and BQ) is available.

Couplers may be ordered separately or as part of a standard plastic insulator MS or CA connector assembly (see page 60).

MS-E/MS-R/MS-F
SOLDER/F80 CRIMP ENVIRONMENTAL

In the latest revision of MIL-C-5015, a new class of environment-resistant connectors was added. This new class F connector supersedes the previous class E connector. The MS-3106F is identical to the MS-3106E except that the MS-3106F has an "O" ring under the coupling nut. The class E will still be available upon request for existing programs, and upon ordering will also bear the E nomenclature on the shell.

ITT Cannon MS-F and MS-R connectors are designed to operate in the extreme environmental conditions of high altitude flight. These connectors must be completely sealed to withstand moisture, condensation, vibration, corona and flashover caused by high altitude environments.

MS-F and MS-R connectors have a resilient grommet with internal restrictions in the wire cavities which act as O rings around the wires. This allows the wires to slide thru the grommet with a minimum of friction, yet when the ferrule is seated and the endbell tightened it provides a perfect wire seal thru a wide variety of wire diameters. This seal at the rear, plus the interfacial seal at the front, effects a completely environment-resistant assembly when the plug is mated to an F or R receptacle. Sockets are of the closed-entry type.

The F-80 modification (crimp contact termination) is available in resilient insulators in the E, R, F, and BFR styles, creating a large selection of insert assemblies and hardware. Components are identical to the MS–5015 except that the contacts are modified for crimp termination providing an inexpensive crimp contact connector with the proven reliability of and complete intermateability with the MS-5015 series. See page 65 for assembly instructions.

Cable clamps have been integrally designed with the endbell on MS-E and MS-F connectors. Class R is without the cable clamp.

HIGH VOLTAGE CARTRIDGES FOR MS-E AND MS-R

- **Standard contact arrangements are adaptable to high voltage applications.**
- **Eliminates need for a separate high voltage connector.**
- **Assembly time is reduced.**

High voltage conductors as well as power and/or control signal conductors can now be connected simultaneously in standard MS connectors. Previously, MS connectors involved in high voltage circuitry required individual design considerations and could only be ordered as a "special." The new high voltage cartridge allows conversion of a standard connector to one capable of handling up to 15,000 volts DC (Test Voltage — mated), operating voltage — sea level 5,000 VDC or 3,500 VAC. These cartridges are molded of nylon and provide a high degree of arc-over protection between adjacent contacts or between a contact and the connector shell. Unmated, each cartridge provides a nylon isolating barrier capable of withstanding up to 10,000 volts DC (or peak).

The contact within the cartridge is a 7.5 amp, size 20, crimp snap-in type with dielectric rear release clip retention. This contact is removable with the plastic CIET20 insertion/extraction tool provided the insulation is .084" or less. The contact may be crimped with the standard MS-3191 tool and hand inserted into the nylon cartridge. The cartridge body is installed in the connector at the factory.

High voltage cartridges now available fit in the space normally occupied by a #4 or #8 size contact in an MS-E, MS-R or MS-F type connector.

Over forty-nine contact arrangements are currently available in which these high voltage cartridges may be used. Consult factory for ordering information.

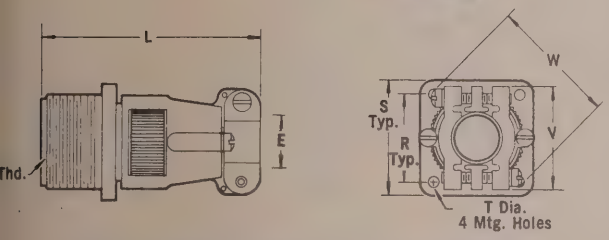
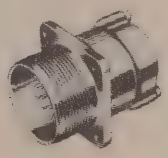
WALL MOUNTING RECEPTACLE
INTEGRAL CABLE CLAMP
MS3100E / MS3100F

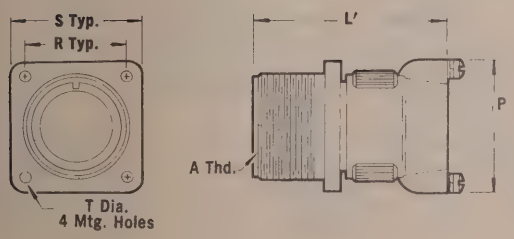


MS3100E is identical to MS3100F and is available upon request. For new equipment, customer should specify MS3100F.

MS3100F wall mounting receptacles are used to carry wires thru walls or bulkheads, or to provide a means of disconnection at a bulkhead. MS3100F receptacles mate with 3106 and 3108 plugs.

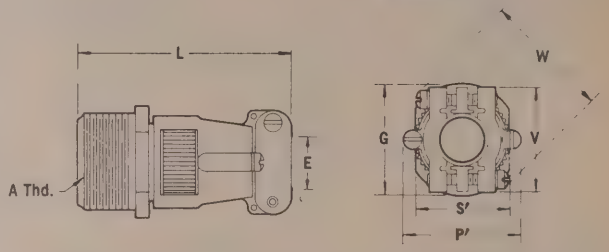
WALL MOUNTING RECEPTACLE
MS3100R





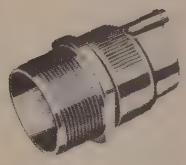
The MS3100R receptacle is identical in purpose to the MS3100F. The MS3100R features a shorter lightweight endbell and mates with 3106 and 3108 plugs.

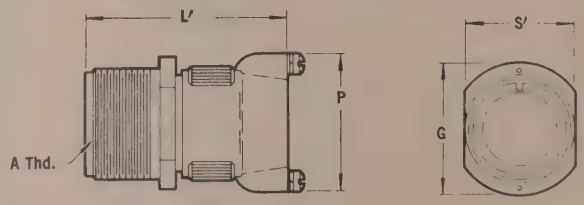
CABLE CONNECTING PLUG
INTEGRAL CABLE CLAMP
MS3101E / MS3101F



MS3101E cable connecting plugs are used for cable extension requirements, where mounting provisions are unnecessary. MS3101E plugs mate with 3106, 3107 and 3108 plugs. Note: The D revision of MIL-C-5015 has changed the nomenclature of the 3101 from receptacle to plug.

CABLE CONNECTING PLUG
MS3101R





MS3101R cable connecting plug is identical in purpose to the MS3101E. The MS3101R features a shorter lightweight endbell and mates with 3106, 3107 and 3108 plugs. Note: The D revision of the MIL-C-5015 specification has changed the nomenclature of the 3101 from receptacle to plug.

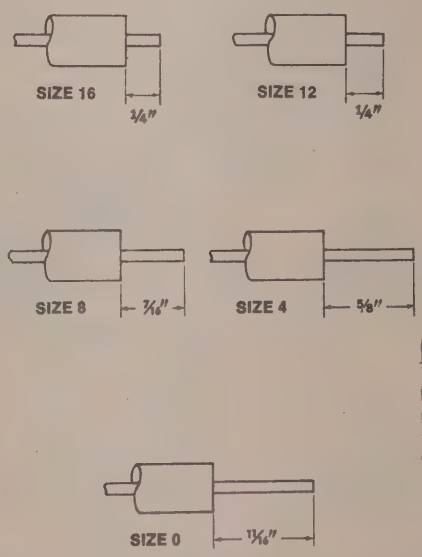
CRIMPING CONTACTS

1. Check the crimp tool to be sure that the proper crimp head locator is used.
2. Cycle the tool to be sure the indentors are open.
3. Place the contact, mating end first, into the tool.
4. Insert the stripped wire into the hollow end of the contact. Be sure the wire is inserted as far as it will go.
5. Close the tool completely to crimp. Unless the tool is closed completely, the tool will not release the contact.
6. Remove the crimped contact from the tool. Check the inspection hole to verify that the wire is fully inserted.

RECOMMENDED WIRE STRIPPING



INSERTION OF CONTACTS

1. Before inserting the contacts, remove the endbell, grommets, and ferrule from the receptacle. Remove the endbell, grommet, ferrule, and coupling nut from the plug. Slide the hardware over the wire bundle in the proper order for reassembly after all the contacts are inserted.
2. To assist insertion of contacts, lubricate insert cavities with isopropyl alcohol. Alcohol will evaporate and will not leave a conductive film. **Caution: Never use any lubricant other than isopropyl alcohol.** Hold the plug or receptacle body firmly and insert the wired contacts as far as possible by hand. Starting at one side of the insulator, work progressively from contact to contact across the layout. When inserting socket contacts, be sure to provide fixture space below the front face to permit length of guide pins for #16 and #12 contacts to clear insulator face.
3. Place the correct insertion tool on the contact so that the wire runs along the groove in the tool. (Tool tip will butt against the shoulder.)
4. Beginning with a cavity on the outer edge of the plug, apply a slow, even pressure perpendicular to the insulator face until the contact snaps into position. If contacts are not inserted all the way prior to removing insertion tool, do not try to reinsert the insertion tool. Instead, using the extraction tool, push the contact back to position it was in when the insertion tool was originally placed over the contact for push-in; otherwise the inside of contact cavity may be damaged by reinserting the insertion tool.
5. Inspect the front end of the insulator to assure that the contacts are inserted to the proper depth.

COMPLETION

After all the cavities have been filled, slide the hardware back into position on the barrel. Tighten the endbell until the ferrule and endbell are flush. Compression of the grommet in this manner results in maximum sealing characteristics of the plug.

EXTRACTION OF CONTACTS

1. Select the appropriate tool. (Tool tips are reversible for either pin or socket.) Place the extraction tool over the pin or into the socket.
2. Apply a slow, even pressure to push the contact out of the rear of the insulator.

ER POTTING CONNECTORS

MS type potting connectors are available with nylon cups. 00 and 06 shell styles with plastic cups and resilient insulators meet the requirements of MS3103 and MS25183. Also available is the 08 plug with resilient insulator and 90° angle nylon potting cup.

ITT Cannon provides for a ¼" clearance for potting on all contact sizes.

BULKHEAD CONNECTORS BFR / TBF

TBF and BFR pressurized bulkhead receptacles mate with standard MS type plugs (3106, 3107 and 3108) if contact arrangements correspond. Both the BFR and TBF have resilient insulators. The TBF (thru-bulkhead fitting) version has a double-faced construction allowing mating from both ends. An O ring is supplied as standard on both the BFR and the TBF. Contacts are silver plated copper or brass alloy. Shells are aluminum alloy.

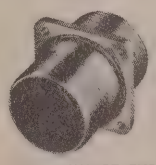
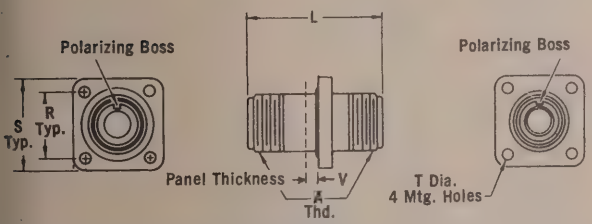
THRU-BULKHEAD RECEPTACLE TBF — RESILIENT INSULATOR





TBF thru-bulkhead fittings have pressurized resilient insulators. Special double-face pin and socket contact construction permits cable components to be wired and tested in the shop and then to be plugged into the mounted TBF plug to complete the installation. The TBF mates with 3106, 3107 and 3108 plugs.

BFR pressurized bulkhead receptacles withstand the air leakage requirements of MIL-C-5015 not to exceed 1 cu. in. of air per hour when subjected to a pressure differential of 30 psi at −55°C. Insulators are resilient material bonded to the aluminum shell. Both pin and socket assemblies are available. The BFR will mate with standard MS type 3106, 3107, 3108 plugs.

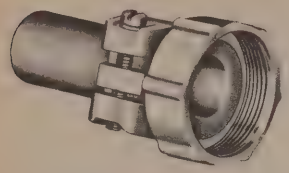
CABLE CLAMP
WITH OR WITHOUT BUSHING
MS3057A



The MS3057A cable clamp is made for plugs and receptacles that have an endbell with external conduit threads. The double clamping action provides a balanced, positive hold on the wires and greatly reduces moisture transmission. Provision is made for safety wiring. This clamp is supplied without bushing; to order bushing, add "with bushing" after part number.

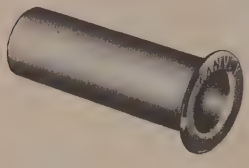
TELESCOPING BUSHING
MS3420 / MS39056 (REF.)



Telescoping gland bushings (used with MS3057A cable clamp) keep dirt, oil and moisture out of endbell. Taping or wrapping wires is eliminated since bushing protects wires going thru clamp. Combinations of bushings may be used to decrease cable entry diameter to improve sealing. Material is polychloroprene (MS).

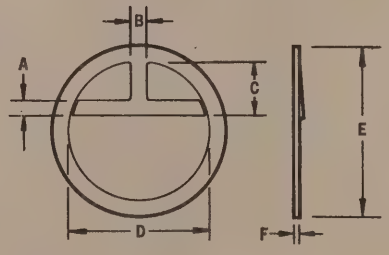
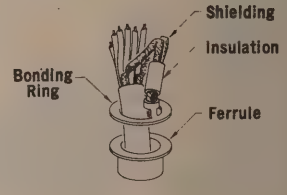
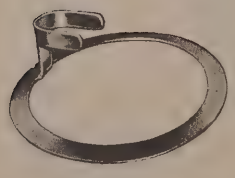
BONDING RING

CA2250
AN3111







Bonding rings are used for bonding between endbell and wire shielding, and may be used with either a cable clamp or a flexible conduit coupling nut. Material is soft copper. All excess lengths of tongue may be cut away.

APPLICATION

The wire shield is separated from wire by drawing wire thru a pierced hole in the shielding. The bonding ring tongues are formed around the shielding pigtail and soldered. The soldered connection is protected by insulation such as plastic tubing or friction tape to prevent stray wires of the shielding braid from rupturing the insulation of other wires, thereby causing a short circuit. When the flexible conduit nut or cable clamp is tightened to the endbell of the plug, a satisfactory bond between the wire shielding and plug endbell is ensured.

PVA/MIL-C-83723 (SERIES I)
PV7*/MIL-C-26482 (SERIES II)

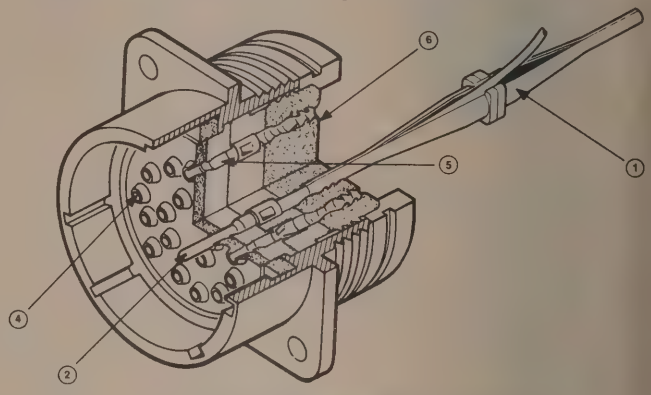
- **Intermateable with MIL-C-26482 Series I and NAS1599**
- **Operating temperature —55°C to +200°C**

The PV connector series is designed to meet the rugged requirements of NAS1599, the specification which delineates the critical requirements of space-age applications. PV connectors have been used extensively on major aerospace programs requiring general-purpose, miniature cylindrical bayonet coupling connectors such as Apollo, ATM, OWS, Minuteman, Skylab, Space Shuttle, Thor-Delta, Titan IIIC, and Viking.

PVA/PV7* connectors are available under numerous industrial specifications, some of which are listed below:

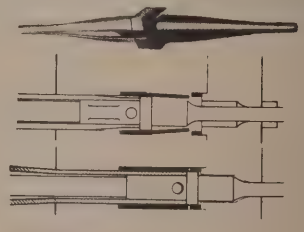
- MIL-C-83723 (Series I) USAF
- 40M39569 NASA, George C. Marshall Sprace Flight Center
- 81D52 Martin Marietta, Denver Division
- MC414-0365 Rockwell International Space Division
- AC414-0013 Rockwell International Autonetics Division
- STS0003 McDonnell Douglas Astronautics
- SV81 NAS1599 Martin Marietta/NASA Langley
- MIL-C-26482 (Series II) Navy

The PV series is an important member of the Universal Interconnect System (UIS) — the only system that can perform all interconnection missions. This system is adaptable for use with connectors of all shapes and sizes, including circular and rectangular configurations, standard, miniature and subminiature sizes. UIS is a rear servicing system that evolved from the LITTLE CAESAR® rear release contact retention assembly, pioneered and developed by ITT Cannon. Since this time, ITT Cannon, and its licensees, have supplied to industry over 250 million interconnections utilizing this system.



Universal Insertion/Extraction Tool Style — A single, expendable plastic tool is used for insertion and extraction of both pins and sockets. The tool never touches the engaging ends of contacts, and cannot damage the insert. **Contact Insertion** is accomplished with the colored insertion tip of the tool that butts against the contact shoulder. When the contact is fully inserted, the tines snap behind the contact shoulder. **Contact extraction** is equally simple. Using the white ends of the tool, insert the tool tip into the rear of the plug (or receptacle), expanding the tines beyond the contact shoulder and releasing the contact.

1.



Simple, Strong Contact Design — One basic configuration eliminates undercuts and maximizes bend resistance for positive contact mating.

2.

Closed-Entry Socket Insert — Hard dielectric socket face of mating connector has lead-in chamfers for positive alignment of pins and sockets.

3.

Interfacial Pin Insert Seal — Universal interconnect permits design of raised moisture barriers around each pin which mate into lead-in chambers of hard face socket insert for individual contact sealing. Interfacial sealing is never touched by service tools.

4.

Superior Contact Stability — Rear Contact Release System (LITTLE CAESAR contact assembly) features a stamped metal retaining clip captivated by molded-in shoulders of each contact cavity in the insulator. A rear-inserted plastic tool expands the tines beyond the contact shoulder, releasing the contact.

5.

Polarized Backshells — Interlocking teeth on the front of the backshell and rear portion of the shell allow endbells to be positioned as desired, eliminating chafing of wire during assembly.

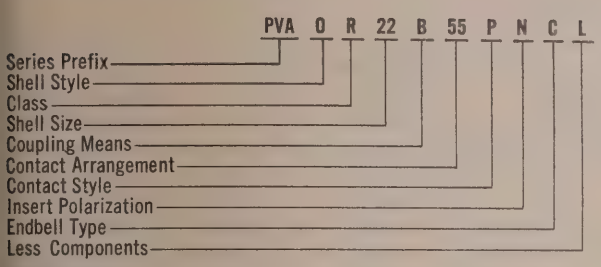
HOW TO ORDER

SERIES I — MIL-C-83723

ITT CANNON DESIGNATION



SERIES PREFIX
PVA — Interchangeable with MIL-C-83723, Series I

SHELL STYLE
0 — Narrow flange mounting receptacle
1 — Cable connecting receptacle
4 — Wide flange mounting receptacle
6 — Straight plug
7 — Single hole mounting receptacle

CLASS
R — Conductive finish (nickel), operating temp. −55°C to 200°C, fluid resistant
G — Conductive finish (nickel), operating temp. −55°C to 200°C, fluid resistant, RFI grounding (plug only)
A — Non-conductive finish (black anodize), operating temp. −55°C to 200°C, fluid resistant

SHELL SIZE
10, 12, 14, 16, 18, 20, 22 and 24

COUPLING MEANS
B — Bayonet

CONTACT ARRANGEMENTS
See following page.

INSERT POLARIZATION
N (normal), W, X, Y and Z

ENDBELL TYPE
C — Short (without strain relief)
R — 90° (with strain relief)
S — Straight (with strain relief)

LESS COMPONENTS
Use letter "L" if connectors are to be supplied less contacts, grommet sealing plugs, and insertion/extraction tools. ("L" is not marked on connectors)

RELIABILITY. LOW COST. PERFORMANCE. DELIVERY!

ITT Cannon Electric provides them all with SURE-SEAL™ — a new series of low cost, UL and CSA recognized, environmental connectors.

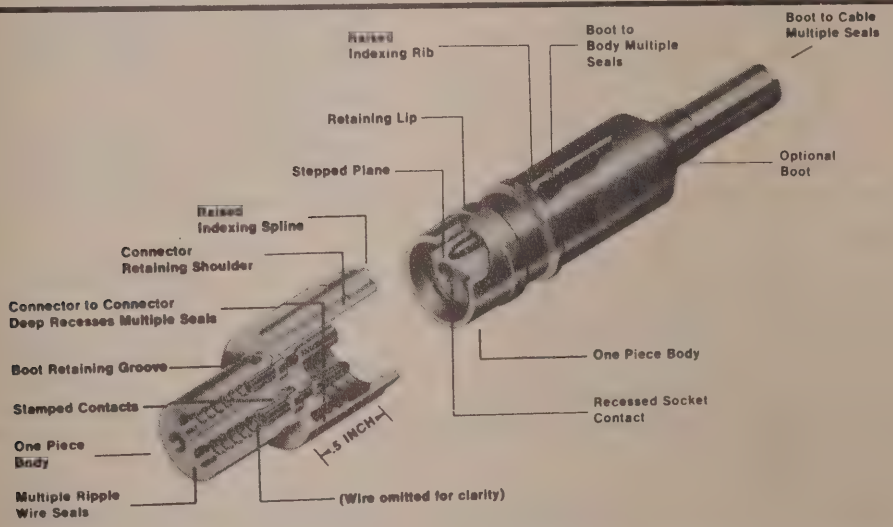
The one-piece molded body and rugged multiple moisture seals make the SURE-SEAL connector a natural for applications whose outside contaminants must be excluded.

One of the many features of the SURE-SEAL connector is its simplicity. In addition to the contacts, only two other parts — the connector bodies — are required to complete the interconnect.

ITT Cannon developed SURE-SEAL connectors to meet the increased requirements for safety and reliability in the automotive field brought about by Department of Transportation regulations. These sealed connectors satisfy all of the parameters defined by automotive/industrial standards including vibration, shock, temperature cycling, salt water spray and immersion, petroleum derivatives, industrial gas, and most important low millivolt drop and low contact resistance.

Along with the SURE-SEAL connector Cannon has developed another automotive/industrial connect series called the VE connector. For more information on this heavy duty transportation equipment connector please turn to page 84.

FEATURES



Low Installed Cost
ITT Cannon's Sure-Seal connectors are designed to be terminated by the O.E.M. The O.E.M. being the termination facility gives complete in-house capability! The total installed cost is what counts.

Field Serviceable
When necessary, Sure Seal connectors can be change, modified, or re-wired in the field.

One-Piece Molded Bodies
The Sure-Seal connector incorporates a very simple one-piece molded body. No other parts — other than contacts — are needed to assemble a complete connector.

Low Cost Stamped Contacts
Without sacrificing quality, the cost of Sure-Seal connectors is kept low by using stamped contacts available on reels in a continuous strip for use on the industry accepted ABT-500 or ABT-606 semi automatic crimp press. All contacts utilize a "B" type crimp.

Wide Wire Gage Accommodations
Ideally suited to be terminated on SAE-J878A or SAE-J558A wires of size 14, 16 and 18 AWG, wire sizes with insulation in the range of .100 to .147 inches, termination to multi-conductor jacketed cables in the range of .208 to .380 inches diameter, and can be terminated to three different wire ranges with total environmental sealing still assured.

Polarized Against Mis-Mates
Sure-Seal Connector mating faces are constructed with two stepped planes; the plug and receptacle must be properly oriented in order for the contacts to engage. For "blind" mating a raised indexing rib and matching raised indexing spline has been added to the plug and receptacle.

Water Submersible
Not just splash proof, but truly submersible for short periods of time. The Sure-Seal connector has been successfully tested in up to three feet of 5% water saline solution. Note: Although Sure-Seal can withstand submersion, it is not designed to be used as an underwater connector.

Resistant to Automotive/Commercial Environments
Sure-Seal connectors are designed to meet temperatures from −40°C to 105°C under conditions of high humidity severe vibration, ice and mud. Sealing integrity is still maintained with exposure to brake fluid, gasoline, diesel fuel, anti-freeze, ultra violet, ozone, steam cleaning under normal operating conditions.

INTRODUCING THE ITT CANNON VE SERIES

The use of electronics is revolutionizing the design of heavy duty transportation equipment.

As trucks, off-road equipment and farm machinery become more complex and more expensive, traditional electromechanical functions are being augmented by electronics. New control and monitoring functions are being added that could not be implemented in any other way. And even more electronic complexity is being introduced by the need to meet ever more stringent government-mandated safety, emission control and fuel conservation regulations.

It is a design revolution, but as in any revolution, there have been some casualties.

Instead of trying to force ready-made solutions onto the problems, at ITT Cannon Electric we took advantage of our experience as the oldest connector manufacturer and our resources as one of the largest connector companies in the world.

Working with design, manufacturing and test personnel at the leading companies in the heavy duty transportation industry, we helped define the problems and developed the right solutions.

The result is the ITT Cannon VE Series of connectors. VE Series connectors meet all the needs of the heavy duty transportation industry. They cost less to buy, and less to use. They eliminate the drawbacks of other designs, and work better and longer in your applications.

They are designed for faster termination into harnesses, easier assembly on the production line, and much quicker field rework, should it ever be required. They are available in a range of sizes and contact layouts to provide the optimum solution to your interconnect problems, whether on the engine, under the hood, on the chassis or in the cab.

VE Series connectors consist of three basic elements: a rugged metal shell; a single-piece, monobloc insulator; and a low cost, high volume crimp contact.

Metal shell halves mate and lock with a quick-turn bayonet coupling and feature a visual indicator of proper mating. They are polarized with five keyways and are jam-proof even in blind mating conditions. Connectors are environmentally-sealed with a gasket sealing the shell and barrel when mated, and an individual wire sealing grommet. Integral diaphragms in the wire cavities of the grommet prevent the entry of contamination

and moisture through unwired cavities, yet are easily punctured when contacts are inserted.

The insulator is a single thermoplastic block, with our SUPER CAESAR™ contact retaining clip permanently installed in the contact cavities. This concept eliminates two-piece construction, molded-in bushings and costly cone retention tooling, yet results in pull-out forces far higher than with other contact retention methods. Contacts are quickly and easily inserted, released and extracted from the rear of the connector for lower installation and maintenance costs.

The socket insulator engaging face features closed entry socket cavities with a lead-in chamfer. The lead-in chamfer guides bent or misaligned pins and ensures positive, accurate axial alignment of all contacts during mating.

Contacts are stamped and formed, with high-performance alloy plating to maintain low contact resistance over the entire life of the connector. They are available as loose pieces or on reels. Termination may be accomplished on Artos and Eubanks automatic luggers for high speed production, with ITT Cannon semi-automatic crimp machines for moderate usage, or with simple hand tools for field modification or repair.

Exhaustive testing and performance proof, both in the lab and under real-world field conditions, show that VE Series connectors are today's best available answer to the interconnect problems of the heavy duty transportation industry.

PERFORMANCE CHARACTERISTICS

VE Series connectors are guaranteed to operate over the temperature range from −40°C to +105°C. They readily withstand the same severe shock and vibration, high humidity, ice and mud that your equipment must cope with day after day. And they continue to maintain their performance and sealing integrity even when exposed to brake fluid, transmission fluids, gasoline and diesel fuel, or anti-freeze, ozone and steam.

Following are some of the performance characteristics.

Test	Requirements	Criteria	Results
Water Immersion	Total immersion, 2 hours	Insulation resistance one megohm min.	Insulation resistance 100 gigaohms min.
Vibration	18-500-18 Hz, 10 G's peak, 3 hours in 3 planes.	No cracking, breaking or loosening of parts, and no electrical discontinuity >10 μsec.	Passed
Shock	50 G, half-sine, 3-axis.		Passed
Fluid Splash	25 splash/drip dry cycles using: gasoline, diesel fuel, brake fluid, transmission fluid, ethylene glycol, SAE 30 oil.	Connectors shall mate and unmate and meet insulation resistance of one megohm min.	40 gigaohms min.
Steam Exposure	121°-149°C at 100 psig.	No damage and meet insulation resistance of one megohm min.	20 gigaohms min.

For complete details please request our test report #C-78-77.

TOOLING

VE Series connectors achieve further cost reductions in manufacturing, assembly and maintenance. Connectors, contacts and tooling have been designed to achieve the maximum productivity possible.

For high volume production, contacts are available on reels for use on the ITT Cannon ABT-500-CCD-VE semi-automatic crimper in conjunction with Artos and Eubanks wire measuring/cutting/stripping machines. The entire operation is performed at a single work station, and production rates as high as 3600 terminations per hour have been achieved with high reliability.

For jacketed multi-conductor cable that cannot be processed on the Artos and Eubanks luggers, Cannon's ABT-500-CCS-VE semi-automatic stripper/crimper unit may be used alone. It both strips and crimps in a single operation and is capable of up to 1000 reliable terminations per hour.

For application of reeled contacts to prestripped wire, we offer the ABT-606-VE, an air-operated semi-automatic crimp machine.

Hand tools include a ratchet-cycle crimper for close quarter terminations and an even less expensive hand crimper for field modification and maintenance. A simple hand tool inserts and removes terminated wires from the rear of the connector.

The entire range of tooling has been designed to maintain the price and performance advantages of ITT Cannon VE Series connectors, and does so very successfully. Users can select equipment that is exactly appropriate to their needs, with the result that VE Series connectors provide lower total installed costs than competitive connectors.

We wouldn' have it any other way. For complete information, contact your nearest ITT Cannon Electric field office.

D SUBMINIATURE RECTANGULAR CONNECTORS

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

GENERAL INFORMATION

D Subminiature rectangular connectors are designed for applications where space and weight are prime considerations. They accommodate a great number of circuits in relation to their size and weight and are especially suited for aircraft, missile, and ground support systems. Although designed essentially for rack/panel applications, D series connectors may be adapted for cable attachments by accessory junction shells (shields) with integral clamps.

- ORIGINAL D with solder pot contacts in a two-piece insulator.
- BURGUN-D Mark IV connector with crimp snap-in contacts in a rear release dielectric retention assembly for economical, commercial applications.
- D*U: Flame-retardant BURGUN-D low cost non-environmental subminiature connectors with rear release crimp, snap-in contacts.
- D*P: Flame retardent 90° all plastic PCB connectors ideal for low cost high performance commercial applications.
- D*SP: Mas/Ter interconnect system connectors providing reliable high speed mass termination; flame retardant.
- D*M: GOLDEN-D Mark I connector with solder pot contacts in a monobloc insulator for improved moisture resistance.
- D*M: ROYAL D Mark III connectors have crimp snap-in contacts in the LITTLE CAESAR® rear release contacts retention assembly for high performance, high reliability applications.

These intermateable connectors will accommodate up to 50 contacts that are rated at 5-amps per contact for #20 gauge wire. A high density arrangement with 78 size 22 contacts is also available, as are combination arrangements with provisions for coaxial, power, and/or high voltage contacts and printed circuit terminations. Polarization is by the keystone shape of the shell; coupling is by friction.

The versatility of the D Subminiature line is enhanced by the variety of finishes, as well as by a complete line of accessories. Many of these D Subminiature connector series and accessories are U.L. recognized. Inquiries regarding modifications and custom harnessing of connectors are invited.

ORIGINAL D* Solder Type, Non-Removable Contacts

The Original D connector utilizes a two-piece nylon insulator in five basic shell sizes: E, A, B, C, and D. These nylon insulators operate in temperatures ranging from —65°F to +250°F (—55°C to +120°C). Contact arrangements accommodate 9, 15, 25, 37, and 50 size 20 solder pot, Wire-Wrap or printed circuit contacts respectively. Standard contact terminations accommodate up to #20 AWG stranded wire. Current rating is 5 amps. Polarization is by keystone shape of the shell. Locking accessories and shells with float mounts are also available.

BURGUN-D (Mark IV) D*C/D*U Crimp Type, Removable Contacts

BURGUN-D CONNECTORS
CRIMP SNAP-IN CONTACTS

BURGUN-D Mark IV connectors are non-environmental, subminiature rectangular connectors with rear release, crimp snap-in contacts. They are intermateable and intermountable with existing types. BURGUN-D connectors operate in temperatures from −65°F to +250°F (−55°C to +120°C) and are used for plug-in module applications, cable-to-cable and cable-to-panel installations, computers, business machines, and many other commercial applications. Available in both glass-filled Nylon (D*C) and flame-retardant glass reinforced thermoplastic UL rated 94V-0 (D*U).

These connectors feature size 20 crimp contacts, accommodating wire size #18 thru #30 AWG stranded wire, the socket contact is a highly reliable, sleeveless, spring finger contact. These contacts are inserted and extracted from the rear of the insulator with an expendable, plastic insertion/extraction tool CIET20HDB, or consult the factory for a metal tweezer type device for high volume users. Closed entry socket insulators correct misaligned pins during engagement. Connectors may be ordered with or without contacts. When ordering connectors less contacts, the suffix "FO" must be added to the part number, and the contacts ordered separately. All assembly tools are ordered separately.

There is a variety of contacts available for termination to printed circuit boards and flex circuits. Semi-automatic crimp machines are also available for volume crimping requirements. For additional cost savings, purchase these connectors without contacts (Code FO), then purchase the contacts in bulk and use them in the connectors as required. With the vast amount of contact combinations in the standard BURGUND-D connector this connector has proven to be one of the most versatile, low cost, rugged connectors available.

The five shell sizes accommodate from 9 to 50 contacts. Polarization and coupling are accomplished through shell configuration and friction, respectively.

REAR RELEASE CONTACT RETENTION SYSTEM UTILIZING DIELECTRIC BIFURCATED CONES

The D*C and D*U connectors feature a rear insulator with integral, molded contact retaining tines. These plastic tines permit the insertion and extraction of contacts from the rear of the connector with a simple, expendable plastic insertion/extraction tool.

During contact insertion, the retaining tines expand as the contact passes thru. These rugged tines snap into place behind the contact shoulder when the contact is fully inserted. The tool is inserted to expand the tines, allowing easy extraction of the wired contact.

The retention system and the integral contact retaining tines guarantee functional reliability in many environments.

STAMPED CONTACTS

Stamped contacts are furnished on reels for use with the semi-automatic ABT-500 crimp and strip/crimp machines. These contacts will accommodate wire sizes #18 thru #28 AWG solid and stranded wire.

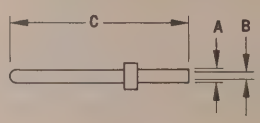
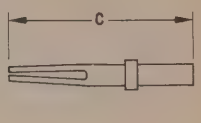
Wire Accommodation	Contact Part Number Pin	Contact Part Number Socket	Contacts Per Reel
AWG #18 thru 22 (For AWG #24 consult factory)	D110238-165	D110238-166	7,500
AWG #20 thru 28 (For AWG #30 consult factory)	D110238-34	D110238-35	10,000

***Note:** Insulation support (crimp) is available on D110238-34 and -35 contacts by modifying the ABT-500 or the Stripper Crimper (recommended wire sizes: 24, 26, 28 AWG).

MACHINED CONTACTS





For low volume usage and field repair. These contacts are available for use with the CBT-460 semi-automatic crimp tool.

NOTE for Size 20-18 contacts only: Shrink sleeving is suggested on the crimp pot to prevent contacts from touching.

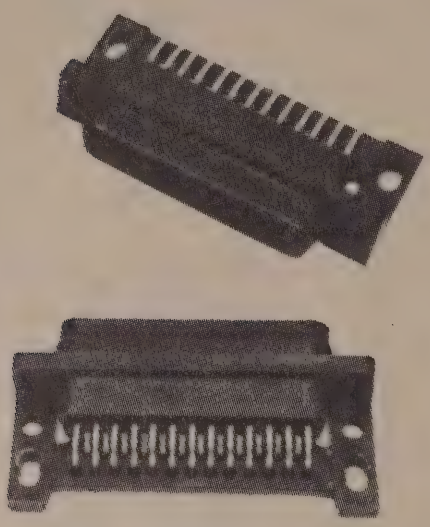
ALL PLASTIC 90° D*P A UNIVERSAL LOW COST RIGHT-ANGLE CONNECTOR FOR PRINTED CIRCUIT BOARDS.



The new Cannon D*P all plastic 90° PCB connector is ideal for telecommunications, computer, industrial control and other applications where low cost and high performance are required.

These printed circuit board connectors are available in the 15, 25, 37 and 50-contact versions, with other contact arrangements planned.

Plugs and receptacles are fully intermateable with all D Subminiature connectors whether solder, crimp or the new insulation displacement types. Mating is complete even when junction shells are used, as in telephone industry applications.

Contacts are held in place by a special snap-in retainer plate that prevents contact pushout and holds the pins precisely aligned for easier assembly to the printed circuit board. Two configurations are available, one for printed circuit boards drilled for any Cannon 90° D Subminiature-type PCB connector, and one for boards drilled for other 90° PCB connectors, metal or plastic. The D*P is fully intermountable in both applications with no redrilling, no extra hardware.

The D*P connector is flame retardant (UL listed 94V-0) glass filled thermoplastic, while contacts are those used in the low-cost Cannon Burgun-D Series.

STANDARD DATA

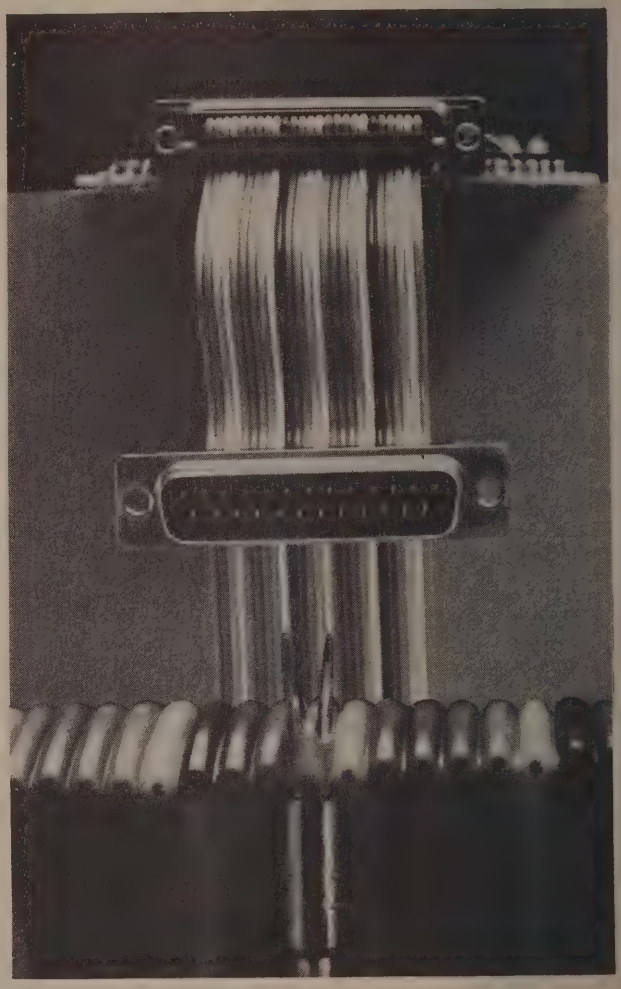
MAS/TER-D D*SP

The new Cannon® Mas/Ter-D (Mass Terminated, D Subminiature) pin-and-socket connectors provide reliable high-speed mass termination at a lower total installed cost than conventional mass termination techniques.

Fully intermateable and intermountable with the Cannon D Subminiature Series, Mas/Ter-D connectors are part of the new Cannon Mas/Ter Interconnect System. The Mas/Ter Interconnect System eliminates the drawbacks of conventional mass termination systems while providing several benefits all its own.

- Fully intermateable and intermountable with and accepts locking device accessories from the Cannon D Subminiature Series.
- Entire connector is terminated at once with no insulation stripping, no complex tooling.
- Terminates cables or may be used in a daisy chain configuration with no break in the cable.
- Each contact size terminates two wire gages, solid or stranded, utilizing both variable spaced .054/.050 (1,37/1,27) and .050/.050 (1,27/1,27) spaced round conductor flat cable or individual wires, with most standard insulation materials.
- Plastic materials used are flame retardant, U.L. listed.

For more information on the full capabilities of the Cannon Mas/Ter Interconnect System, contact your nearest ITT Cannon Sales Office.



HOW TO ORDER

Example: To order a D Subminiature connector with 25 contacts using the Mas/Ter termination technique, standard .120" (3,05) diameter mounting holes, for solid or stranded wire from #22 thru #24 AWG and pin contacts, order as follows:

STANDARD DATA

Insulator	Glass reinforced thermoplastic, U.L. rated 94V-0 (flame retardant), black
Contacts	Gold over nickel electroplate on copper alloy
Shell	Yellow chromate over cadmium plate on steel
Termination technique	Insulation displacement
Coupling	Friction
Polarization	Keystone shape
Contact size	20
Wire accommodation	Contact A: #22 thru #24 AWG solid and stranded, .053 (1,35) max. insulation dia., non-irradiated PVC insulation preferable. Contact B: #26 thru #28 AWG solid and stranded, .041 (1,04) max. insulation dia., non-irradiated PVC insulation preferable.
Current rating	3 amperes continuous, contact A 1 ampere continuous, contact B
Dielectric withstanding voltage	650 VAC
Insulation resistance	1000 megohms
Contact resistance	15 milliohms
Temperature range	—55°C to +105°C (—67°F to +221°F)

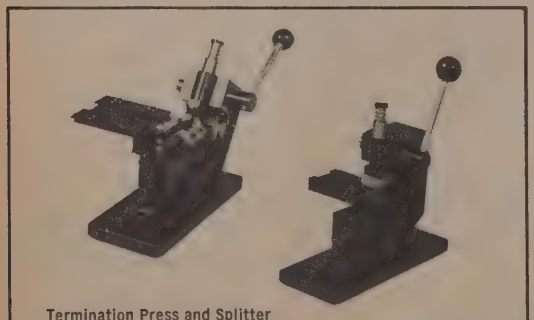
ASSEMBLY PROCEDURE

The lower total installed cost of the Mas/Ter Interconnect System is achieved through a quick, simple termination procedure. The entire operation is performed at a single work station with a single stroke of the press, with no stripping of insulation and no complex tooling.

Either .054/.050 (1,37/1,27) variable-spaced or .050/.050 (1,27/1,27) fixed-spacing round conductor flat cable may be mass terminated with the Mas/Ter interconnect system. .050/.050 (1,27/1,27) wires are first separated on a splitting press. For assembly, the .054 (1,37) portion of the variable-spaced or the separated portion of the fixed-spacing flat cable is positioned over the connector body, the cap is placed over it, and a single stroke of the press terminates all wires. After termination, a strain-relief clamp may be snapped into place quickly and easily.



Termination Press and Splitter

MAS/TER-D Tooling Ordering Information:

Select appropriate components and equipment press to terminate various cable configurations and connector sizes from locator and comb kit listing below.

LOCATOR KITS		COMB KITS	
Connector Layout	P/N Locator	Wire Type	P/N
37 Contacts Pin and Socket	320-7004-005	.050" (1,27) Split Cable*	320-7004-009
25 Contacts Pin and Socket	320-7004-006	.050" (1,27) Split Cable*	320-7004-010

15 Contacts Pin and Socket	320-7004-007	.050" (1,27) Split Cable*	320-7004-011

Termination Press P/N 317-1489-000

*Splitter (P/N 070296-0001) is required to pre split .050" cable prior to termination. Splitter will split **all** widths (15 to 37 conductors) with adjustment of wire guide.

EXAMPLE: Required to terminate 25 conductor .050" (1,27) flat cable to 25 contact connector (pin or socket).

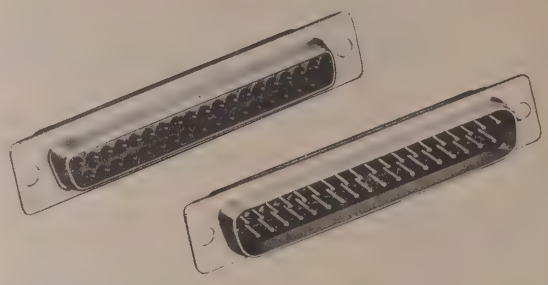
GOLDEN-D (Mark I) D*M Solder Type, Non-Removable Contacts

GENERAL INFORMATION

The D*M connector features solder pot contacts in a monobloc insulator for improved temperature characteristics and increased moisture resistance. Two insulator types are available: combination arrangements with accommodations for coax, power and/or high voltage contacts, plus standard AWG wire contacts; and arrangements with standard AWG wire contacts only. The five amp* solder pot contacts accommodate wire sizes up to #20 AWG standard wire. Socket contacts are of the closed entry type. Operating temperatures of insulators range from −65°F to +300°F (−55°C to +148°C).

Combination arrangements are supplied with unfilled coax, power and/or high voltage contact cavities. Coax, power, high voltage contacts must be ordered separately, and may be used interchangeably in any of the arrangements listed. High voltage contacts accommodate up to #20 wire sizes. Coax contacts (with crimp or solder braid type terminations) and high voltage contacts are snap-in and removable. Coax and high voltage contacts have captivated solder type center contacts.

Standard coax and high voltage plugs contain female center contacts; receptacles contain male center contacts. Combination arrangement pin connector assemblies accommodate coax, power, and high voltage plugs only; socket assemblies accommodate receptacles. Connector assemblies



and contact inserts are matched and color coded to ease assembly. No insertion tool is required for coax, power, and high voltage contacts; they may be extracted with ITT Cannon Tool CET-C6B.

Connectors for non-magnetic applications are available. Standard NMB non-magnetic connectors have magnetic flux densities less than 200 gamma after magnetization with a 5000 gauss magnet.

ROYAL-D (Mark III) D*MA Crimp Type, Removable Contacts

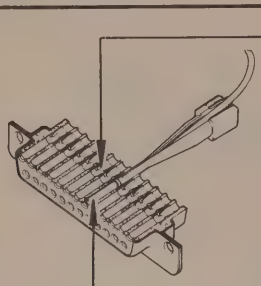
LITTLE CAESAR® REAR RELEASE CONTACT ASSEMBLY

The D*MA connector is a D Subminiature connector that utilizes the LITTLE CAESAR rear release contact assembly. This contact assembly allows rear insertion, release and extraction of crimp snap-in contacts. The simplified contact design with no undercuts offers greater bend resistance and a hard closed entry socket insulator insures positive contact alignment. Consult the factory for availability of rear release coaxial, power and/or high voltage contacts. Crimp terminations accommodate #18, #20, #22, #24, #26 and #30 AWG stranded wire and are rated for 5 amps.†

Extra contacts may be ordered for replacement purposes; for part numbers of contacts, see page 110.

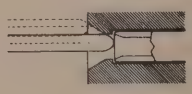
Connectors for non-magnetic applications are available. Standard NMB non-magnetic connectors have magnetic flux densities less than 200 gamma after magnetization with a 5000 gauss magnet.

†Military rating of 20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See Current Ratings shown on page 109.

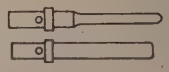


'Contact retaining clip'

Hard dielectric, closed-entry socket insert realigns bent or misaligned pin contacts.



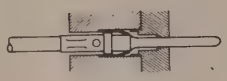
Simple stronger contact without undercuts for greater bend resistance.



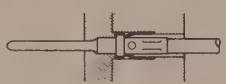
CONTACT INSERTION

Size 20 Contacts

Contact partially inserted.

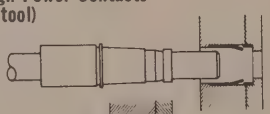


Tines snap behind contact shoulder when contact is fully inserted.

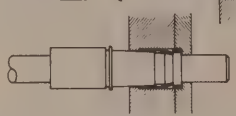


Coaxial Contact and Size 8 High Power Contacts (with built-in metal extraction tool)

Contact partially inserted.

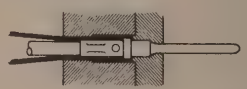


Tines snap behind contact should when contact is fully inserted.

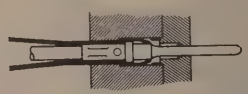


CONTACT EXTRACTION

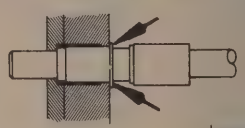
Tines expanded beyond contact shoulder with extraction tool, ready for release.



Contact partially removed.



Depress flange of built-in extraction tool until flush with rear of insulator.



Contact being pulled from connector.

The CET-20-11 tool extracts size 20 pin and socket contacts from the D*MA Series.

Operating Instructions:

A. Place the tool slot over the wire (Figure 2) with the tool tip approximately ¼ inch behind the insulator. Then slide the tool back along the wire until the tool slit opens and surrounds the wire.

B. Slide the tool forward along the wire (Figure 3) and push the tool firmly into the insulator until it bottoms, releasing the contact. Press the wire against the tool and remove wire, tool, and contact from the connector.

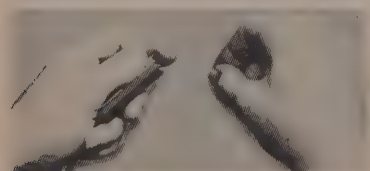
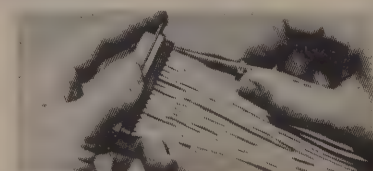
WIRE STRIPPING
1. Cut wires to length. Strip insulation per above illustration. Check for broken or frayed wires.

CONTACT CRIMPING
2. Insert contact and wire into proper crimp tool (and locator, if required). Crimp contact to wire. Inspect crimp.

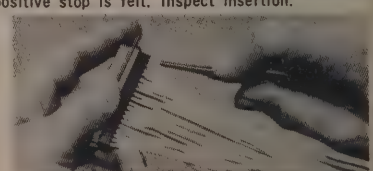
CONTACT INSERTION
3. Center wired contact in groove of insertion tool (for size 22D also, D*MA) with tool tip butting contact shoulder. Insert contact into cavity until a positive stop is felt. Inspect insertion.



4. To be sure contact is locked securely, pull back lightly on wire. Repeat for balance of contacts, working row by row across the insulator.



CONTACT EXTRACTION
5. Place wire into extraction tool tip. (See above for D*MA extraction.)



6. Insert tool tip into contact cavity until tip bottoms against contact shoulder, releasing tines. Hold wire against tool with finger and remove tool and contact. Repeat for balance of contacts.

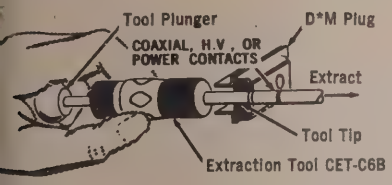
ormerly CET-C6A)

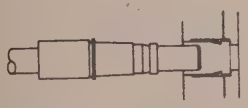


The CET-C6B tool extracts coax, power and high voltage contacts (plug and receptacle) from the D*M Series.

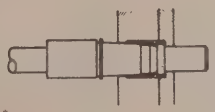
Operating Instructions:
To extract the D*M coax contact, hold the tool by the body and insert the tip into the front of the contact cavity until it booms and closes the coax retaining ring. Holding the body in this position securely enough to keep coax retaining ring closed, push the plunger; contact will be pushed out of the rear of the assembly.

SERTION D*MA COAXIALS AND GH POWER CONTACTS

Contact partially inserted.



Tines snap behind contact shoulder when contact is fully inserted.

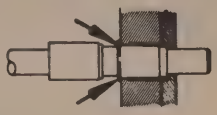


insertion tools are required for the coaxial contact, size 8 high power contacts, and sizes 12 and 16 high power and high voltage contacts.

sertion Procedure:
sh the contact into the rear of the connector. Tines will snap behind the ct shoulder when the contact is fully inserted.

EXTRACTION D*MA COAXIALS AND HIGH POWER CONTACTS

Depress flange of built-in extraction tool until flush with rear of insulator.



Contact being pulled from connector.

A separate extraction tool is not required for the coaxial contact or the size 8 high power contacts. The tool is an integral part of the contact.

Insertion Procedure:
Depress flange of built-in extraction tool until it is flush with the rear of the insulator. Contact can then be pulled from the connector. For extraction of sizes 12 and 16 high power and high voltage contacts the CET-12-16 is recommended.

ASSEMBLY

STEP 1: Straight and 90° Coaxials

1. Slide the outer ring over the cable jacket. Trim the cable as specified in the table of Coax Cable Trim Dimensions. Insert the cable dielectric and center conductor into the inside diameter of the inner sleeve. Then solder the center conductor to the coax center contact.

STEP 2: Straight and 90° Coaxials

2. Slide the outer ring forward until it is flush with the coax shell containing the braid between the outer ring and the inner sleeve. For solder type coaxes, soft solder the outer ring to the assembly thru the cross-drilled solder hold. For crimp type coaxes, crimp with the appropriate tool in the area defined.

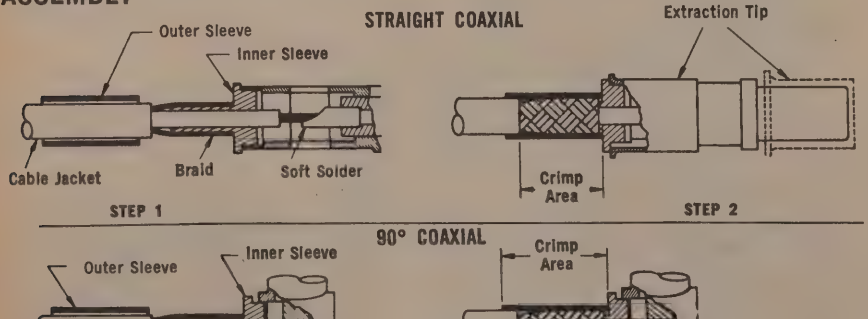
ASSEMBLY



STEP 1: Straight Type

Slide outer sleeve over cable jacket and trim cable. Insert cable dielectric and center conductor into inside dimension of inner sleeve. Solder center conductor to coaxial center contact.

Slide outer sleeve forward until flush with inner sleeve to confine braid. Crimp outer sleeve, using crimp tool CCT-DM. Crimp as close as possible to the inner sleeve shoulder. Push extraction tip over the coaxial (as shown) until it rests against the inner sleeve shoulder.

STEP 2: 90° Angle Type

Slide outer sleeve over cable jacket and trim cable. Insert cable dielectric and center conductor into inside dimension of inner sleeve. Solder center conductor to coaxial center contact.

Slide outer sleeve forward until flush with coaxial shell, confining braid between outer and inner sleeves. Crimp in area shown. Soft solder cap in place.

TT Cannon's DPK series are high performance, environment-esistant, rectangular connectors qualified to MIL-C-83733 (USAF). hey feature crimp snap-in contacts in the dependable LITTLE AESAR® rear release contact retention assembly. Developed y Cannon, this unique, field-proven assembly permits contacts o be inserted and extracted at the rear of the connector. ontacts are qualified to military specifications and are crimped ith MIL-C-22520 crimp tools, using standard locators.

he versatile DPK Connector is suitable for many applications, articularly where environment or thermal protection is man-atory and high reliability is a design requirement.

hese high performance connectors are available in two shell izes with a variety of mounting configurations. There are 3 contact arrangements available accommodating from 18 to 85 standard, shielded and coaxial contacts. The standard ontacts are available in sizes 12, 16, 20 and 22D. Shells are a ie-cast aluminum alloy with electroless nickel finish. Insulators re a high grade, glass reinforced, epoxy-based resin. Silicone ubber is used for wire sealing grommets, interfacial and eripheral seals.

DESCRIPTIONS

Shell Size
A — Small shell
B — Large shell

Contact Modification
G — MIL-C-38999 contacts. Size 22D for DPKA-131 and DPKB-185 contact arrangements only.
W — MIL-C-38999 type contacts. Size 22D Wire-Wrap* posts for DPKA-131 and DPKB-185 layouts. .025″ square posts for .340; extension from grommet face.

Contact Arrangement
Shell Size A: 18, 32, 51 and 131 (MIL-STD-1531).
Shell Size B: 48, 64, 78, 101, 59W7, 71, 71C15, 161 and 185 (MIL-STD-1532).

Contact Type
P: Pin (Receptacle Connectors)
S: Socket (Plug Connectors)

Polarization
Six-position shell polarization accomplished with polarizing pins mounted on each end of shell flange. Available on mounting styles A and B only.

Mounting Styles
A: Two mounting holes .197″ diameter (for either nuts or jackscrews ordered separately) and two polarizing posts. (Replaces Mounting Style B.)
C: Four MS24700-2 bushings, included for the receptacle (M83733/5).
F: Four (4) clinch nuts (No. 6-32 thread) (M83733/6).
G: Four .281″ diameter holes (for MS24700-2 bushings or 231-0019-000 spring mounts) (M83733/1).
H: Two mounting hole flange. Two (231-0019-000) spring mounts on the plug and two MS24700-2 bushing mounts on the receptacle (M83733/10; /12).
K: Four captivated, non-rotaing spring mounts on the plug (M83733/4).
M: Two mounting hole flange. Two mounting holes .281″ diameter (for MS24700-2 bushings or 231-0019-000 spring mounts) (M83733/9).
X: Two guide pins with two (231-0019-000) spring mounts on the plug and two guide sockets with two .197″ diameter holes on the receptacle (M83733/2; /3).
Y: Two guide sockets with two (231-0019-000) spring mounts on the plug and two guide pins with .197″ diameter holes on the receptacle (M83733/7; /8).
Z: Two staggered clinch nuts on the receptacle (No. 6-32 thread) (M83733/11).

Material Modification
-7 standard product line, environment resistant per MIL-C-83733(USAF). QPL M83733.

MOUNTING STYLES/APPLICATIONS

DPK connectors for rectangular or staggered mounting are available in both two- and four-spring mount assemblies, or the same shell style may be ordered to accommodate bushing assemblies. In the spring mount version the spring-loaded mechanism will compensate for a panel space variation of up to .070" while insuring electrical and environmental integrity.

DPK connectors are also available with polarizing posts, accommodations for jackscrews, and coupling nuts for cord-to-cord and cord-to-panel applications. Another shell style has two or four mounting holes fitted with captive clinch nuts.

For mounting dimensions of the various mounting styles shown here please refer to pages 129-130.

MOUNTING STYLE A

Mounting style A is designed for cord-to-panel and cord-to-cord applications. Connectors are supplied with two polarizing posts installed and provisions for installation of two jackscrew assemblies or two coupling nut assemblies. (Replaces Mounting Style B.)

POLARIZING POST ALTERNATE POSITIONS

Pin insert polarizing positions are 180° opposite socket insert polarizing positions. Shaded areas indicate extended portion of the polarizng posts. Cord to panel DPK connectors are available in 35 alternate polarizing positions by changing indexing of the polarizing posts. Keystone corners and hexagonal posts provide this wide range of alternate positions.

Dimensions subject to change

ITT Cannon Electric's DPXNA (non-environmental, Type IV) and DPXNE (environmental, Types II and III) rack and panel connectors are designed to meet or exceed the requirements of MIL-C-81659, Revision B. They are used in military and aerospace applications and computer periphery equipment requirements, and are designed to operate in temperatures ranging from —65°C to 125°C. DPXNA/NE connectors are available in single, 2, 3, and 4 gang configurations, with a total of 12 contact arrangements accommodating contact sizes 12, 16, 20 and 22, and combination standard and coaxial contacts. Contact retention of these crimp snap-in contacts is provided by the LITTLE CAESAR® rear release contact retention assembly. Environmental sealing is accomplished by wire sealing grommets and interfacial seals.

POLARIZATION POSITIONS

MIL-C-81659B requires that polarizing posts be shipped unassembled with the connector. The user then assembles the posts in the preferred position and marks the position number on the connector. All DPXNA and DPXNE connectors shall be sold this way. The position number will not be marked.

POLARIZING POSITION

The last two digits in the four-digit dash number refer to the polarizing post position. The polarizing posts will be shipped unassembled with the connector assembly. The position number is not stamped on the connector. This allows the customer to position the posts themselves and then stamp the appropriate number on the shell.

SMA SERIES CONNECTORS

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

The SMA Series is a 50 ohm impedance, threaded coupling, high frequency (0-18 GHz) connector. ITT CANNON ELECTRIC SMA's meet all requirements of and, indicated connectors are, qualified to MIL-C-39012. The stainless steel bodies are available in gold plated or passivated finishes. Both male and female center contacts are gold plated beryllium copper. The dielectric material is TFE. Moisture sealing is provided by silicone rubber gaskets.

PERFORMANCE DATA AND SPECIAL APPLICATIONS INFORMATION AVAILABLE UPON REQUEST.

ADAPTA-CON P. C. AND I/O PACKAGING

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

A SPECIAL APPROACH TO P. C. AND I/O PACKAGING DESIGNS...

- Low cost
- Post and Receptacle P. C. interconnections
- Printed circuit, I/O applications
- Custom made backplane panels
- Contacts on .100" (2,54), .125" (3,18) and .150" (3,81) centers
- High and low force versions

ITT Cannon Electric's ADAPTA-CON connector series meets the ever increasing demand for more versatile post and receptacle interconnections at less cost per termination. The ADAPTA-CON connector series reflects a new concept in electronic packaging and represents the latest state of the art.

ADAPTA-CON connectors provide a versatile approach to dual contact P. C. and I/O interconnecting packaging designs. They are available in two styles: the UBS (solder type) for printed circuit applications; and the UBC (crimp type) for I/O applications. These designs fulfill the industry's need for post and receptacle connections between P. C. boards and backplane assemblies as well as for I/O applications.

UBS receptacles are mounted to the P. C. board by standard flow-solder techniques. The unit is then mated with UBP posts mounted in a metal or epoxy backplane.

UBC receptacles utilize insertable and removable crimp contacts that accommodate #18 thru #30 AWG wire for I/O applications.

SERIES PREFIX
UBS — Solder type P.C.

CONTACT SPACING
4 — .100" (2,54) centers
5 — .125" (3,18) centers
6 — .150" (3.81) centers

CONTACT FINISH (selective plating)
A — 20 microinches gold over 50 microinches nickel
B — 30 microinches gold over 50 microinches nickel
C — 50 microinches gold over 50 microinches nickel
E — Electrodeposited bright 90% tin and 10% lead†

NUMBER OF CONTACTS
4 to 65 — (.100" (2,54) centers) single row*
8 to 130 — (.100" (2,54) centers) double row
4 to 51 — (.125" (3,18) centers) single row*
4 to 43 — (.150" (3,81) centers) single row*
8 to 86 — (.150" (3,81) centers) double row

TERMINATION LENGTH
A — .115 (2.92) nominal
C — .125 (3,18) for .062 (1,57) thick PCB—vertical mount.
D — .156 (3,96) for .093 (2,36) thick PCB—vertical mount
E — .188 (4,78) for .125 (3,18) thick PCB—vertical mount

MOUNTING
1 — P.C. board mounting
4 — P.C. board mounting, vertical

CONTACT ROWS
S — Single
D — Double

CONTACT FORCES
L — Low: .5 to 6 oz. (0,14 to 1,67 N)
H — High: 2 to 8 oz. (0,56 to 2,22 N)

MODIFICATION CODE
Consult factory for modifications

* When ordering an even number of contacts for the single row UBS connector the number 1 contact will have the termination tail on the mating face (left hand side) unless otherwise specified.
† Consult factory for availability.

UBC connector insulators with crimp contact termination (.100" (2,54), .125" (3,18) and .150" (3,81) centers)

To order UBC connector insulators use the part numbers shown in the tables on pages 150 and 151. Contacts for UBC connections are available in bulk or reel and must be ordered separately.

See page 152 for contact part numbers. Please consult the factory for termination tooling for UBC.

UBC CRIMP CONTACTS

At the time of ordering, customer may specify whether reel carrier strip contacts or loose contacts are desired. Ordering information is below.

NOTE: All gold plated contacts are selectively plated with specified minimums of gold in contact area only. Balance of contact is plated gold flash. For example, -012 plating is defined as 20 microinches of gold in contact area over 50 microinches nickel with gold flash in non-contact area.

SPECIAL ASSEMBLIES

These three special assemblies consist of a modified UBC insulator into which standard UBC contacts are inserted. Cable protection and strain relief is provided by molded plastic clam shells. A locking clip is also provided for latching to printed circuit headers. These connectors mate to matching groups of .025 square pins.

MAS/TER™—IDC INSULATION DISPLACEMENT CONNECTORS

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

Mas/Ter-IDC™ INSULATION DISPLACEMENT CONNECTORS

ITT Cannon's Mas/Ter IDC Insulation Displacement Connector system is based on a detailed analysis of packaging needs in telecommunications, computer, industrial control, and other applications requiring low cost and high performance. We at ITT Cannon Electric have responded with an interconnect family that is comprehensive, extensive, and still growing. It includes ITT Cannon's popular Mas/Ter-D Subminiatures, Edgecard, DIP, PCB, receptacle, header and transition connectors, plus ribbon cable in #26/28 AWG stranded and solid wire.

Mas/Ter-IDC insulation displacement connectors provide high speed mass termination of round conductor flat cables, lowering your total installed cost and increasing end product reliability. With Mas/Ter-IDC fifty or more mass terminations can be accomplished in a single operation that eliminates the need for time-consuming wire stripping, crimping and soldering. Simple hand tools quickly turn out reliable mass terminations and achieve substantial reductions in labor costs.

With the introduction of Mas/Ter-IDC, you can count on ITT Cannon for all your connector system packaging needs. When you specify CANNON® Connectors across the board, you are assured of complete component compatibility. And you'll save time by dealing with a single, reliable source.

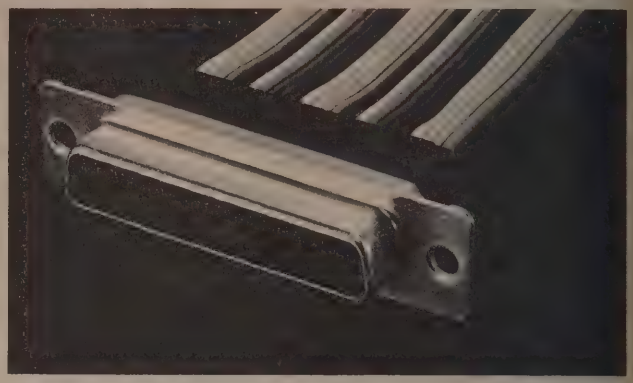
For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

Mas/Ter-D CONNECTORS

Mas/Ter-D pin-and-socket connectors can be used to terminate cables or incorporated into daisy chain configurations without a break in the cable. They provide a reliable mass termination using standard round conductor flat cable or individual wires, either solid or stranded. For added application flexibility, Mas/Ter-D is fully intermateable and intermountable with all D Subminiature connectors on the market.

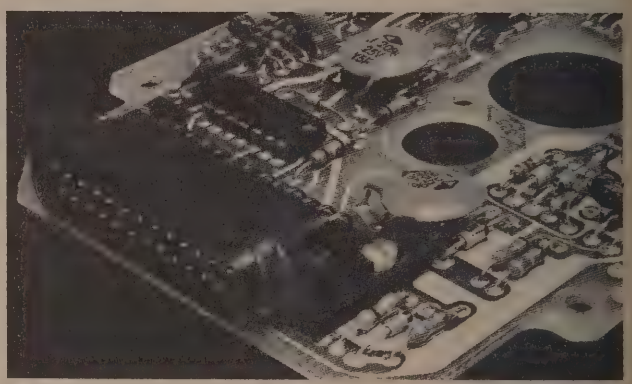
When installed the Mas/Ter-D contact penetrates and displaces the insulation—without severing the conductor—and continues to provide insulation support to the wire. This contact design provides 25% more wire-to-contact surface area to increase reliability and conductivity.



Mas/Ter 90° D*P CONNECTORS

Mas/Ter 90° D*P right-angle printed circuit board connectors are ideal for telecommunications, computer, industrial control and other applications that require low cost and high performance. Made from a flame retardant, U.L. listed; glass-filled thermoplastic, the D*P can be mounted directly over printed circuit patterns without causing short circuiting. Universal design means these benefits can be easily obtained. The D*P can be used to replace any D Subminiature-type 90° printed circuit connector without redrilling the circuit boards or requiring extra hardware.

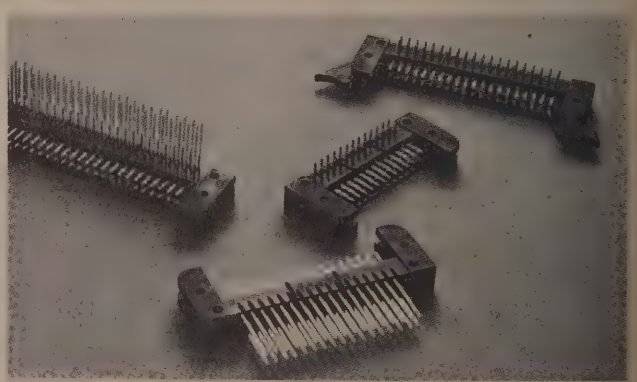
The D*P is fully intermateable with all D-Subminiature connectors, whether insulation displacement solder or crimp-on design. Mating is complete even where junction shells are used, as in telephone industry applications.



Mas/Ter G08 HEADERS (SHROUDED)

Mas/Ter G08 headers are used to interconnect electrically rigid printed circuit boards with ribbon cable socket connectors. They are designed for applications that require a fast and reliable disconnect/connect capability, and are available with or without a locking latch feature. The ITT Cannon locking system provides a positive, secure grip on the receptacle and also incorporates an ejection feature to simplify disconnection. The receptacle is ejected when the locking latches are released. These locking latches are ruggedly pinned to the insulator and will not release until a sideways pressure is exerted.

Mas/Ter G08 headers are available in both straight and right-angle mounting configurations, with contact termination by solder or wrap posts. In this version, a plastic shroud along one side protects the engaging end of the male electrical contact.



Mas/Ter G08 HEADERS (UNSHROUDED)

Mas/Ter G08 unshrouded headers are available in a double readout version accommodating from 8 to 70 contacts with termination by solder or wrap posts. They are available in straight configurations with or without mounting brackets for a variety of mounting applications.

Mas/Ter G08 headers are used to interconnect electrically rigid printed circuit boards with UBC crimp housings or ribbon cable socket connectors.

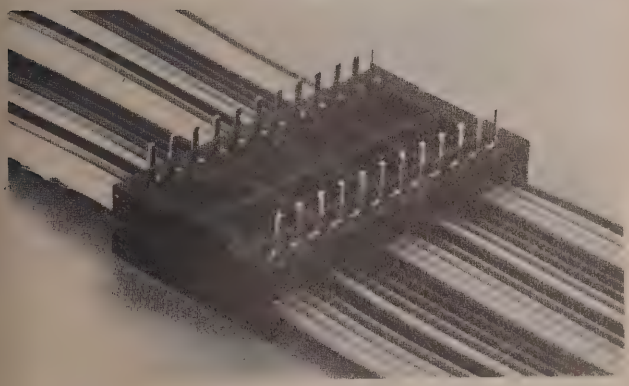
Mas/Ter G08 RECEPTACLES

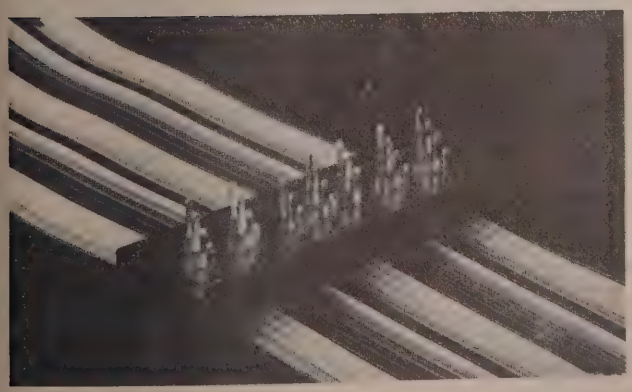
Mas/Ter G08 double readout socket receptacles mate with .025" (0.64) square or round posts staked into the printed circuit board or with the Mas/Ter G08 headers described on pages 8-11. They are available in a variety of arrangements accommodating from 10 to 50 contacts, and in open (feed-through or daisy chain) and closed-end styles.

These Mas/Ter receptacles terminate cable quickly and efficiently without stripping the insulation, and 50 or more conductors can be terminated simultaneously. Polarization is by a visual marking arrow shown on the insulator which aligns with a corresponding arrow on the mating G08 header.



Mas/Ter RTG08A DUAL INLINE PLUG CONNECTORS

Mas/Ter DIP connectors terminate directly to ribbon cable and can be permanently soldered to a printed circuit board, or used as a plug-in for standard IC sockets. These connectors offer a low cost method of attaching a ribbon cable to the printed circuit board as only one connector is required. Due to its low profile design, this arrangement saves space vertically permitting greater packaging densities.



Mas/Ter RTG08B PC BOARD TRANSITION CONNECTORS

Mas/Ter RTG08B PCB connectors allow direct termination of the ribbon cable to the printed circuit board without the use of a mating connector. These connectors terminate directly to the ribbon cable with the contact tail soldered directly to the etched and drilled circuit eyelets of the printed circuit board. It is a fast, economical method of terminating ribbon cable to a PC BOARD AS ONLY ONE CONNECTOR IS REQUIRED. It can also be used for daisy chain or end type termination requirements.

Mas/Ter G03 EDGECARD CONNECTORS

Mas/Ter G03 edgecard connectors are used to facilitate easy replacement of PC BOARDS IN SYSTEMS. These connectors are mass terminated to the ribbon cable and then mated directly with the etched electrical circuit pads of a PC DAUGHTERBOARD. If a series of edgecard connectors are terminated to the same cable, they can be "daisy chain" connected from daughter-to-daughter board. The cable assembly can then act as a motherboard (backpanel) interconnecting method of packaging.

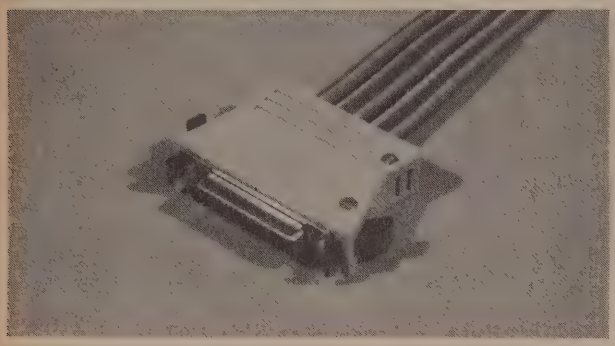
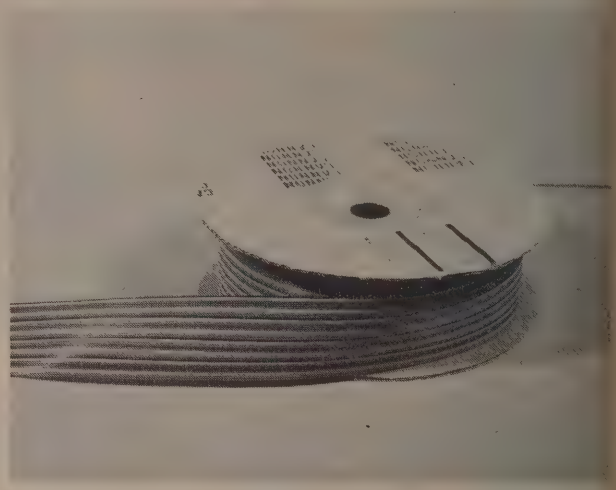
JUNCTION SHELL FOR Mas/Ter-D RIBBON CABLE CONNECTOR



The junction shell is made of light grey thermoplastic, and is also available with an optional locking mechanism.

Mas/Ter RIBBON CABLE



Mas/Ter-IDC FAMILY TERMINATION TOOLING

The lower total installed cost of the Mas/Ter interconnect system is achieved through a quick, simple termination procedure. The entire operation is performed at a single work station with a single stroke of the press, with no stripping of insulation and no complex tooling.

All of the Mas/Ter-IDC family of connectors can be terminated by one press. A single locator block with grooves fits all Mas/Ter GO and Mas/Ter RTGO connectors. A second locator block terminates the Mas/Ter-D Series. The ease of change in the tooling is a major feature. All Mas/Ter GO and Mas/Ter RTGO series connectors are placed into locator block in a pre-assembled, pre-loaded condition which makes handling fast and simple. A pneumatically operated version is available to ease operator fatigue on higher volume production.

CABLE SPLITTING

When terminating ribbon cable having .050" (1.27) centers, an interim step splits the cable into groups of three (3) and four (4) conductors and slightly spreads the groups to fit into a locator comb in the terminator press. The manually operated press is lightweight (10 pounds) and all required guides are included.

- Available as flat cable or twisted pairs, fully compatible with Cannons Mas/Ter Interconnect System.
- Fast, simple mass termination of all conductors and twisted pairs simultaneously reduces installation costs and errors.
- Precise spacing of all conductors and twisted pairs assures predictable, consistent performance.
- Light and flexible to save weight and space.
- Color coded for easier traceability.
- UL-recognized conductor and cable styles.

FLAT RIBBON CABLE

Ribbon cable Is fabricated with #28 AWG 7-strand conductors laminated into flat cables. Conductors are precisely positioned on .050" (1.27) centers. Standard laminating material is self-extinguishing PVC, with other materials available.

TWISTED PAIR RIBBON CABLE

Twisted pair ribbon cables are fabricated with alternating 18" (457.2) lengths in which conductors are twisted pairs, and 2" (50.8) lengths in which all conductors are laid out straight, parallel and on .050" (1.27) centers. Conductors are PVC—LAMINATED #28 AWG, 7-strand pre-insulated wires, with from 20 to 50 conductors (10 to 25 pairs) per cable.

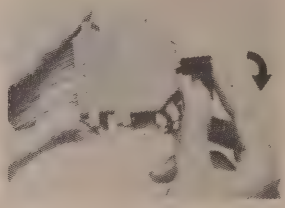
CANNON DL SERIES ZERO INSERTION FORCE CONNECTORS ARE LONG-LIVED, FAST AND INEXPENSIVE

This is our "DL" Series.

Simply place it together.



Turn the cam lock a quarter turn.

It's locked and mated.

The Cannon DL Series of ZIF connectors fills the need in the commercial/industrial, computer and peripheral equipment market places for low-cost, high performance multiple-wire power and signal connectors.

DL connectors feature: a minimum rated life of 10,000 complete mating and unmating cycles with no performance loss; can be mated and unmated in less than two seconds even with as many as 2,496 contacts; and they cost less (often as much as 25% less) per mated line than competitive high-density rack-and-panel connectors.

The long life and rapid mating are achieved through the use of our Zero Insertion Force design. Contacts in the plug and receptacle do not touch each other while the connector halves are being engaged. Instead, the plug is placed over the receptacle, then a quarter turn of an actuating shaft mates all the contacts at once, while also physically locking the connector halves together. Connector engagement force is zero, and the only wear on the contacts occurs as they are pressed together and lightly wiped past each other during the camming and locking operation.

Simple. Effective. And reliable.

Combining their special design with commercial-grade materials and low cost crimp and wrappable hermaphroditic contacts that may be hand or machine terminated makes the DL Series of ZIF connectors the finest low-cost-per-mated-line I/O connectors available today.

TEMPERATURE/CURRENT RATING

The curves shown represent the rated current carrying capacity of the Cannon DL1, DL2 and DL3 electrical connectors, derated to 80% of the values recorded using the methods specified by International Electro-Technical Commission Document 48 (1975).

Current was applied to the total connector (all contacts) in one-half ampere increments and maintained at each current level until thermal stability was achieved. A thermocouple inserted into the "hottest area" of each connector then measured the connector temperature at the same time that an ambient temperature reading was taken. The difference between the two measured values is the heat rise or self-heating created solely by the current flow, and this temperature rise for each current level was deducted from the insulator material rated temperature. These values were then derated to 80% to obtain the curves below.

The interconnect system scaled for today's requirements

In electronic systems today, space is becoming a precious commodity. More and more is being designed into less and less space, with resulting demands for reductions in size and weight yet with no relaxation of reliability requirements.

A frequent choice for interconnecting microminiature systems has been hard-wiring—in spite of the loss of plugability and versatility—because conventional connectors are too large.

But there is a better choice.

Cannon microminiature connectors.

Our microminiature connectors are available with densities as high as 1600 contacts per square inch and, with reliability in excess of 99.9%, provide the reliability of hard-wired systems with none of the drawbacks. Three basic contact families encompass 40,000 standard line items that may be used in their standard configurations, readily and inexpensively modified for your specific applications, or provided in completely assembled, wired and tested multiple connector harnesses.

We have manufactured hundreds of millions of contact lines in our microminiature connectors and have a high volume capability and range of designs that make our microminiature connectors competitive in even the most cost-conscious commercial applications.

Our microminiature connectors are flying in artillery shells where they withstand 20,000 G shocks and in model airplanes, computer mainframes and peripherals, seismic streamers and portable radios.

The key to the high performance and reliability of Cannon microminiature connectors is the Twist Pin Contact* system. In this design, the conventional positions and action of the pin and socket are reversed. The spring action is in the flexible Twist Pin, not the socket, and the socket is exposed while the pin is recessed within a positive alignment cavity within the insulator.

The flexible Twist Pin Contact consists of several strands of wire in a compressible spiral which is welded at both ends, with one end crimped into a tubular sleeve. During mating, the protruding socket is guided into the pin cavity by the lead-in chamfer.

The walls of the pin cavity keep the pin within the capture radius of the socket, while the controlled radius on the pin tip combines with the interior chamfer of the socket to cam the pin into alignment, assuring positive mating. Once mated, the compression of the pin spring members exerts a constant pressure that ensure electrical continuity and resists the highest levels of shock and vibration.

These contacts are used in all three basic families of Cannon microminiature connectors: the CENTI line, with 5 amp Twist Pin contacts on .100" (2.54 mm) and .075" (1.91 mm) centers; the MICRO line with 3 amp Twist Pin contacts on .050" (1.27 mm) centers;

Section I: The MICRO Line

The Cannon MICRO Series established the standards for performance and reliability in microminiature interconnects. Exceptionally versatile, MICRO connectors are available in rectangular, circular, and strip configurations, with 3 amp MICROPIN®/MICROSOCKET® contacts on .050" (1.27 mm) centers, or with special arrangements of power and coaxial contacts.

The heart of the Cannon MICROPIN/MICROSOCKET contact system is a multi-element Twist Pin Contact recessed within an insulating housing. The rugged, cylindrical sockets are mounted in the exposed half of the connector. When connector halves are mated, the chamfered sockets are first aligned by the connector body, then guide the spiral MICROPIN contacts into proper and positive alignment, even under worst-case tolerance conditions. This is Cannon's POS-A-LINE® connector design.

The multiple spring elements of the MICROPIN, then under compression, form a multipoint contact system of high mechanical and electrical integrity. Contacts will provide fail-safe reliability over thousands of mating and unmating cycles, and have proven themselves in applications that range from commercial products to equipment that has been landed on the moon.

STANDARD DATA

- Contact rating—3 amps max.
- Minimum contact centers—0.050" (1.27 mm).
- Wire sizes—#26 thru #30 AWG, stranded or solid.
- Contact termination—multiple indent crimp.
- Contact retention—fixed via epoxy.
- Contact materials and finish—Copper alloy, gold-plated per MIL-G-45204, Type II, Grade C, Class 1.
- Mating/unmating force—8 oz. per contact, max.

PERFORMANCE DATA

The table below summarizes the results of key tests performed in accordance with MIL-STD-202, where applicable. Data is applicable to standard connectors with standard terminations. Variations may affect this data, so please consult the factory for further information on your requirements.

INTRODUCTION

MDM connectors are used in applications requiring highly reliable, extremely small, lightweight connectors. They are available in 7 shell sizes accommodating from 9 to 1 contacts, and special arrangements of power and coaxial contacts.

These connectors are designed to meet the rapidly increasing demands for an environmental, high performance, rugged, moisture-sealed microminiature connector. This connector employs size 24 MICROPIN® /MICROSOCKET® contacts on .050" (1,27 mm) centers in a contact density identical to the standard MICRO-D connector series, but with these additional features:

- Aluminum shells to provide greater strength, prevent chipping, cracking or breaking, offer electromagnetic (EMI) and RFI shielding.
- Silicone elastomer compression interfacial seal to provide a complete moisture and humidity seal between each contact and between contacts and shell.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: (800) 854-3573; in California, (800) 432-7063.

ITT CANNON ELECTRIC

MICROMINIATURE CONNECTORS
MDM-PCB SERIES

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

INTRODUCTION

MDM-PCB connectors are designed for use with flex circuitry, flat cable and printed circuit boards. They use the standard MDM metal shell and provide high density and high reliability in board-to-board, board-to-cable and cable-to-cable applications.

MDM-PCB connectors are available in 7 shell sizes with 9 to 51 contacts. Terminations may be straight or at 90° for PCB mounting. Jackpost mounting and locking hardware is also available.

If the connectors shown in this catalog do not meet the requirements of your application, a special shape, size or layout using the standard MDM metal shell can be made available. Contact the factory for details.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: (800) 854-3573; in California, (800) 432-7063.

MDM COAXIAL/POWER SERIES

MDM COAXIAL

The MDM Metal Shell Connectors have been tooled in several coaxial layouts and offer the versatility of combining coaxial and signal lines in the same connector. Any modifications to these layouts or new requirements, please consult the factory. For ordering information see page 169. For contact layouts see page 170.

MDM POWER

The same insulator that is used with coaxial contacts is available with power contacts. This offers the versatility of combining power and signal lines in the same connector. Power contacts are rated at 13 amps, 24V rms, AWG #16 white stranded.

MDM COAXIAL/POWER

Power and coaxial contacts can be interchanged as desired.

MICROMINIATURE CONNECTORS MIK/MIKM/MIKQ SERIES

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

INTRODUCTION

Dimensions subject to change

MICRO-K microminiature circular connectors are rugged yet lightweight — and meet or exceed the applicable requirements of MIL-C-26482. Applications include computers, biomedical, instrumentation and miniature black boxes.

MIK: Accommodate up to 55 contacts on .050(1,27mm) centers (equivalent to 420 contacts per square inch). Five keyway polarization prevents cross plugging. The threaded coupling nuts provide strong, reliable coupling. MIK receptacles can be either front or back panel mounted; in back mounting applications, panel thickness of up to 3/32" can be used on the larger sizes.

Standard MIK connectors are available in two shell sizes accommodating two contact arrangements pre-wired to your specific requirements.

MIKM: Similar to our MIK, except has a steel shell and receptacle for improved ruggedness and RFI resistance. It accommodates up to 85 twist pin contacts.

MIKQ: A quick disconnect metal shell and receptacle version that can be instantaneously disconnected yet provides a solid lock when engaged. Applications include commercial TV cameras, portable radios, military gun sights, airborne landing systems and medical equipment.

For other variations of the basic MIK circular design, contact your nearest ITT Cannon Electric office or call our Microminiature Products Group at our 24-hour toll-free number: (800) 854-3573, in California, (800) 432-7063.

PRINTED CIRCUIT BOARD AND CARD MOUNTING FRAME APPLICATIONS

CONTACTS ON .050" (1,27 mm) CENTERS

50-MIL STRIP microminiature connectors are designed for space and weight saving applications in a space conscious industry. The strip configuration provides an extremely dense and reliable interconnection device in a minimum profile package, giving great application flexibility.

These connectors are available in many combinations of length, contact spacing and terminations to give designers maximum latitude in their packaging and interconnection solutions. They have been used successfully on printed circuit boards and card mounting frames. Because of its configuration, the 50-MIL STRIP connector is particularly suited for mounting with high strength epoxy adhesive. In lengths over 2" (50,80 mm), guides, rails or other systems should be used to assure alignment.

50-MIL STRIP connectors use either a flexible insulator of polycarbonate or nylon thermoplastic that can be mounted on curved surfaces up to a radius of approximately eight inches, or a more rigid insulator of diallyl phthalate — giving the connector a higher temperature capability. Up to 120 micropin contacts can be held in a single strip on .050" (1,27 mm) centers. Guide pins and polarizing devices are available. Special termination with hookup wire is available to meet specific customer requirements. Crimping hookup wire to contacts before they are inserted is often desirable in high density contact arrangements. Color coded wires of any length in sizes #26 thru #30 AWG solid and #26 thru #30 AWG stranded can be harnessed by the factory. For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: 800-854-3573; in California, 800-432-7063.

CONTACT RESISTANCE

Tests give constant resistance readings from 10μa to 3 amps on individually mated contacts. The maximum allowable contact resistance, measured on the wire at the rear of the contact, is 8 milliohms. The average contact resistance is 6 milliohms.

Current Rating—3 amps max.
Max. Voltage Drop—24 millivolts at 3 amps.
Average Voltage Drop—12 millivolts at 3 amps.
Low Level Contact Resistance—Measured voltage drop is .24 x 10^{-3} volts at 10 x 10^{-6} amps.

DIELECTRIC WITHSTANDING VOLTAGE

Min. Flashover voltage (at room temp.) at 60 cps rms 50% R.H.
Sea Level—900 VAC
70,000 feet—250 VAC

VIBRATION AND SHOCK

No discontinuity detected (in excess of 1 micro second) after twelve 15-min. sweeps from 10 to 2000 cps at .060" (1,52 mm) double amplitude or 20g, or after twenty shocks of 50g. Connectors were mounted to simulate service condition. Tests conducted to MIL-STD-202, Method 204A, Condition D and Method 213, Condition G.

TEMPERATURE RANGE

MTA, MTN: —65°F to +275°F (—53°C to +135°C)
MTB: —65°F to +302°F (—53°C to +150°C)

ENGAGING AND SEPARATING FORCE

For an individual contact the maximum engaging force is 8 ounces (226,80 grams). Minimum separating force is 0.5 ounces (14,17 grams) per contact. Test conducted using min./max. bushings.

SALT SPRAY

No damage or unacceptable increase in contact resistance after mated sample subjected to 48 hours of salt spray per MIL-STD-202, Method 101C, 5% solution, Condition B.

Note: MICRO-D environmental connectors were tested successfully in accordance with MIL-C-26482, Para. 4.6.14, and MIL-STD-202, Method 106B. The moisture resistance test was conducted using mineral-free water for a 10-day period. After this, insulaton resistance tests were conducted with satisfactory results.

CONTACT AND INSERT RETENTION

Over 6 lbs. (2,72 kg.) min. axial load after 10 cycles.

DIMENSIONAL DATA

LENGTH

Contact cavities in 50-MIL STRIP connectors are in a single row and located on .050" (1,27 mm) centers or increments thereof. MTA and MTN connectors can be supplied in lengths up to 6.02 inches (157,91 mm) with a maximum of 120 contacts on .050" (1,27 mm) centers. MTB connectors can be supplied in lengths up to 4.07 inches (103,37 mm) with a maximum of 81 contacts on .050" (1,27 mm) centers. Length of connectors can be calculated as follows:

L = number of contacts times .050" (1,27 mm) plus .020" (0,51 mm)

EXAMPLE:
50 contacts (installed in each cavity):
L = (50 x .050") + .020" = 2.52" length of strip
L = (50 x 1,27 mm) + 0,51 mm = 64,01 mm length of strip

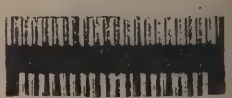
POLARIZATION



Modification code "-01" in the part number refer to guide posts located on both ends of the socket side of the 50-MIL STRIP connector and blank cavities on the pin side to accept the guide posts.

Although in many cases it is not necessary to polarize 50-MIL STRIP connectors, there are several ways to prevent cross plugging. One method is the use of guide posts that can be located in specified cavities to assure that the contacts will align when these posts are positioned before mating.

Section II: The CENTI Line

Cannon CENTI connectors are especially suitable for commercial applications such as computers, instrumentation, model airplane R/C equipment, calculators, communications and audio equipment. They are available in subminiature size metal shell rectangular, plastic shell rectangular and strip configurations.

All CENTI connectors use the same reliable Twist Pin Contact design as our MICRO connectors, but in a slightly larger 5 amp version terminated on .075" (1.91 mm) and .100" (2.54 mm) centers. This larger contact is crimp removable, so CENTI Series connectors are available in connector kits and as bulk parts for customer assembly. Standard crimp and assembly tools are available.

As in our MICRO Series, the Twist Pin Contact is recessed within the insulator housing while the rugged cylindrical socket is exposed. When the connector halves are mated, the chamfered sockets guide the pins into positive alignment.

The CENTIPIN contact, now under compression, forms a multi-point contact with the CENTISOCKET to provide fail-safe reliability over thousands of mating and unmating cycles.

STANDARD DATA

Contact rating—5 amps max.
Minimum contact centers—0.075"(1.91 mm).
Wire sizes—#22 thru #26 AWG, stranded or solid.
Contact termination—multiple indent crimp.

- Contact retention—crimp snap-in/removable.
- Contact materials and finish—Copper alloy, gold-plated per MIL-G-45204, Type II, Class 0.
- Mating/unmating force—10 oz. per contact, max.

PERFORMANCE DATA

The table below summarizes the results of key tests performed in accordance with MIL-STD-202, where applicable. Data is applicable to standard connectors with standard terminations. Variations may affect this data, so please consult the factory for further information on your requirements.

INTRODUCTION

The Double Density D is a rectangular connector in the popular D Subminiature shell configuration featuring double the contact density in the same insert area. The Double Density D connector can thus accommodate up to 100 contacts instead of 50.

This double contact density is achieved by using field-proven, highly reliable centipin/centisocket contacts on .075" (1,91) mm) centers, in the positive contact alignment design. In this design contact positions are reversed; the flexible centipin contacts are recessed in the insulator and the more rugged centisocket contacts are exposed. This reversal of positions, and the chamfered-entry of the sockets, assures positive mating even under severe misalignment conditions. The contacts are retained in the monobloc insulator by a resilient internal shoulder that snaps into a locking groove in the contact. The chamfered front of the contact will not damage the internal shoulder in the insulator. Contacts are crimp removable type.

The Double Density D connector is available in the five popular shell and insert sizes accommodating up to 100 contacts. While these connectors do not intermate with standard D Subminiature connectors, they do share a wide range of accessories that can be used interchangeably, including junction shells, potting cups, switching shells, guide pin plates, and dust caps.

DOUBLE DENSITY D/CENTI-LOC® CONNECTORS ASSEMBLY INSTRUCTIONS

The Double Density D and CENTI-LOC Connectors are highly reliable and simple connectors to use. There are a few helpful suggestions that will assure complete satisfaction when followed:

1. The instructions found under the section marked ASSEMBLY should be followed.

2. The proper crimp tool and locator (if required) must be used. These tools have been designed for use with this product. Substitutions of crimping equipment may result in connector failure at the assembly operation.

3. After crimping a contact to a lead the selection of insertion tools is shown in the section marked TOOLING. It is of vital importance that the proper tool be used to assure seating the contact in the insulator in the proper position. Any substitution of insertion tools may result in over or under insertion of the contact which will damage the retention system of the insulator.

4. The female (socket) side of the connector has been designed with a controlled float to allow for ease of mating. To avoid reducing this float or causing a splaying of the contacts, any unnecessary strain by clamping too close to the rear of the connector should be avoided.

Recommended tooling together with proper assembly techniques with the knowledge and care required by a microminiature unit will pay dividends in reliability and reduced costs.

NTRODUCTION

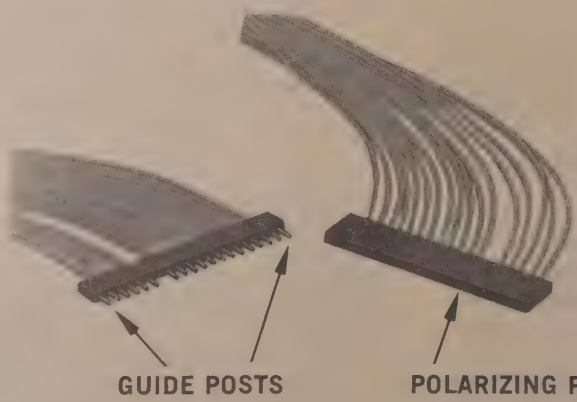
ENTILOC® connectors are low-cost nylon strip connectors de-igned for commercial applications such as computers, instru-ients, communications, audio equipment, calculators, model quipment and prototype development. They are available in yardage" from up to a 6" (152,40 mm) maximum length, ccommodating from 1 to 60 rear insertion, front release, crimp nap-in size 22 CENTIPIN/CENTISOCKET contacts. These con-acts are utilized in the proven positive contact alignment de-ign, giving additional contact strength and positive contact lignment during mating.

These connectors can be ordered in kit or bulk form. The kit omprises all the parts necessary to assemble one complete " (152,40 mm) strip connector with 60 contacts on .100" 2,54 mm) centers or a 4" (101,60 mm) strip with 53 contacts n .075" (1,91 mm) centers. If more than one connector is re-uired, the parts can be ordered in bulk and assembled as esired.

For further technical and applications information, contact our nearest ITT Cannon Electric field office or call our Micro-iniature Products Group at our 24-hour toll-free number: 800-54-3573; in California, 800-432-7063.

ORDERING INFORMATION FOR STRIP CONNECTORS

The CENTI-LOC strip connector can be ordered n kit or bulk form. The kit includes mating nsulators with a full compliment of contacts ınd two guide posts. If more than one con-ıector is required, the parts can be ordered in ıulk and assembled as desired.



KIT FORM

its include mating insulators with full complement of ontacts and two guide posts.

Part Number	Contact Center Spacing
CTA3-KIT	.075 (1,91)
CTA4-KIT	.100 (25,40)
CTA3-CTA4-KIT	.075 (1,91) & .100 (2,54)

The guide posts and polarizing posts are inserted in the same manner as the contacts. The guide posts are inserted into the socket insulator, and the polarizing posts are inserted into the pin insulator. The corresponding contact in the mating insulator must be removed for each.

2D/CTA CONTACT DATA

CONTACT PART NUMBERS

The contacts are retained in the monobloc insulator by means of a resilient internal shoulder that allows contact to snap into a locking groove.

The front of the contact is chamfered so that the internal shoulder in the insulator is not damaged as the contact is pushed thru.

NOTE: Plating except as noted is 30 pin gold.

*Consult factory for any tail size or plating requirements.

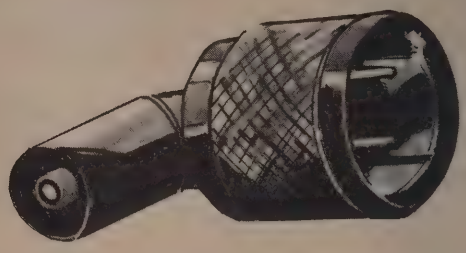
CONNECTOR SELECTION GUIDE



This guide lists additional catalog information (for products now shown in this directory) available from ITT Cannon.

It is designed to help you select the proper connector series and the appropriate catalog from which to specify your requirements. Determine your basic application: Rectangular, Rack/Panel, Circular, Printed Circuit/Input-Output, Filters, or Special Application connectors.

Go to the appropriate heading in the chart. Below each heading are several blocks listing the various connector series. Check these requirements with the data on the right side of each block. Write ITT Cannon electric, 666 E. Dyer Road, Santa Ana, California 92702, or telephone (714) 557-4700 for the proper catalog, detailed product data, and ordering information, or consult your nearest ITT Cannon sales office. Should you need immediate information dial our direct, no charge, 24 hour "Hot Line" number: 800/854-3573 (in California: 800/432-7063).

QUANTITY PRICE DISCOUNT SCHEDULE

For the convenience of our many industrial customers who purchase Pomona products in quantities, we offer a simplified ordering procedure.

You will find a code letter printed next to the single-item net price of every model listed in the general catalog. This code refers to the particular quantity discount price schedule that applies to each individual item.

To find the quantity discount price for a specific model, simply note the net price, and quantity discount schedule code letter listed for the item in the catalog. Then, referring to the industrial price list, locate the net price in the left-hand column, and the code letter in one of the right-hand columns. This will give you the quantity discount price for that particular item.

SMA ADAPTERS

POMONA ELECTRONICS

These SMA adapters are manufactured in accordance with MIL-C-39012. The 50 ohm miniature series R.F. connectors are especially adaptable to microwave component applications such as couplers, dividers and mixers.

MATERIAL:

- Bodies and coupling nut: Beryllium copper per QQ-C-530, cond. H.T., gold plated.
- Female contact: Beryllium copper, gold plated, cond. H.T.
- Male contact: Brass per QQ-B-626, alloy #360, hard, gold plated.
- Teflon insulation.
- Gaskets: Silicone rubber per ZZ-R-765a, Class II, Grade 50.

SPECIFICATIONS:

- Nominal impedance: 50 ohms.
- Frequency range: 0-12.4 GHz.
- Dielectric withstanding voltage: 1000 VRMS, 60 Hz at sea level.
- R.F. leakage: 90 db min. between 6-8 GHz.
- Temperature range: −65°C to +165°C.

COMPONENT MOUNTING ISOLATION PLUGS

POMONA ELECTRONICS

SPLIT-TERMINAL ISOLATION PLUGS

Create passive and active networks, voltage dividers, isolation networks or attenuators with the split-terminal isolation plugs described below.

Gold flashed solder turret terminals provide permanent, reliable noise-free connections for component mounting.

Tough thermoplastic material molded to plug body and connectors insures maximum strength, moisture resistance and excellent insulative properties.

Specifications for MDP-X, 1390, 1837, 1468:

- Fits standard 4.22mm (.166) dia. banana jack.
- Spring, heat treated beryllium copper berylco 25 per QQ-C-533.
- Plug body, brass per QQ-B-626, alloy #360.
- Nickel plated per QQ-N-290, class 2.
- Contact resistance less than 0.001 Ohms per banana plug.

SERIES PARALLEL ISOLATION PLUGS & CONNECTOR TEST ADAPTERS

POMONA ELECTRONICS

SERIES PARALLEL ISOLATION PLUGS

These plugs enable you to build unlimited combinations of series parallel networks e.g., voltage dividers attenuator, etc.

Upper crossholes spaced ¾" on centers from lower crossholes to allow connection of double banana plugs. Double banana plugs may be plugged in from both sides.

FEATURES:

- Fits 4.22mm (.166) dia. banana jacks.
- Spring, heat treated beryllium copper berylco 25 per QQ-C-533.

CONNECTOR TEST ADAPTERS

An ideal test adapter for the rapid testing of the hard to get at contacts of multi-pin MS type connectors such as miniature circular, standard circular and rack and panel. Excellent for testing of continuity, voltage and signal on individual contacts. Test adapter available in pin and socket contact sizes 20, 16 and 12.

- Gold flashed contacts conform to "MS" dimensions.
- Flexible tip prevents damage to connector contacts if test adapter is accidentally bent.
- Flexible tip allows testing of adjacent contacts.
- Fully insulated to prevent accidental shorting.
- Accepts standard banana plug.

INSULATED BINDING POSTS

POMONA ELECTRONICS

INSULATED LEXAN* POLYCARBONATE BINDING POSTS

These binding posts fill the needs of most critical requirements. The plastic molding on these units is Lexan* polycarbonate which has high impact strength, low loss, low power factor and high insulation resistance. Thin line design for high-density packaging.

FEATURES:

- Polycarbonate insulation.
- Thin line design.
- Standard and low thermal EMF types available.
- Lower insulator, white.
- 5 way binding post.
- Accepts standard banana plug.
- Captive thumb nut.
- Gold or nickel plated.
- Upper insulator same color as thumb nut.
- 2.54mm (.100) dia. wire cross hole is perpendicular with flat on insulator.
- 8-32 hex nut and lockwasher included.
- Mounts in panels 1/16-1/4" thick.

RATINGS:

- Operating temperature: −65°C to +150°C.
- Working voltage: 1500 VDC.
- Current: 15 amps cont., 30 amps int.

STANDARD TYPE

Brass body and thumb nut insert, available gold flashed per MIL-G-45204 or nickel plated per QQ-N-290 class 2.

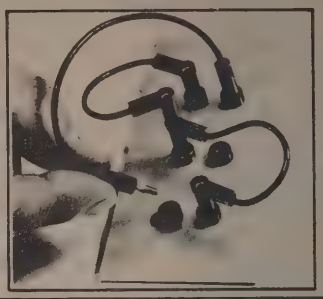
MINIATURE BANANA PLUG PATCH CORDS

POMONA ELECTRONICS

Miniature patch cords for use with 2.64mm (.104) dia. miniature banana jacks. Excellent for miniaturization of test equipment and high density packaging for patch systems.

Banana plug springs precision formed of one piece beryllium copper, heat treated for maximum life and low contact resistance. Tough thermoplastic molded to plug body and wire.



FEATURES:

- Fits 2.64mm (.104) dia. miniature banana jacks. Plug body brass, per QQ-B-626, alloy #360.
- Gold flashed per MIL-G-45204 Type II (.00001/.00002). Spring, one piece heat treated beryllium copper, berylco 25 per QQ-C-533.

SPECIFICATIONS:

- Wire: 20 awg, strand. 41 x 36 T.C. extra flexible polyvinyl insulation 2,21mm (.087") O.D.
- Rated: 5 amps cont., 10 amps int., 5000 VDC • Operating temperature: −0°C to +105°C.

"DIP CLIP"™ IC TEST CLIP

POMONA ELECTRONICS

The "Dip Clip" is engineered for the attachment of test probes to I.C. Packages. The clip has many built in features that permits hand-free testing and still maintains a good electrical connection. Several test probes can be used at one time.

The "Dip Clips" with reduced thickness are used for testing ultra dense packaged chips that have only 2,54mm, (.100") spacing between each other. Models: 4236, 4324 and 4340.

FEATURES

- Solid non-tarnish nickel silver contacts.
- Serrated 1.02mm (.040) wide contacts on lower end for good electrical connection. Will assist in removal of foreign material from DIP.
- 0.63mm, (.025") square serrated test points on upper end will accept wire wraps or mini test clips.
- Molded barrier between each contact allows connections to be made on live boards without accidental shorting of adjacent contacts.
- Can be used as an insertion and removal tool for DIPS.
- Glass-filled nylon, withstands 240°C at 40% R.H.

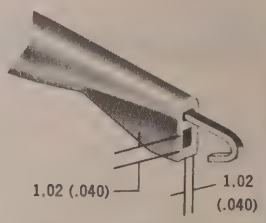
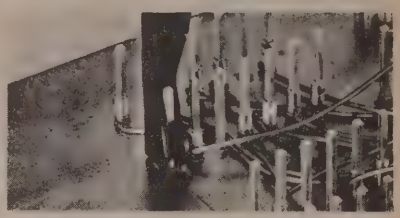
DO IT YOURSELF GRABBER

POMONA ELECTRONICS

FEATURES:

- Plunger type action between thumb and two fingers.
- Comfortable finger grip operation.
- Positive connection that won't pop off.
- No sharp teeth to damage or nick wires.
- Simplified assembly procedure.
- High temperature material that resists melting when soldering.





MATERIALS:

- Molded glass-filled nylon, withstands 240°C at 40% R.H.
- Beryllium copper contact per QQ-C-533, Berylco 25 .
- Gold plated per MIL-G-45204 Type I.
- Stainless steel spring.

SIMPLIFIED ASSEMBLY PROCEDURE

1. Pull off thumb cap to expose contact connection.
2. Thread wire through thumb cap and strip ⅛".
3. Insert stripped end through tapered hole on contact, and solder.
   NOTE: Stripped end should be placed into the large opening of the tapered hole.
4. Slide thumb cap back onto contact.

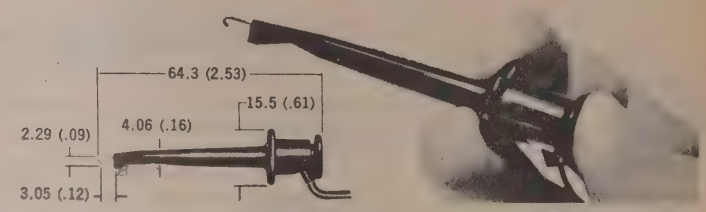
MINI TEST CLIP GRABBER

POMONA ELECTRONICS

These plunger type action clips are called "grabbers." The gold plated contact hook can be connected rapidly to component leads and the specially designed tip slides down over 0.63mm (.025") square Wire-Wrap† pins. Nylon insulation molded directly onto clip and wire providing a strong, reliable integral unit. Clip is completely insulated to point of connection.



FEATURES:

- Plunger type action between thumb and two fingers.
- Comfortable finger grip operation.
- Positive connection that won't pop off.
- No sharp teeth to damage or nick wires.
- Beryllium copper conductor berylco 25 per QQ-C-533; gold plated per MIL-G-45204 Type I.
- Stainless steel spring.
- Molded glass-filled nylon. Nylon insulation molded directly onto clip and wire.

WIRE: 20 AWG, stranded 41 x 38 T.C. Extra flexible polyvinyl insulation 2.21mm (.087) O.D.

OPERATING TEMPERATURE: —25°C to +105°C.

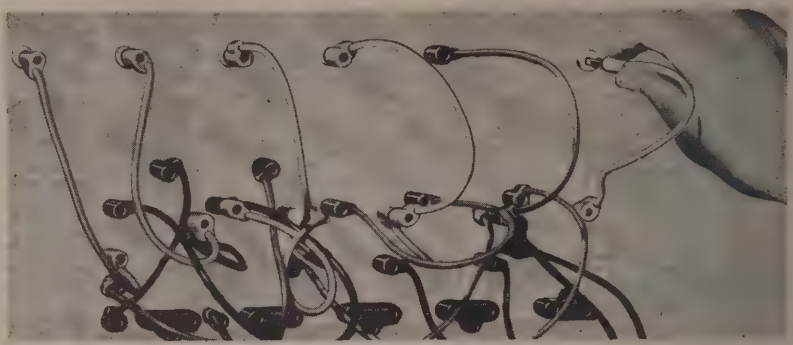
POMONA BANANA PLUG PATCH CORDS

Tough thermoplastic insulation molds the plug and leads into a strong moisture resistant integral unit. Excellent for computer board and test equipment applications.

Used by leading industries in applications where extreme reliability is of prime importance.



FEATURES:

- One piece beryllium copper heat treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- Extra flexible polyvinyl insulation used on all leads.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohm per banana plug.
- Operating temperature: −0°C to +105°C.
- Wire, 18 AWG, stranding 65 x 36 T.C.
- Insulation, polyvinyl 3.66mm (.144″) O.D.
- Ratings: 15 amps cont., 30 amps int. 10,000 W VDC.

SPECIFICATIONS:

- Fits standard 4.22mm (.166) dia. banana jacks.
- Spring, beryllium copper Berylco 25 per QQ-C-533.
- Plug body, brass per QQ-B-626, alloy #360.

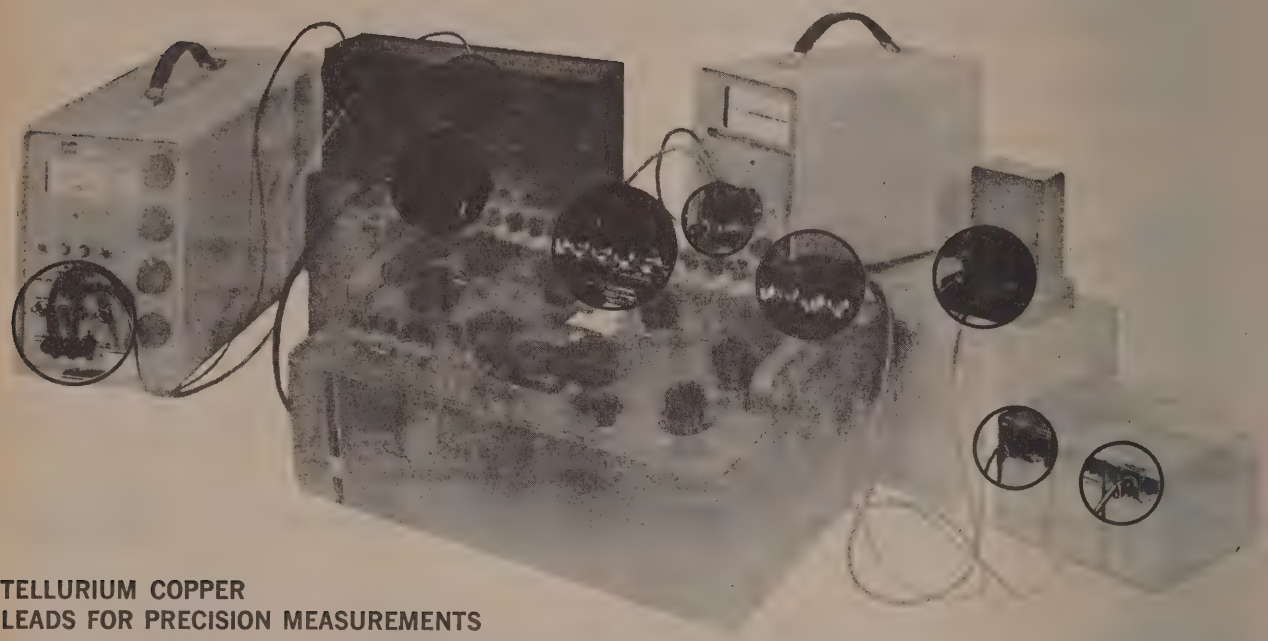
LOW TERMINAL E.M.F. SPADE LUG JUMPERS

POMONA ELECTRONICS



TELLURIUM COPPER LEADS FOR PRECISION MEASUREMENTS

Pomona Electronics has advanced the state of the art in measurements where Thermoelectric Effects are significant sources of error. Comparators designed for use with the Kelvin-Varley voltage divider and microvolt leads were tested with Primary Standards Laboratory equipment.

Thermoelectric voltages were not detected until the most sensitive galvanometer range was used.

Thermoelectric properties — Tellurium copper gold plated spade lugs cold-staked to multi-stranded 12 gauge copper wire minimize thermoelectric effects — an absolute necessity for low voltage, high precision measurements.

Low resistance — 12 gauge multi-stranded copper wire results in extremely low cable resistance. Spade lugs plated with 15 micro inches gold for minimum contact resistance and minimum thermal EMF when using copper binding posts (less than 0.01 μV/°C).

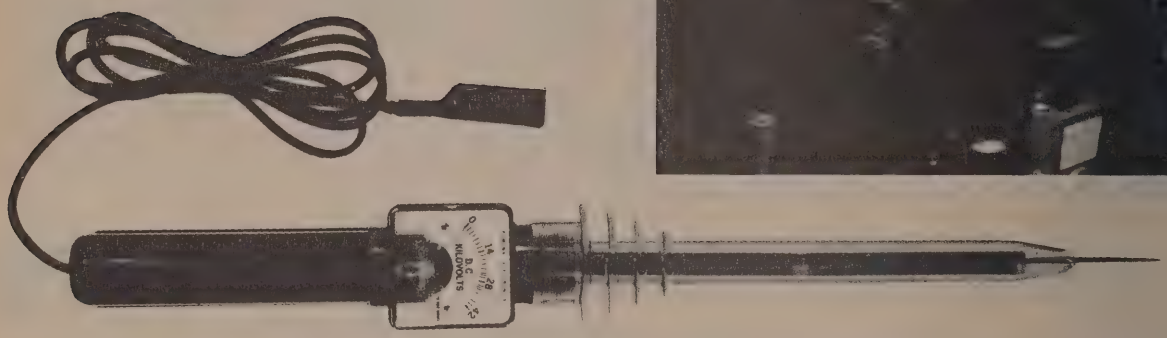
HIGH VOLTAGE TEST PROBES

POMONA ELECTRONICS

Pomona Electronics developed and introduced the first high voltage test probe with built-in meter in 1967. Now we offer five D.C. high voltage probes and one A.C. high voltage probe.



TEST VOLTAGES UP TO 42 KV ON COLOR & BLACK & WHITE TELEVISION SETS — USING THIS ONE SELF-CONTAINED INSTRUMENT

The Model 4242 is for testing existing television sets (color or black & white), plus new and future models with voltages up to 42 KV.

It is easy to make high voltage adjustments in the home without carrying bulk equipment. Ground the probe to TV chassis with alligator clip, contact test probe top to high voltage anode, read voltage indicated on built-in meter, and make adjustments as required. On-off switch in handle protects meter when not in use.

SPECIFICATIONS:

- **RANGE:** 42,000 VDC.
- **SENSITIVITY:** 20,000 ohms/volt.
- **METER MOVEMENT:** 50 μa.
- **ACCURACY:** ±2% full scale.
- **MULTIPLIER RESISTANCE:** 840 megohm ±2%

VOLTAGES UP TO 15 KV — DESIGNED TO TROUBLESHOOT ELECTRONIC AIR CLEANER SYSTEM MALFUNCTIONS

The Model 3157 High Voltage Test Probe is designed to speed and simplify the servicing of electronic air cleaner systems. It replaces heavy, bulky old fashiond voltmeters with a modern, compact hand-held instrument which a serviceman can carry in his tool case. He can use it to check for ionizer screen continuity, line opens, transformer failure, or other component malfunctions in less than a minute. Extended probe tip gets into those hard-to-reach places with ease. Unit is priced so low that every serviceman can carry his own probe.

This passive probe incorporates a three-position slide switch in the head and has a cable length of 1.5 metres (4.92 ft.). The specification is as follows:

Position x 1

Bandwidth:	D.C. to 10MHz
Input Resistance:	1MΩ (oscilloscope input)
Input Capacity:	40pF. Plus oscilloscope capacity
Working Voltage:	600 Volts D.C. (including Peak A.C.)
Cable Length:	1.5 meters (4.92 ft.)

Position Ref.
Probe top grounded via 9MΩ resistor, oscilloscope input grounded

Position x 10

Bandwidth:	D.C. to 100 MHz
Risetime:	3.5 nanoseconds
Input Resistance:	10MΩ when used with oscilloscopes which have 1MΩ input. (Probe resistance 9MΩ ±1%)
Input Capacity:	11.5pF when used with oscilloscopes which have a 30pF input capacity For other values see graph.
Compensation Range:	10-60pF

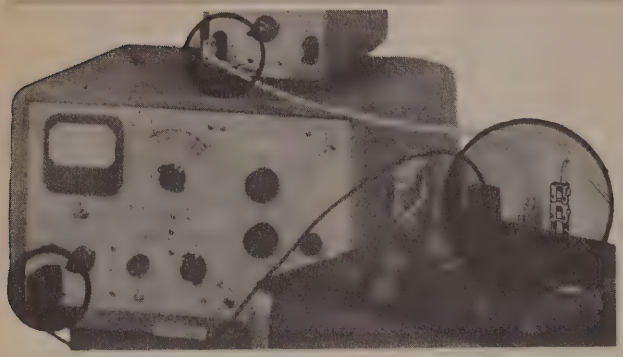
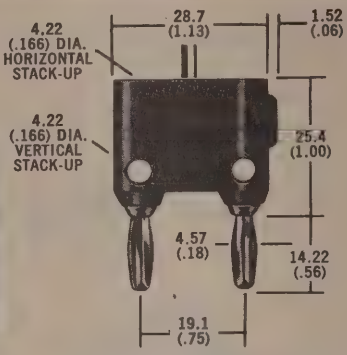
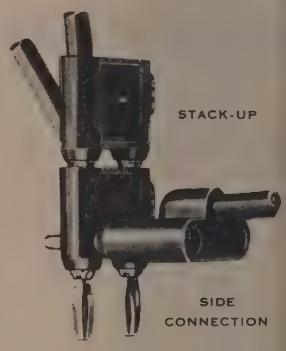
¾" DOUBLE BANANA PLUG PATCH CORDS

POMONA ELECTRONICS







These patch cords are indispensable for bridge transformer connections, three terminal capacitor measurements and general hook-up for two wire systems. They are horizontally and vertically stackable in parallel. Tough thermoplastic material molded to plug body and cable insures maximum strength, moisture resistance and excellent insulative properties. Used by leading industries in applications where extreme reliability is of prime importance.

FEATURES:

- One piece beryllium copper heat treated spring for long life.
- Rounded spring design results in maximum contact area.
- GND., clearly molded on plug body and shell.
- Solder-bonded noise-free connections.

SPECIFICATIONS:

- Fits standard 4.22mm (.166) dia. banana jacks, on ¾" centers.
- Contact resistance less than 0.001 ohms per plug.
- Spring beryllium copper Brylco 25 per QQ-C-533.
- Plug body brass per QQ-B-626, alloy #360
- Nickel plated per QQ-N-290, Class 2.

POMONA ELECTRONICS

STRESS RELIEVED AND WEATHERPROOFED CRIMP BNC CABLE ASSEMBLIES

These new cable assemblies feature PVC collars which are molded directly onto cable jacket and connector body. The resulting encapsulation offers two outstanding advantages, stress protection against failure from excess bending, flexing, and twisting. Weatherproof seal between cable and connector. Connectors have non-tarnish finish and conform to MIL-C-39012.

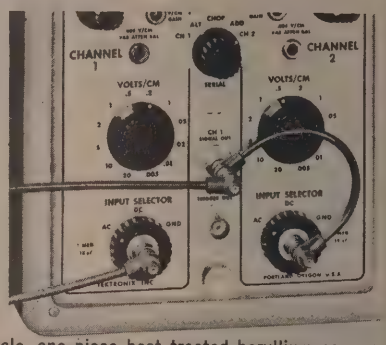
"PUSH ON" STACKING BNC PATCH CORDS

These multiple stacking patch cords connect the center conductors of BNC jacks having a common chassis. Excellent for use with instruments such as oscilloscopes. Stacking feature enables a multiple number of connections to the same point.



FEATURES:

- **CONTACT:** Male and female, one piece heat treated beryllium copper, gold flashed.
- **WIRE:** 18 AWG, stranded 65 x 36 T.C., polyvinyl insulation.
- **INSULATION:** Tough thermoplastic, polypropylene, molded around contact and wire.
- **OPERATING TEMPERATURE:** −25°C to +125°C.

TUBE TEST SOCKET ADAPTERS & HOLDER

POMONA ELECTRONICS

Pomona test socket tube adapters are ideal for making measurements of voltage, resistance, audio and video without tracing complicated circuits from the bottom of the chassis. They feature: Extended test tabs for easy use with either alligator clips or test prods; low loss mica-filled molded phenolic construction per MIL-M-14, MFE. Power factor less than 0.010 at 10 MHz; high insulation resistance, the I.R. exceeds 500,000 megohms at 40% R.H., at 24°C; distributed capacity, inter-element approximately 1 pico farad; high voltage operation, voltage breakdown elements exceeds 1,700 VAC or DC. Models TVS-12 and 1779 molded of electrical grade black phenolic.

BREADBOARD SOCKETS—RELAY SOCKETS & SOCKETS SAVERS® ADAPTERS

POMONA ELECTRONICS

SURFACE MOUNTED BREADBOARD SOCKETS

Surface mounted breadboard sockets are ideal for experimental circuit design, portable and enclosed units, plug-in and packaged assemblies. They feature: An insulated base to prevent connections from shorting to chassis; elimination of double chassis design; circuits may be wired in an enclosed unit; base connections are numbered for easy identification; grade-A phosphor bronze spring contacts; standard center to center mounting holes. For ease of installation the 7 and 9 pin miniatures may be mounted either in the center or on the sides, the 8 pin octal is mounted on the sides; small mounting holes permits the re-use of experimental chassis.

TEST SOCKETS

POMONA ELECTRONICS

■ POMONA Test Socket Adaptors are ideal for making measurements of voltage, resistance, and video from the base of the picture tube. The test socket adapter is inserted between the CR Tube base and its socket. This completes the circuit and makes all connections readily accessible. Measurements can be made without tracing circuit wiring to test points below the chassis, thereby saving valuable time and increasing efficiency in trouble shooting.

Connectors

COAXIAL CONNECTORS

The JCM is a miniature (3mm) connector that is fully compatible with SMA types, at a fraction of SMA prices.

The JCM is designed for commercial and industrial applications where low cost is a major factor, and SMA compatibility is required.

The non-galling gold finish is resistant to wear and abrasion.

Cable clamp JCM plugs and jacks consist of 5 or fewer parts which are easily assembled. Only one set of stripping dimensions is required for all cables from 0.075 to 0.216" overall diameter. Panel, bulkhead, and PC mounting receptacles are preassembled.

Beryllium copper center contacts assure superior spring qualities and lowest contact resistance.

Available on special order basis with nickel plating for especially cost conscious applications.

PLUG IN HOUSINGS

Enhance the appearance and give that professional look to your products using these molded housings. Ideally suited for packaging relays, logic packages, networks and miniature circuitry. Durable, lightweight covers that will withstand vibrations and rough usage.

HEADERS: Molded of GP black phenolic and fit standard sockets. Pins are brass. Nickel plated guide hole tapped 8-32 for terminal board mounting stud.

- **Variety of molded materials**
- **Good chemical resistance**

MATERIAL CHARACTERISTICS:

Polystyrene: For general purpose use where high impact strength is not required and temperature would not exceed 170°F.

Butyrate: 3 times the impact strength of Polystyrene and excellent electrical properties, use wherever temperatures of 210°F exist.

Nylon: Impact strength slightly less than Butyrate but recommended for use where temperatures are as high as 300°F.

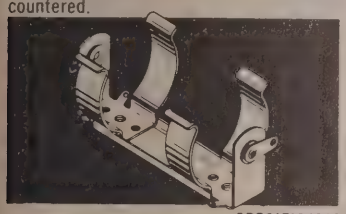
KEYSTONE ALL STEEL BATTERY HOLDERS

STANDARDIZED ALL STEEL BATTERY HOLDERS

An important advance in design that has gained wide acceptance for military and commercial usage. Battery when installed is held under spring tension at a constant pressure assuring low resistance contact will hold up to 4 cells in series in sturdy insulating tube. Retainer clips available to lock battery securely. This prevents shifting or loosening of battery in holder. Recommended for use where shock or severe vibration is encountered.



- CORROSION RESISTANT NICKEL PLATED
- STAINLESS STEEL CONTACTS
- MOISTURE PROOF INSULATING WASHERS
- IDEAL FOR NI-CAD AND ALKALINE CELLS

SPECIFICATIONS

Made of SAE 1065 Carbon Steel to MIL Spec. 17919, heat treated to spring temper and nickel plated .0002 thick. Contact assembly consists of a stainless steel eyelet, moisture proof vulcoid washers and a coated copper solder lug. Ribbed carbon steel base for added support is nickel plated and has 2 mounting holes for ease in mounting.

POLARITY LABELS

Cat. No. 58

- PRESSURE SENSITIVE
- WILL ADHERE TO ANY SURFACE
- NO GLUE OR DAMPING REQUIRED
- ECONOMICAL

Wherever circuit polarity is to be shown labels are colored Blue and Red.

A standard line of battery holders available for immediate shipment from stock. Low cost, lightweight and sturdily constructed of quality materials. Good electrical contact, low leakage current and snap-fit clips are the outstanding features.

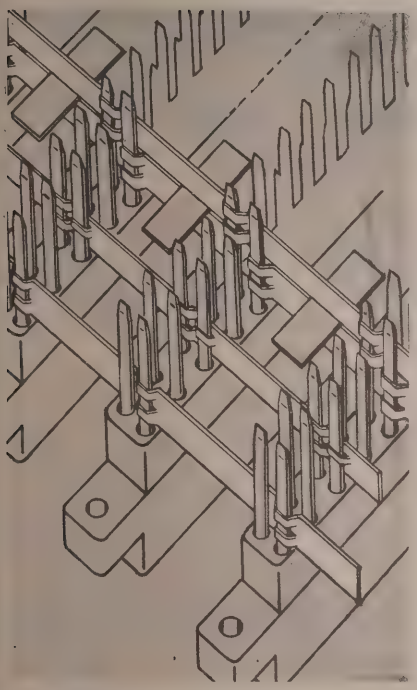
LSI Pin Bar® means:



- Thousands of "hi-rel" solderless bussing connections per hour at a fraction the cost of your present busing method.
- Fast, simple, "foolproof" connections that lower production costs — eliminate continuity checks.
- Low uniform contact resistance that will electrically enhance any circuit—especially frequency applications.
- Efficient back panel design (greater pin exposure, increased discrete wiring area and easier checkout).
- A "spec" performance electrical component produced to your exact requirements.

solderless bus bar for common connections

SPECIFICATIONS

Terminal Spacing and Length: Selectable.

Spacing Tolerance: ±0.010" between terminals — ±0.020/foot cumulative.

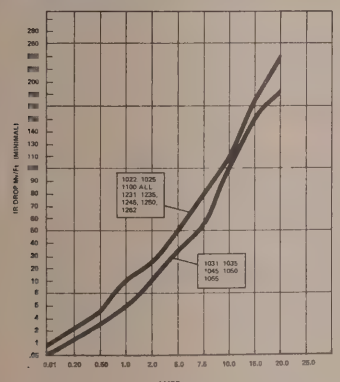
Material: 1000, 1200 Series: Beryllium Copper Alloy #172 per QQ-C-533.
1100 Series: Beryllium Copper Alloy #175 per QQ-C-533.

Standard Finishes:
Tin: Electro-tin plate, fused, per MIL-T-10727, Type I, 0.0003" thickness.
Gold: Gold plate per MIL-G-45204, Type II, 0.000050" minimum thickness over nickel plate per QQ-N290, 0.000050" minimum thickness.

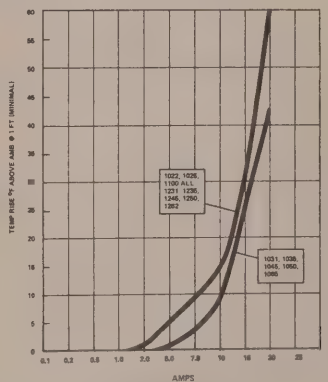
Options: Insulation, special finishes, unique end configurations.

Insertion: Manual or semi-automatic insertion equipment available.

PERFORMANCE DATA



IR DROP



TEMPERATURE RISE

The following performance data meets or exceeds MIL-STD-202 "D" (Full Report Available).

Thermal Shock: Method 107, Condition A.

Mechanical Shock: Method 213, Condition H.

Vibration: Method 201.

Corrosion Resistance: Method 101, Condition B 48 Hour Exposure Salt Spray.

Contact Voltage Drop: 0.533 millivolts maximum per amp.

Gas Tight Contact: 10 minutes of 1:1 hydrochloric/nitric acid followed by 10 minutes of ammonium sulfide fumes.

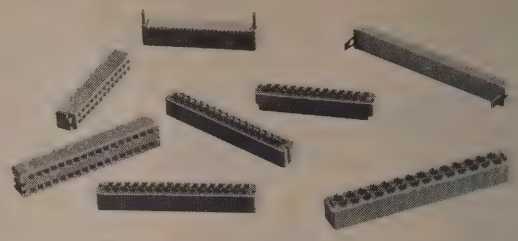
Scotchflex® BRAND SOCKET CONNECTORS



INTRODUCTION

"Scotchflex" Brand socket connectors are available in all of the sizes and center spacings required to fit standard wrap panels, including most custom configurations. Where quick disconnect/reconnect capability is required, "Scotchflex" socket connectors may be used in conjunction with mating "Scotchflex" headers. Optional strain reliefs are available for the entire line of socket connectors should design needs require them.

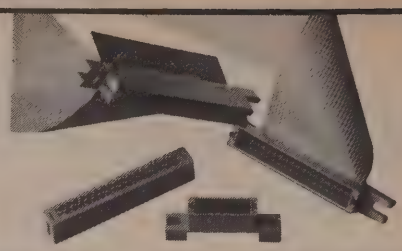
Scotchflex® BRAND PLUG CONNECTORS



Featuring .025" (0.64 mm) square pins, this new family of connectors provides plug compatibility to SCOTCHFLEX socket connectors. Increased versatility is achieved since the connector is offered in two different configurations. For rack and panel type applications, the connector is designed with mounting flanges. When mid-spanning the plug connector is available without mounting flanges.

Design applications for the SCTOCHFLEX plug connector include use as a T-tap from a cable buss; a splice connector, or as an I/O interface.

Scotchflex® BRAND P.C.B. CONNECTORS

INTRODUCTION

Flat cable may be terminated at the circuit card by hand or flow solderable SCOTCHFLEX connectors. The contacts which are positioned in the connector body are soldered to the board as a unit. The flat cable terminates in the connector to the "U" form end of the contacts. As with other SCOTCHFLEX connectors, no stripping or soldering of conductors is required. SCOTCHFLEX P.C.B. Connectors come in a variety of configurations to mate with SCOTCHFLEX flat cable.

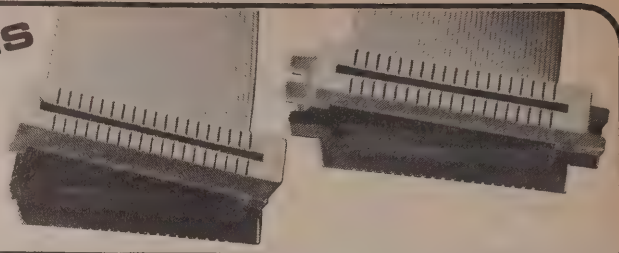
Scotchflex® BRAND CARD-EDGE CONNECTORS



Dual-readout "Scotchflex" Card-Edge Connectors let you make up to 50 terminations in a single step. All styles are offered with or without mounting ears; both versions have bifurcated, gold-plated beryllium copper contacts insuring dependable electrical interface through repeated insertions and withdrawals. Insulation-piercing "U" contacts are on .050" (1.27mm) centers, staggered to accept .100" (2.54mm) spacing on card-edge.

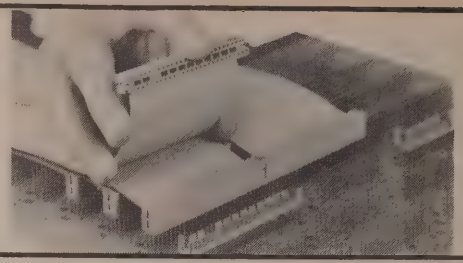
Scotchflex® BRAND SOCKET CONNECTOR AND KEYING HEADER SYSTEM



Unique polarizing, keying and backplane interconnection capabilities have been added to the Scotchflex Cable/Connector line with the introduction of a new mass terminating Socket Connector and Keying Header.

The 50 position Socket Connector will directly interface with .025" square backplane wrap pins. This Connector mates with 50 conductor Scotchflex Brand Flat Cables in 26 AWG or 30 AWG solid conductor and 28 AWG solid or stranded conductor versions.

Polarizing is accomplished with the Keying Header which is placed directly over 54, .025" square pins.

Its design includes posts on opposite corners for alignment of the header over the wrap pins. These posts also serve as a depth guide for .237" engagement, eliminating the need to cut pins, and allowing for two layers of wrap below the header.

Rectangular keying posts in the center of the header break away to allow positive keying of the Socket Connector. A polarizing key is inserted into the keying holes on the Connector for mistakeproof polarization.

A wire form strain relief handle is available which minimizes stress to the contact/conductor interconnection and provides an area for identification.

All Connector housings and polarizing keys are constructed of glass-reinforced thermoplastic with a flammability rating of 94 V-0.

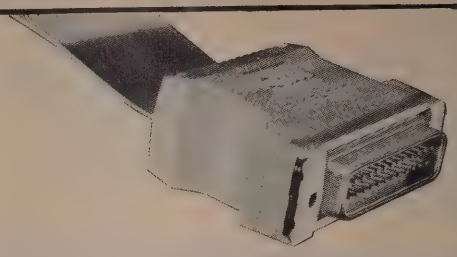
Scotchflex® BRAND DELTA CONNECTOR SYSTEM



Here is the first system in the industry to permit mass connection of "D" subminiature connectors without the time-consuming stripping, soldering, crimping and individual positioning of discrete wires required by other systems. The "Scotchflex" Delta Connector System offers simultaneous stripping and terminating using the proven "U" contact principle pioneered by 3M. To provide instant interfacing of equipment having two different center spacings, the "Scotchflex" Delta System offers cables with unique variable patterns of center spacing (see page 00). The "Scotchflex" Delta System provides unequaled versatility, since its connectors are cable-compatible with all other "Scotchflex" connectors (Socket, P.C.B., D.I.P., Plug and Card-Edge) and also mate with all other "D" subminiature connectors in the industry. A complete line of accessory components is available.

Scotchflex® BRAND DELTA RIBBON CONNECTOR SYSTEM

Now you can mass-terminate ribbon connectors without the expensive wire preparation and assembly costs required by other systems. The "Scotchflex" Delta Ribbon Connector System eliminates all stripping, soldering, crimping and individual positioning of discrete wires; using 3M's proven "U" contact principle you strip and terminate 50 conductors (25 pairs) simultaneously. To provide instant interfacing of equipment having two different center spacings, the "Scotchflex" Delta Ribbon System offers cables with unique variable patterns of center spacing (see page 00). Unequaled versatility is provided by the system, since all Delta Ribbon connectors are cable-compatible with other connectors in the "Scotchflex" line (Socket, P.C.B., D.I.P., Plug and Card-Edge, and also mate with all other "D" subminiature connectors in the industry. Scotchflex® BRAND FLAT CABLES

INTRODUCTION

3M Company's lightweight, low-profile flat cables are designed to mate with all standard industry connectors. They are offered in standard round conductor, ground plane, ground plane with drain wire, and color-coded versions. Being flexible, these flat cables can be bent or folded without damaging either conductors or insulation. Conductors are joined in one-piece construction with a ribbed top side for positioning in mating connectors; there is a red, black or green coding stripe along one edge of the cable to simplify orientation. Insulation is polyvinyl chloride, U.L. listed at 300 VRMS, 221°F (105°C), with an FR-1 rating. Using "Scotchflex" connectors, 3M flat cables are also suitable for bussing operations. The 3M Company's high production standards assure close center-spacing tolerances to give predictable and consistent electrical characteristics. Using the 3M flat cable and connector system, jumper assembly labor costs are appreciably reduced, since hand wiring and soldering are eliminated. For assistance with special design problems, contact your local 3M sales representative or "Scotchflex" distributor.

ROUND CONDUCTOR FLAT CABLE

The 3M Company supplies 7 standard round conductor flat cables. They come in wire sizes #30 AWG Solid, #28 AWG Stranded, #26 AWG Solid, and #24 AWG Stranded with up to 64 conductor widths. Depending on the particular cable, there are three center spacings to choose from — .050", .0625" and .075". Being zippable, breakouts can be made when more than one connector is required on an end. With this wide selection, 3M has the right cable to meet your needs.

Color-coding adds the convenience of individual wire identification to the proven advantages of the "Scotchflex" mass termination system. Similar to our familiar gray cable, these new additions to the "Scotchflex" line are fully zippable, permitting conductors to be either mass terminated or separated for multiple discrete connections. Depending on the particular cable, they are available with 28 AWG stranded and 26 AWG solid conductors on .0425", .050" or .054" centers, in cable sizes up to 64 conductors.

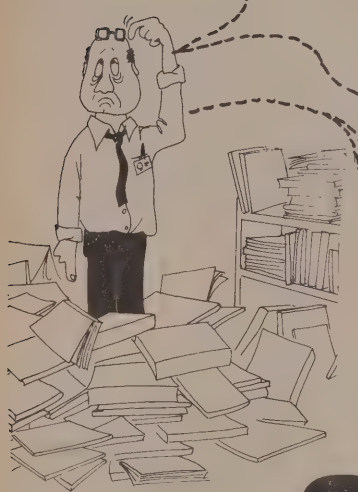
What can I use to keep all the manufacturers' product data I receive in order?

What system makes filing or retrieving manufacturers' catalogs fast and easy?



Which file system have thousands of engineers purchased because they know it works?

eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

APPLICATIONS OF REMOVABLE PLUGBOARD SYSTEMS

MAC/PANEL Plugboard Programming Systems are used whenever there is a need for frequent or fast changes in the functions performed by electrical equipment and circuits or in the interconnection of two or more machines and/or circuits. Removable Plugboards are prewired with plugwire assemblies to provide a given pattern of interconnection. Changes can be made either by changing the program wired in the removable Plugboard or by simply replacing the Plugboard in the Receiver with another pre-programmed Plugboard in a matter of seconds. **MAC/PANEL** Plugboard Programming Systems are used as large connectors with up to 5,120 contact positions on standard models. Thousands of **MAC/PANEL** systems have been installed in the United States and in over forty foreign countries since 1958.

GENERAL PRODUCT DESCRIPTION

Each system consists of a Receiver and one or more removable Plugboards. The Receiver is the frame and the engaging mechanism that accepts the removable Plugboard. Depending on the system there are from one to six molded black phenolic or blue diallyl phthalate panels in the Receiver and Plugboard frames. A molded panel will contain up to 1280 holes or contact positions. These panels are silk screened with a grid pattern that provides a unique alphanumeric address for each contact position in the system. Special customized printing in any number of colors can be provided on either the Plugboard or Receiver.

A contact spring is factory installed in each Receiver contact position. The front portion of these nickel or gold plated contact springs mates with nickel or gold plated plugwire tips inserted in the appropriate contact position of the Plugboard when the Plugboard is inserted in the Receiver. All Receivers are equipped with a mechanical interlock that assures proper mating of contact springs and plugwire tips. Each contact position can also be directly connected to the equipment from the rear of the Receiver by soldering, insertion of taper pins, or wire-wrapping. The desired method of connection must be determined prior to ordering so that the appropriate type of contact springs will be provided in the Receiver.

MAC/PANEL maintains shelf stock on over 500 types of plugwire assemblies. These include single conductor and multi-conductor unshielded and shielded plugwires as well as crimpable and wire-wrapable plugwire tips.

MAC/PANEL customer service personnel and design engineers invite your inquiries. We can promptly and economically design, build, and install a special custom system or plugwire if our standard product will not meet your requirements.

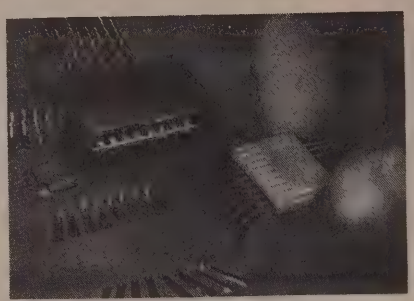
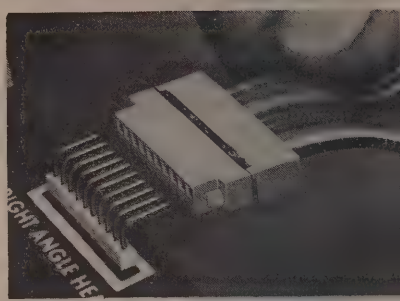
"Clam" Zero Insert Force Miniature Connectors. 1300-300 Series.

Term-Acon® .100 center clam connectors are designed to offer low insertion force gas tight connection to double or single sided .062 thick P.C. boards. Connectors snap close over P.C. board edge exerting 3-4 times normal gram loading. Permits highly reliable interface even when applied to solder plated P.C. edge. No abrasive forces during insertion or removal. Unique retaining dog actuates and releases swivel-clamp action. Contacts are brass tin plate. Housing material is Polyester 94V-O. Available in 10 circuits (single sided) or 20 circuits (double sided).



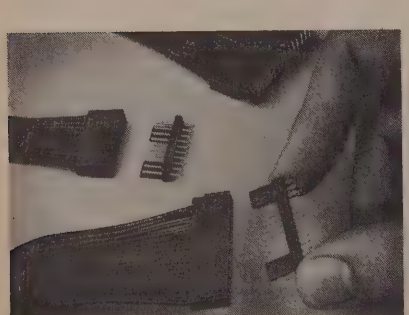
Miniature Card Edge Connector For Wire-To-Board Interconnects. 1500 Series.

Crimp type edge connector provides .100 centers wire-to-board interconnects plus in-the-field contact removal or replacement. Designed to mate with an .062 ±.007 thick single sided P.C. board. Permits independent wire harness assembly for 2-25 conductor cable. Methode 1400 Series crimp contacts used are rated at 3.5 amps. Contacts are available in either tin or gold plating. Housing material is furnished in 94V-2 material.



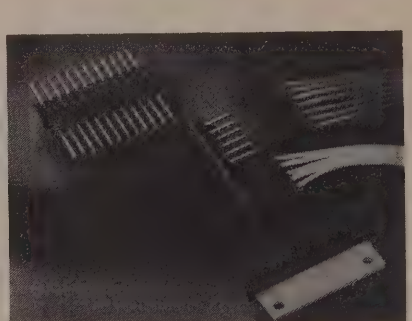
Mass Termination "Jaguar 100"® Connector for Ribbon Cable On .100 Centers 1300-200 Series.

"Jaguar 100"® connectors eliminate rejections caused by shorts to adjacent conductors, the major cause for rejects when terminating connectors on .050 centers. Cable-to-board ribbon cable can be mass terminated on .100 centers with Methode's insulation displacement connectors. Straight-on and right angle versions are available. They handle double the current rating of presently available mass termination products on .050 centers. They're designed for piercing ribbon cable or discrete wires 10-28 contact positions (22 through 30 AWG) on .100 centers. Insulation displacement tin plated brass contacts are standard. Connector housing material is Polyester 94V-O flame-retardant.



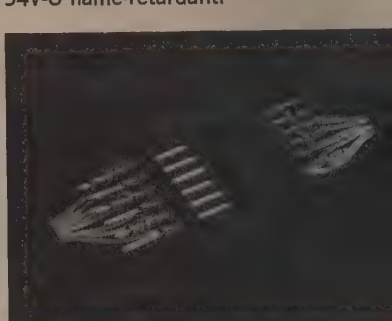
Miniature "Pol-R-Lok" Polarized Locking Connector on .100 Centers. 1100-8, -9 Series.

"Pol-R-Lok" miniature connectors offer high density positive locking and polarized interconnections for video games, calculators, T.V., CB radios, and other consumer applications. The locking polarizing header and mating crimp receptacle are available with 2-28 positions on .100 centers. Either straight or right angle .025 square pins are available on the headers. Receptacle's bellows contacts can accommodate 22-30 AWG leads. Header and receptacle bodies are made of 94V-O material. Contacts and pins are available in either tin or gold plated brass that can handle 3.5 amps at 250 VAC.



"Double-Header" Miniature Connectors New Approach to P.C. Board Interconnection Problems. 3100-14 Series.

"Double-Header" miniature Term-Acon® connectors provide new approach to interfacing different size crimp contact receptacles on P.C. board bulkheads. Available with in-line or right angle pin configurations. Screw, rivet or snap-in mounts plus stacked arrays and extended configurations up to 24 pins are also offered. The .045" square pins may be positively identified with a permanent legend on the connector body. Optional locking legs are available to assure positive connections under high impact or vibration conditions. Pins are rated at 7A, 250 VAC.



Miniature "Happy Wrapper" Connectors For Wire Wrap Applications. 3300-1 Series.

Principle feature of this connector is th ability to connect flying leads by har wire wrap terminations to both pin ar socket elements. The line disconnect d vice also offers the option of bulkhead circuit board attachment of the p header member. The connector will ma with .045 round or square pins on .15 centers. Pins will withstand 8 inc ounces of wrapping torque without d gradation. Receptacle material is Nyl 6/6 94V-2 and contacts are brass t plated.

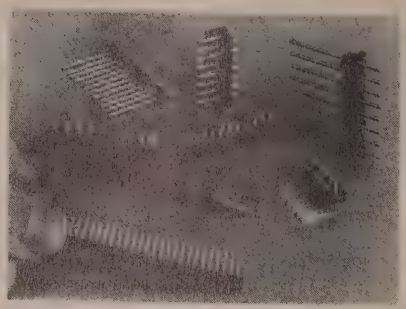
Miniature "Platform Connectors" Mount Anywhere on P.C. Board Without Card Edge Location. 3600 Series.

ow profile connectors are engineered for ast assembly production usage in con-umer electronic, communications and ndustrial control products. Contact posi-ons are on .156 centers. Minimum with-rawal force 2.5 ozs. Twin termination esign for wave soldering to circuit oard provides approximately 50% more urrent capacity. Housing material, Ny-n 6/6 94V-2. Contacts are tin plated rass. Connectors rated 7 Amps 250 AC.

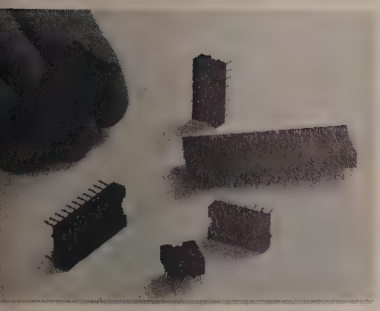


Miniature Term-Acon® Series Connectors Solve Majority of P.C. Board Interconnect Problems. 1000, 2000 & 3000 Series.

Term-Acon® Series offer a moderately priced, reliable solution to interconnect problems on telecommunication systems, data processing equipment, consumer electronic devices. Series 1000 has .025 square pin headers, P.C. board mounted and crimp connectors on .100 centers for hi-density usage. Series 2000 utilize .045 square pins on .200 centers. Series 3000 have .045 round or square pins on .156 centers. Housing materials are furnished in both 94V-2 and 94V-O.

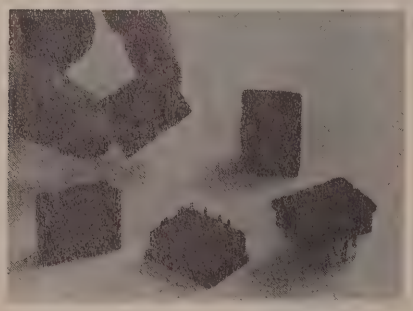
New 40-Page Term-Acon® Catalog Features Economical P.C. Card & Cable-to-Cable Connectors.

Catalog #77081 features the moderately priced Term-Acon® connector line. Connectors are designed for P.C. card receptacles, interconnecting receptacles and headers, flying lead, cable-to-cable connections, mass termination, utilizing crimp or insulation displacement, plus wire wrap plug and receptacle applications. Complete specs and dimensional drawings are provided for the Series 1000 with .025 square pin headers and mating receptacles on .100 centers. Series 2000 with .045 square pins on .200 centers and Series 3000 connectors with .045 square or round pins on .156" centers.



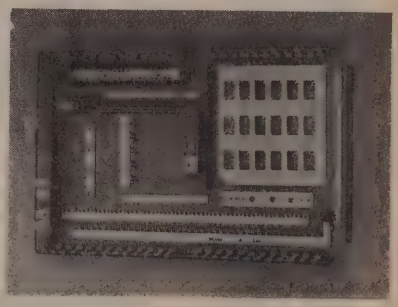
ethode Uni-Pac® Low Cost, ow Profile, Anti-Wicking I. C. ockets. R-4000 Series.

ethode I. C. sockets offer high density d and side stack-ability on a .100 grid. zes for all standard DIP packages avail-le on .300, .400 and .600 centers. I. C. ckets meet EIA standard RS-415 and ature large lead-ins, side-wipe spring nper contacts with tin or gold plating, cket bodies of 94V-O glass-filled nylon h a .030" stand-off for reliable solder-g and cleaning. Large ramped lead-in simple assembly of I. C. package and d repairs. Available in 8, 14, 16, 22, 28 and 40 pin sizes. Eight page Uni-c® catalog available.



Uni-Pac® Miniature Relay Sockets For P.C. Board & Chassis Mounting. M-2100 Series.

Miniature relay sockets are U. L. listed for use with popular industrial relays. Models are available for .062 or .125 thick printed circuit boards and for chassis mounting with optional retaining spring clip. Rugged thermoset molded mica filled or general-purpose phenolic bodies with phospor bronze tin plated contacts. The Uni-Pac® relay sockets are also available with "omit ground lugs" for custom relay applications. Both, conventional wiring tails (.375 long) and printed circuit wiring tails (.235 long) are offered.

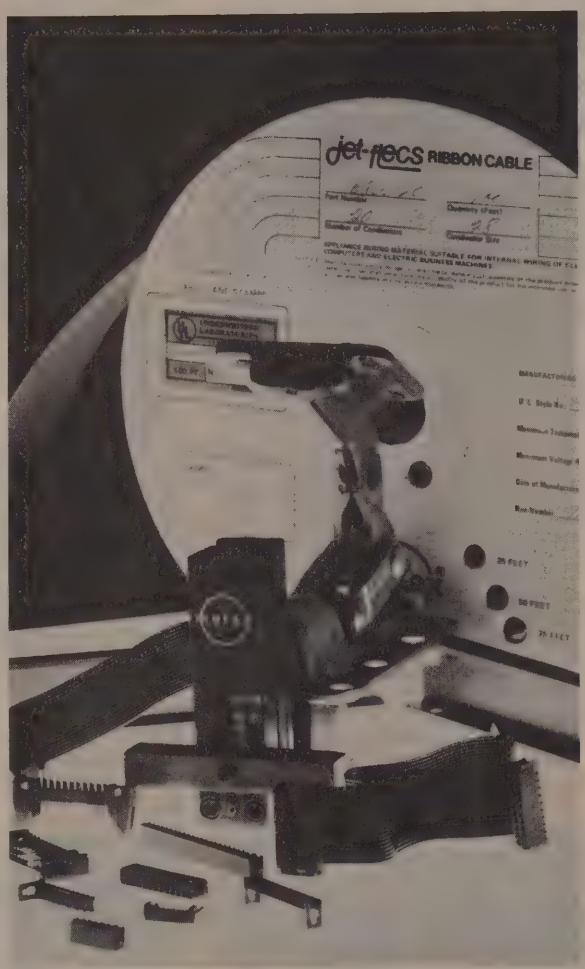


"Omny-Bus"® Bars & Systems Eliminate Many Cable & Wire Harness Problems

Individual units and complete custom systems available to accommodate your power, ground and signal distribution requirements. Our design and manufacturing capabilities have provided users with a wide variety of bus bar constructions from 1 to 21 layers, weighing from ½ ounce to 200 pounds, in lengths from 4 inches to 100 feet. Types include: printed circuit, solderless wrap, Lectro lam, jumper, flexible, and shielded configurations. "Omny-Bus"® tailor-made designs eliminate intermittencies, cross talk, stray EMI and assure uniform conductivity, insulation resistance, inductance, and capacitance. Our 15 year experience has developed a 44 page catalog to assist bus bar users.

New Insulation Displacement Ribbon Cable Systems
for .050", .100" and .156" center applications

molex®



The Complete Jet-Flecs™ Systems includes:

- Connectors
- Assemblies
- Headers
- Cable
- Application Tooling

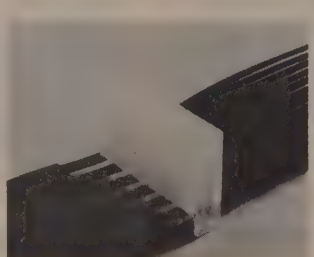
The 050 ribbon cables are available in #28 AWG Stranded (7/36) conductors. Ribbon cable design allows individual or groups of conductors to be separated from the cable through a "zipping" process. The cable is black or gray with a 1st circuit color marke

Molex ribbon cables are UL listed at 105° C and 300 V RMS. They are also FR-1 rated under UL Flammability Specifications.

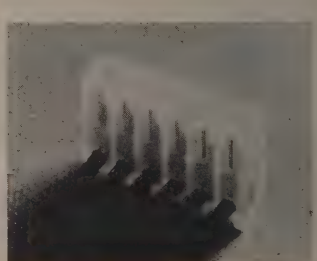
These ribbon cables are designed to mate with the Molex 4700 Connector System, recently designed straight and right angle Headers and compatible insulation displacement systems.

The .050 Jet-Flecs™ cable, header and connector system are available in 10, 14, 16, 20, 26, 34, 40, 50, 60 and 64 circuits. Connectors are available with strain relief, daisy chain and closed end covers.

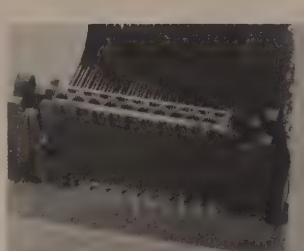
Application tooling for the Jet-Flecs™ .10 and .156 center cable and descrete wire connectors is available for mass termination applications.



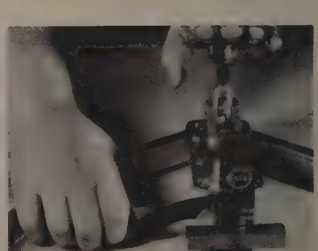
The .156" housing and cable assembly new insulation connector.



The versatile .156" housing will accept discrete and ribbon cable applications.



The new 6792 straight header.



Application tooling is available for .050", .100" and .156" center systems from Molex.

KK-100 and KK-156 Interconnection Systems

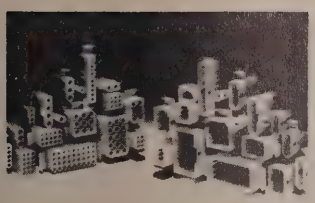
11 basic components handle all your printed circuit interconnection needs: cable-to-board; board-to-board, parallel; board-to-board, perpendicular; board-to-chassis; and power transistor connectors.

Cable-to-board connections: 2 to 24 circuits
Board-to-board connections: 2 to 18 circuits
Pin material: tin-plated brass; gold plating available upon request
Housing material: nylon 94VE-2 (SE-2 rated)

.025" and .045" rigid square wire pins—simple . . . low cost . . . reliable. 1/2" to 2" lengths permit connecting multiple boards to the same circuit.

KK system includes:

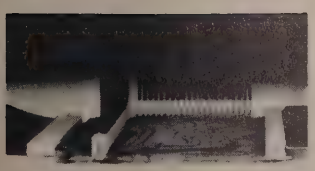
- Flat wafer connectors (round wire with nylon wafer).
- Crimp-type connectors with locking ramp.
- Nylon wafer connectors (round wire).
- Right-angle wafer connectors (square wire with nylon wafer).
- Friction-lock wafer connectors (round wire with nylon wafer).
- P.C. board connectors (right-angle, top, and bottom entry).
- Polarizing wafer connectors (round wire with nylon wafer).
- Crimp-type connectors (mates to square wire or round wire assembly).
- Crimp-type edge connectors (plain and with optional mounting ears)
- Power transistor sockets (.156" crimp-type and solder-tail; .100" crimp-type and solder-tail).



Molex .093"/.062" Multi-Pin Connectors

.093" connectors in 3, 6, 9, and 15 circuits
.062" connectors in 1 through 36 circuits

These famous Molex connectors are SE-2 rated nylon with integral shielding sleeves that isolate each terminal. A positive locking device prevents connectors from separating due to vibration. Integrally molded mounting ears provide fast snap-lock panel mounting without screws, brackets, etc. Connectors cannot be misconnected. Pin and socket terminals can be inserted for added polarity. Use Molex standard .093" dia crimp-type pin and socket. Hand, bench, and automatic assembly tools are available



Edgecon® Edge Connectors

Fast, reliable, and economical means for connecting circuits to the edges of .063" printed circuit boards. Bifurcated flat terminal contact makes excellent connection with board contact faces without damaging pads. Available with or without mounting flanges and in right angle or straight models for added design flexibility. Housings accept Molex 1797/1799 crimp terminals. Also, terminals can be supplied with selective or overall gold plating. Consult Molex for details.

Wafercon® Printed Circuit Connectors

These .093" bead pin-type terminals are preassembled into nylon wafers to save time and labor during production, testing, and servicing. Assemblies are supplied ready for press fitting and soldering into place. Intermix of male and female terminals assures error-free connection and positive polarity. Wafercon connectors may be mated anywhere on the board—circuits do not have to be run to the edge. Use Molex standard .093" dia receptacles.

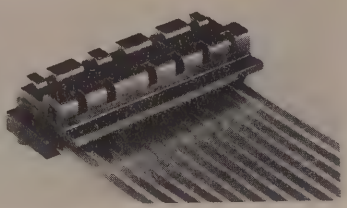
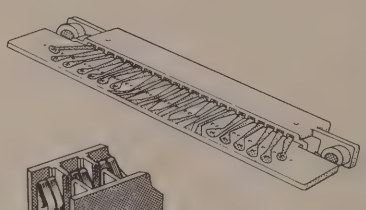
ZIFCON 4346 Zero Force Connector

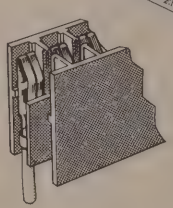
The design and operation of the 4346 ZIFCON zero insertion force connector is simple, economical and reliable. When the plug is mated with the receptacle, there is a gap between the terminals and no contact is made. As the actuating cams are closed, contact is made between the terminals and the two housings are positively locked together. The operation can be made with one hand. The connector comes in 16, 24 and 36 circuit sizes.



4850 FLAT CONDUCTOR Connector

The new Molex 4850 Flat Conductor connector is designed for cable or flexible etched circuits with a zero insertion/extraction force. The focal point of the connector is a unique two-piece design with a snap-on hinge cam, which allows numerous insertions and withdrawals without damaging expensive and fragile etched circuits. The 4850 is available in 5 through 25 circuit sizes.

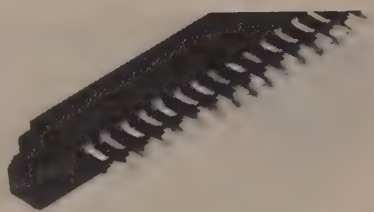




4338

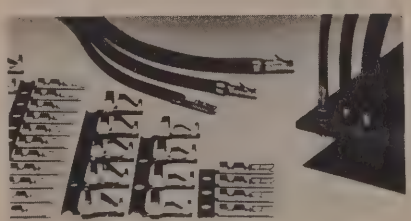
DUALCON™ Dual P.C. Board Edge Connector
4338 Series

Molex has introduced a new .156 crimp/snap-in dual read out edge connector for .062 P.C. cards. The crimp snap-in type contact allows greater production flexibility and at the same time reduces labor/assembly man-hours, because you use only the contacts you need. Th black polyester housing is dimensionally stable and requires no moun panel revisions to replace most of the currently available edge-connec of the solder loop or P.C./wire wrap type. The 5 AMP rated terminal are available with pre-tin gold over nickel, or selective gold plating an will accommodate 18-24, and 24-30 AWG. Crimp, solder loop, and s eyelet type terminals are available. Inter-contact and on-contact pola keys are optional. The connector housing is available with or withou mounting flanges in 6, 8, 10, 12, 15, 18, 22, 24, 25 and 28 dual row positions.



6511 DOUBLE-SIDED, P.C. Tail Edge Connector

With the 6511, Molex enters the P.C. tail double sided edge connector market. Terminals are phosphor bronze, selectively gold plated on .156" centers and .140" and .200" row to row spacing of P.C. tails. Housings are sturdy 30% glass filled polyester.



4811 STRAIN RELIEF Terminal

The recently developed 4811 series of strain relief terminals are used to secure wire leads to a printed circuit board prior to soldering. Thus, eliminating the need for pre-affixed eyelets or griplets on the printed circuit board. The terminal construction allows the actual wire lead to be soldered, and because the terminal fills the printed circuit board hole, solder voiding is minimized.

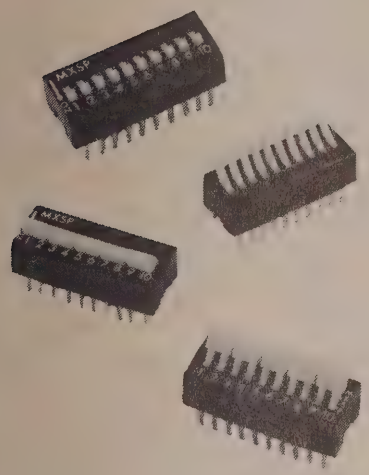
Molex Switch Products

The BOSS™ Switch 4130 series
Binary Option Selection Switch



BOSS™ Multi Position Dip Switches
4130 Series **2-10 circuits**

Molex has introduced a versatile DIP switch family developed for printed circuit board applications. The Boss (Binary Option Selection Switch) Switch Family consists of a unique SPST long actuator lever, SPDT or DPST model, and SPST low profile (.360" high) version. Every switch in the Boss Family offers a truly low cost method of programming functions into solid state equipment. Any electronic device requiring optional preset logic to achieve a varying result can use this type of product. Solder-tail leads on .100 x .300 centers let you mount the Boss through a DIP socket or directly to the P.C. board eliminating the cost of interconnection wiring to perform the switching function. Snap-on covers and rubber boots are available. The Boss is rated for 50 ma at 30 VDC; minimum contact resistance of 100 Milli-Ohms and tested to 5,000 actuations; and it programs a savings of up to 50%.

Molex Lighted Pushbutton Switches

ALLIGATOR TEST & BATTERY CLIPS

Mueller Electric Co. CLEVELAND, OHIO 44114

"60 SERIES" ALLIGATOR CLIPS

U.S. Patent No. 3,321,736

No. 60—CONVENTIONAL TYPE

New slim design with full-meshing teeth. Convenient, round thumb grip, barrel connection for banana plug. Equipped with small soldering lip. Strong spring with a hard bite. Cadmium plated. 2" long.

EACH NET..... $0.19 LOTS OF 10..... $0.14

No. 60-S—SCREW CONNECTION

Eliminates necessity for soldering. Otherwise same as No. 60.

EACH NET... $0.21 LOTS OF 10... $0.159

No. 60-NS—ALLIGATOR NEEDLE CLIP

Like No. 60-S, but with insulation piercing needle in one jaw. Screw connection. 2" long. 10 per box.

EACH NET..... $0.40 LOTS OF 10..... $0.30

No. 60-CS—COPPER ALLIGATOR CLIP

Solid copper version of No. 60-S. Screw connection. 2" long. 10 per box.

EACH NET..... $0.32 LOTS OF 10..... $0.24

No. 60PR-2—SPECIAL BARREL FOR TEST PROD OR PHONE TIP

Barrel crimped to provide friction fit on standard test prod or phone tip. Holds prod on test, frees hand for other work.

EACH NET..... $0.28 LOTS OF 10..... $0.21

No. 62 FLEXIBLE VINYL INSULATOR

Red and black insulators for Alligator Clips 60, 60-S, 60-CS, 60PR-2, 60-NS.

EACH NET..... $0.09 LOTS OF 10..... $0.071

No. 60-HS—STEEL ALLIGATOR CLIP WITH INSULATED HANDLE

Same as No. 60-S except equipped with red and black insulating sleeves on end. Very convenient for distinguishing leads. Has screw connection also. Cadmium plated. 2 1/32" long. Shipped half red, half black.

EACH NET..... $0.29 LOTS OF 10..... $0.218

No. 60-CHS—COPPER ALLIGATOR CLIP, INSULATED HANDLE

Solid copper version of No. 60-HS. Screw connection. Shipped with half red, half black insulating sleeves. 10 per box.

EACH NET..... $0.39 LOTS OF 10..... $0.295

"70 SERIES" ALLIGATOR CLIPS

U.S. Patent No. 2,762,028

Features simplified design, fast connection of wire with cord strain relief ears, patented hinge construction and lower cost.

No. 70—FOR SOLDERED CONNECTION

Steel, cadmium plated. 1 1/4" long.

EACH NET..... $0.15 LOTS OF 10..... $0.113

No. 70-S—SCREW CONNECTION

No. 72— SKIN-TIGHT INSULATOR FOR 70 SERIES ALLIGATOR CLIPS!

For the first time complete, skin-tight, one-piece insulation for a standard size Alligator Clip! Covers entire clip right down to nose. Special tip slot permits full jaw opening without exposing teeth.

EACH NET..... $0.09 LOTS OF 10..... $0.071

MICRO-GATOR CLIP

(Smallest Insulated Clip Ever Made)

U.S. Patent No. 2,762,028 Trademark Reg.

Micro-Gator

Micro-Gator with Insulator

The alligator clip with the microscopic tip! This is the alligator clip you now can use where no other clip will do . . . on printed circuits, in tight spots and on tiny terminals too crowded for anything but its microscopic tip. Including separate skin-tight insulator the tip is no bigger than the head of a pin! Yet the Micro-gator has ample thumb grip, and plenty of bite to stand up straight on the smallest terminals. Ample 7/32" jaw spread. 1 3/32" long. Solder connection. Skin-tight flexible vinyl insulator (sold separately) has "lip-action" tip slot so that jaws stay covered whether open or closed.

No. 34 (Steel, cadmium plated)

MINI-GATOR CLIP

U.S. Patent No. 3,321,736

Trademark Reg.

Mini-gator

Mini-gator with Insulator

Indispensable for testing or incorporation into miniaturized equipment. New design features rivet hinge for greater strength, full-meshing teeth to grip finest wires. Skin-tight flexible Vinyl insulator (sold separately) covers completely — has slotted "lip action" tip. Clip weighs 1/20th oz., has tiny 1 1/64" O.D. nose, but ample 3/16" jaw spread 1 3/32" long. Crimping ears. Solder connection. Surprisingly strong bite penetrates corrosion and coatings.

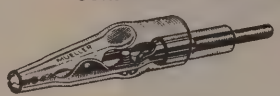
COMPLETELY INSULATED ALLIGATOR CLIPS

Patent Pending

No. 63 or 63-C Clip

Sold only as a unit, with factory-applied insulators.



Completely insulated right down to the nose. Flexible 2-piece skin-type vinyl insulator of high dielectric strength, with "lip action" slotted tip that permits opening of clip without exposing metal. Insulator nose is only 13/64" O.D. The tight fitting sheath preserves all the slimness of the Alligator Clip, still giving complete protection against shorts in even the tightest spots. Screw connection easily made by slipping insulator forward. 2 1/8" long.

No. 63—INSULATED ALLIGATOR CLIP (STEEL)

Composed of Mueller No. 60-S Alligator Clip steel, cadmium plated, screw connection, complete with 2-piece vinyl insulator. Shipped half with red insulators, half black. 10 per box.

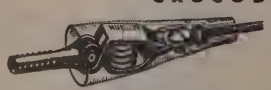
EACH NET..... $0.42 LOTS OF 10..... $0.317

No. 63-C—INSULATED ALLIGATOR CLIP (COPPER)

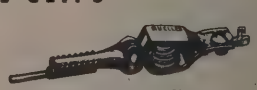
Composed of Mueller No. 60-CS Alligator Clip, solid copper, screw connection. Shipped half with red insulators, half black. 10 per box.

EACH NET..... $0.48 LOTS OF 10..... $0.36

CROCODILE CLIPS



No. 85 or 85-C Clip with No. 87 Insulator



No. 85-T Clip

No. 85—A very small clip with slender, elongated jaws for getting into tight places in radio or electrical test work. Screw connection. 2 1/8" long.

EACH NET..... $0.20 LOTS OF 10..... $0.152

No. 85-C—Same as No. 85,, except solid copper with phosphor bronze spring, brass screw. A radio frequency, entirely non-ferrous test clip. 10 per box.

EACH NET..... $0.40 LOTS OF 10..... $0.30

No. 85-T—Crocodile "Tip-Clip"—equipped with standard phone tip on one jaw, otherwise same as No. 85. Ideal for use as a prod, for ordinary clip connections and for connections to insulated binding posts having non-removale heads. 2 5/8" long. 10 per box.

EACH NET..... $0.54 LOTS OF 10..... $0.402

Use No. 87 Insulators for clips 85, 85-C and 85-T. Red and Black. Cover entire clip except nose. Protect against short and shock. Help to distinguish leads.

MUELLER *QUALITY* BATTERY BOOSTER CABLES

Highest quality cables, equipped with famous Hippo-Clips, for boosting "dead" 6 or 12-volt vehicle batteries with an external battery. Cables are pure copper, finely stranded for high flexibility and covered with rubber insulation which stays flexible in the coldest weather and resists oil, grease and acid. 413 strands of No. 30 wire in the 4-gauge cable and 259 strands of No. 30 wire in the 6-gauge cable. The many fine features of the Hippo-Clips alone are listed elsewhere on this page. The clips are both soldered to the cable and clinched around the cable insulation by means of clinching ears.

Packaged: pair of cables with clips in a bright, attractive display carton. Standard shipping container 10 cartons.

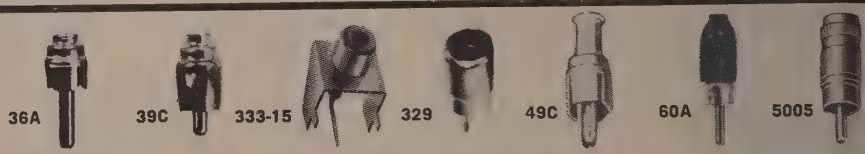
NATIONAL TEL-TRONICS

DEPT. EM, STATE ROAD HILL, MEADVILLE, PA. 16325
A division of Electro Audio Dynamics, Inc. (814) 724-6440

For all your connector and component needs, there is no larger or more reliable source than National Tel-Tronics. Having produced parts for over twenty-five years for all the major OEM equipment manufacturers, National Tel-Tronics has a vast background of component and connector experience on which to draw. Complete tool shop, stamping facilities and in house production capability enable us to have the flexibility to rapidly produce a vast range of electronic connectors and components, either standard or to the customer's specific requirements. Many of our standard parts are listed here. If you don't see your specific requirement, contact our company for a fast and reliable quotation.

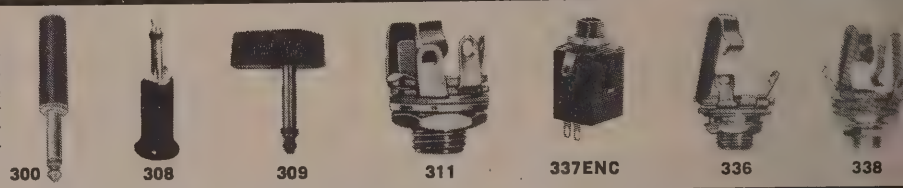
PHONO PLUGS AND JACK PLUGS

Choose from the largest selection of plugs; solder, all-crimp, shielded, short and long shell, handled and insulated versions. Also offering the largest selection of single and multiple phono jacks for chassis, panel and P.C. mounting.



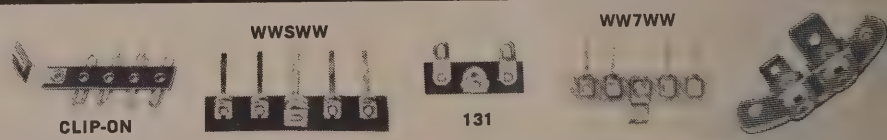
PHONE PLUGS AND JACKS

All standard 2 and 3 circuit jacks and plugs including stereo circuit types are stock items. Ultra-miniature, miniature and standard size jacks are available in both enclosed and standard wafer types. Phone Plugs include both screw and solder type and are available in military versions per MIL-P-642.



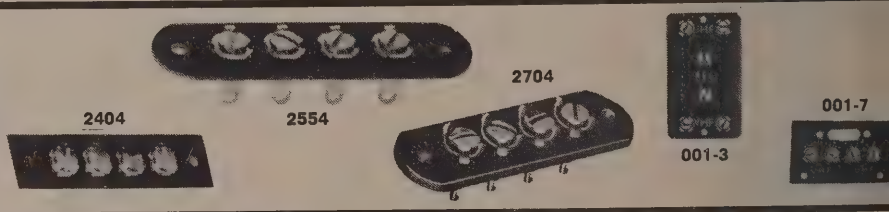
TERMINAL STRIPS

Thousands of configurations available in XP phenolic or UL approved flame retardant materials. ⅜" or ½" spacing is standard. Solder-type, wrap-around, quick disconnect. miniature and sub-miniature types are all standard.



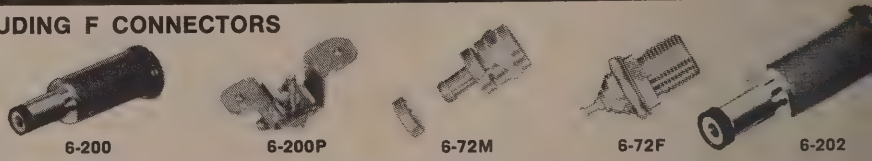
BINDING POST BOARDS

6-32 screw type binding post boards manufactured to standard and custom configurations. Standards include 1 through 12 lug positions in 7/16" or ½" spacing. Heavy-duty ⅛" boards and heavy-duty binding post lugs also available. Can be manufactured to custom configurations with silk-screening, hot stamping, fungus resistant finishes and other special requirements.



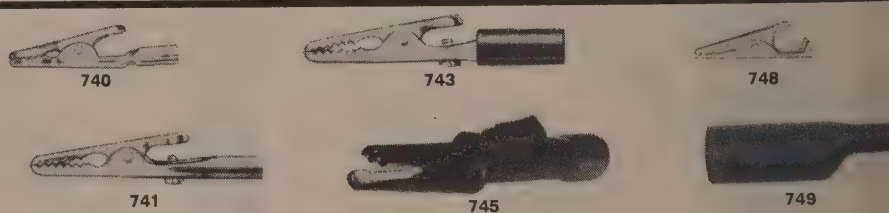
COAXIAL PLUG AND JACKS, INCLUDING F CONNECTORS

Standard coaxial connectors for battery chargers, AC adapters, calculators, etc. Available in .218 and .195 O.D.'s. Male mating plugs also available. F connectors available in both male and female versions for RG cable. Also have solderless type for RG 58 and 59 versions and PL-259 variations.



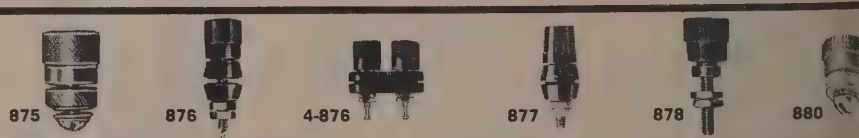
ALLIGATOR CLIPS

Available in both standard high-grade plated steel and in copper construction for extra low resistance. Standard type have ⅜" jaw opening and will accept banana plug in the rear. Both screw and solder versions are standard. Also available in insulated handle versions and in screw and solder types, tip plug adapters, miniature versions for space saving applications and vinyl insulators in six colors for both the standard and the miniature versions.



4 AND 5 WAY BINDING POSTS

All metal and insulated molded posts are standard items. Available in nickle and gold plating in both 10-32 and 8-32 threads. Dual binding posts in red or black combinations and ¾" spring also standard.



TIP PLUGS AND JACKS

.080 tip plugs are available in a full selection of both solder and solderless types, insulated and non-insulated, including the needle tip and chuck versions. Fully insulated push button meter type plug is also standard for rapid assembly. Molded handles in 1", 4" and 5½" lengths, both threaded and force fit are standard for creating insulated plugs or test probes. Tip jacks are available in insulated and non-insulated types in a variety of colors. Molded nylon tip jacks with metal shell or all nylon shells are also available, including a speed clip type for inexpensive and rapid assembly.

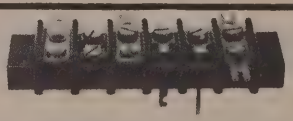
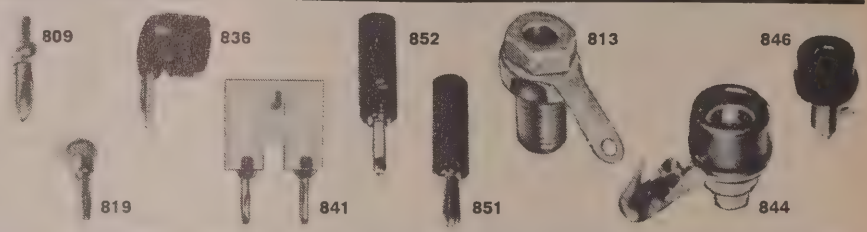
BARRIER BLOCKS

A complete line of high quality, double row, barrier blocks are available in 3/8" and 7/16" pitch spacing with a variety of terminations to meet your needs. Both eyelet and screw type terminations are available. Eleven terminal variations, 2 block styles and 20 lead positions offer a choice of over 400 standard configurations.



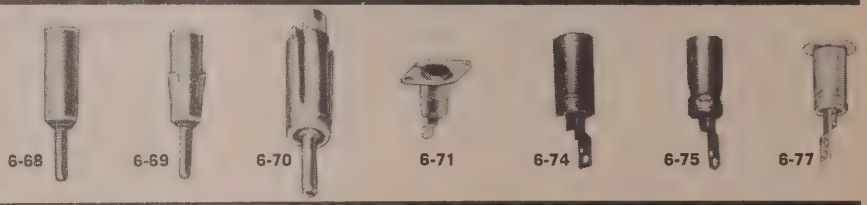
BANANA PLUGS AND JACKS

A full variety of standard and miniature banana plugs with nickle-plated brass bodies and phosphor bronze springs are standard, including side screw and top hex stud mounting version. Insulated handles are available for all plugs. Insulated push-button meter type plug is also standard. Included in the standard line are stacking banana plugs in both single and dual fully molded versions. Banana jacks are available in insulated and non-insulated types in a variety of colors.



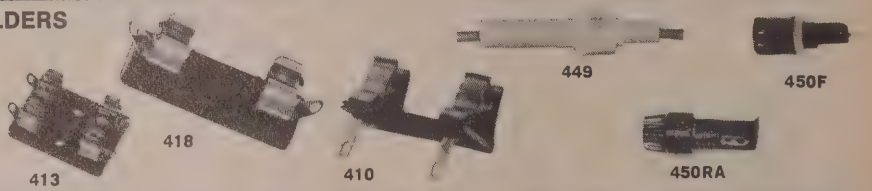
ANTENNA PLUGS AND JACKS

National Tel-Tronics is a prime supplier to the major automotive car radio manufacturers as well as to CATV-MATV industry. All standard antenna plugs and jacks are available. The standard 4 prong Motorola type plug as well as less expensive 2 and 3 prong plugs are manufactured to exacting standards. A great variation in shell and contact design in the antenna jacks is available from our inventory.



FUSE MOUNTING BASES AND HOLDERS

Designed for 3AG type fuses, fuse mounting bases are available in a variety of materials from 1/16" to 1/8" XP phenolic and UL rated FR materials, in both single and multiple configurations. Panel mount fuse holders for 3AG short type fuses are available in both straight and space-saving right-angle configurations with ribbed and fluted caps. The panel mounted fuse holder parts are CSA and UL approved.

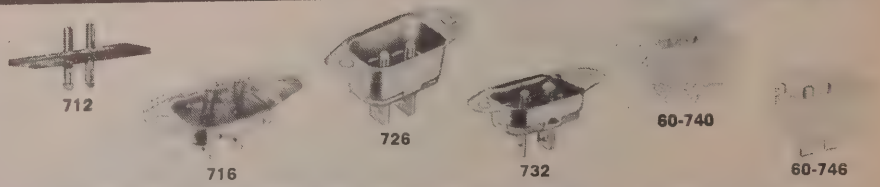


ANODE AND HIGH VOLTAGE CONNECTORS

Anode connectors to 40 KV rating for BW and color television, and oscilloscopes, are available in a variety of configurations. Spring clips and solderless stainless-steel clips assure continuity. Anode cups are standard in neoprene rubber, flame retardant grade PVC or silicone rubber variations in sizes of 1½", 1¾" and 3". Anode connectors are UL approved.

INTERLOCK RECEPTACLES

Both flush and bathtub type receptacles for AC connections are standard in a variety of materials from XP phenolic through UL approved flame retardant materials. Solder type, polarized and quick disconnect type pins are standard. Molded snap-in types are also available in flame retardant materials. All the interlocks are approved by Underwriter's Laboratories and Canadian Standard Assn.



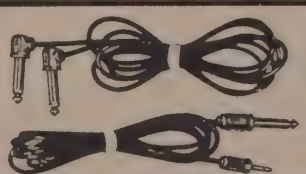
MOLDED AND COMPRESSION TERMINAL BLOCKS

A variety of molded terminal blocks in flexible PVC are available as standard items. Screw type connections, screw driver slot, and .250 quick disconnect connections are standard. Standard size blocks are in a 12 position configuration but can be cut to smaller size if desired.

Two types of compression type boards are available from stock. Series 927 features push-button multi-covered terminals which are mounted on phenolic or FR type boards. Available in six different colors in single or multi-roll configurations.

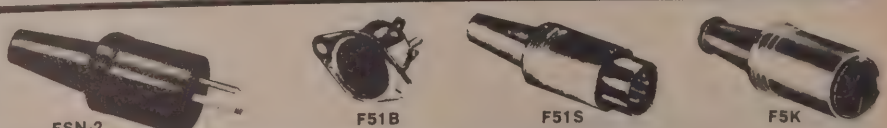
MOLDED CABLE AND HARNESS ASSEMBLIES

A complete molding facility allows great flexibility in providing the audio and electronics industry with a variety of molded cable assemblies. Standard molds includes phone plugs and jacks in 2 and 3 conductor configurations, phono plugs and jacks, miniature phono plugs and miniature jacks, mike connectors, ultra-miniature plugs, coaxial connectors and various adapters. Coaxial and zip cord cables are readily available as well as those for more special applications. Custom assemblies include molds designed to customer specifications and also include capability of amp and molex crimp type assemblies, wire harnesses and multiple conductor assemblies.



DIN CONNECTORS

DIN European style "Europlugs" are available in 2, 3, three and five contact arrangements in both male and female versions. In-line and panel mounted types are standard in both flush and extended barrel configurations.



This listing will give you some indication of the capabilities of National Tel-Tronics.

THE MC² TM FROM PYLE GIVES YOU MORE DESIGN

CONNECTOR FEATURES

The all new Pyle-National **MC² thermoplastic connector** line features **precision molded plug with oil resistant seal, receptacle, coupling mechanism, and modular contact carriers** which when combined form the most versatile circular multi-pin system now available on the market.

The shells are molded in a high dielectric **glass filled thermoplastic,** exhibiting **high impact strength, excellent thermal characteristics, low moisture absorption, excellent aging properties,** and **high mechanical attributes.**

The **key to the versatility** is the **insertable modular contact carrier or module,** which snaps simply into the shell cavity.

A **series of modules,** which are available in a choice of contact sizes and contact arrangements, builds the desired circuit. With this locking system **tools are not required for module insertion** in any cell position. Additional contact density is provided with the fixed size 16 contact cavities spaced in the shell body.

The receptacle shells contain **5 keyways** with a master key way being wider than the slave keyways. The same is true in reverse on the plug shell which contains protruding keys that mate with the keyways in the receptacle.

Shells are available in sizes 20, 24, 28, and 32. The square flange receptacle can be mounted in MIL-C-5015 cutouts for the same shell size.

Quick connect/disconnect is achieved with a double lead acme type coupling thread system with mating accomplished in 2¾ turns.

Built-in non-decoupling of the plug shell from the receptacle is achieved with a unique integrally molded ramp and follower mechanism, which prevents rotation of the coupling nut under vibration.

Alternate keying is accomplished with keying plugs strategically located in size 16 cavities.

Fixed contact positions and modules will accommodate either pin or socket contact. **Pin and socket contacts can be mixed in the plug or receptacle shell cavity.**

FLEXIBILITY THAN ANY CONNECTOR IN HISTORY

CONTACT FEATURES*

A wide choice of contacts in pin, ground pin and socket are available.

Size 16 contacts accommodate #18, #16, and #14 AWG
Size 12 contacts accommodate #14, and #12 AWG
Size 10 contacts accommodate #12, and #10 AWG
Size 08 contacts accommodate #10, and #8 AWG

Size 16 contacts are stamped and formed from high conductivity phosphor bronze strip, grain oriented stock, and plated with a nickel-tin alloy.

Size 16 contacts employ a unique socket arrangement wherein an internal pencil clip spring provides the engagement restriction and is protected from abuse by an integral hood.

Sizes 12, 10, and 8 contacts are precision machined from leaded commercial bronze bar stock, and are electro-plated tin. The socket contacts being of the split tine design are shrouded with a multi-tang hood subassembly.

Contacts are designed for crimp tool wire termination, and are provided with a spring system for positive retention in the cavity and easy removal with the appropriate removal tool.

Other contact platings, such as gold, are available on request.

*Consult factory for information regarding:

A) 20-24 AWG Terminations
B) Rectangular arrangements of MC² Modules
C) Gold Plated Contacts

OPTIONAL ACCESSORIES

An extended range **cable clamp** complete with three clamp halves in each of the four shell sizes is available.

A **cable adapter** with tapered grommet seal and plug to receptacle shell seal for environmental applications is available. Includes choice of gland nut or cable clamp.

CONTACT SPECIFICATIONS

MS AMPERE RATINGS

Based on the combination of the following:

The amount of current which an individual pin and socket contact may carry is a function of contact material and design efficiency of the pin and socket system as well as the ability of the primary conductor insulation to resist temperature rises due to inherent copper losses and bundling factors.

Total current carrying capacity of the connector is a function of the insert temperature which is rated at 225°F for continuous operation. The total operating temperature is the summation of the ambient temperature plus the heat rise resulting from the thermal losses of each contact.

MIL-W-5088 specifications may be used as a general reference on the subject inasmuch as pertinent cable derating data is included.

**Based on Temperature rise (National Electrical Code Requirement).

N.E.C. NON-CIRCUIT-BREAKING OR DISCONNECT AMPERE RATINGS

The non-interrupting current ratings, shown in the table, are based on the temperature of the contacts being within the range specified by Underwriter's Laboratories, Inc. when wire sizes are selected in accordance with the National Electrical Code.

When multiple conductors are used, the current carrying capacity depends upon various factors such as:

1. Size and number of wires.
2. Temperature rating of wires.
3. Duty Cycle.
4. Ambient temperature.

Proper care must be taken to make sure that all the derating factors are considered in arriving at the total ampere capacity of the connector.

CABLE ADAPTER COMPONENTS & ACCESSORIES

The sealing of the connector back shells is accomplished by use of a cable adapter and tapered grommet. The grommet may be pressurized either by a gland nut or cable clamp if additional strain relief is desired. The back shell — cable adapter seal is accomplished with an "O" ring seal.

*Cable adapter assemblies complete with grommet and clamp or gland nut can be ordered. Consult factory.

HOW TO ORDER*— SHELLS, MODULES, CONTACT ASSEMBLIES

1. Establish application requirements
- ☐ Size of circuit conductors
- ☐ Number of circuit conductors
- ☐ Voltage class requirements

2. To order assembly of shell and modules without contacts
- ☐ A—Start with product code identification letters **TC**
- ☐ B—Identify "P" for plug, "R" for sq. flange receptacle.
- ☐ C—Identify shell size (see p. 3 for shell configurations)
- ☐ D—Identify module type by location (see p. 4 for module identification)

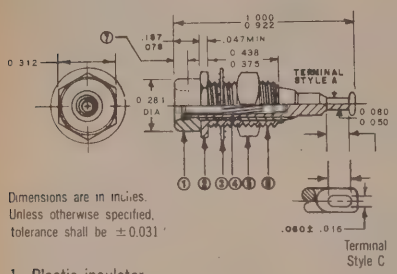
BUSHING MOUNTED TIP JACK

The Raytheon MIL-C-39024/10 tip jack combines highest quality materials and design techniques to provide a highly reliable tip jack for both military and industrial electronic equipment applications. The tip jacks fully meet the requirements of MIL-C-39024. An outstanding, and exclusive, design feature of this jack is its separate beryllium copper spring pin closed entry contact. Closed entry contact design prevents damage to contact through careless probe insertion.

These jacks are designed to accept a 0.080 ± 0.001 dia. test probe and to **prevent** the entrance of a 0.085" test probe.



Dimensions are in inches.
Unless otherwise specified, tolerance shall be ±0.031'

Terminal Style C

1. Plastic insulator
2. Metal sleeve
3. Internal tooth lockwasher 13/32 o.d. x .013 to .026 thk
4. Spring pin contact
5. Hex nut 11/32 across flats x 1/8 thk
6. Threaded body (insulator) 1/4-32 UNEF-2A
7. Plastic to metal distance 0.062 min.

MATERIAL DATA

Insulator—Polyamide per MIL-P-17091. Teflon material per MIL-P-19468.
Contact—Beryllium copper per QQ C-533, Cond. A, gold plated per MIL-G-45204, Type II, Class I (50 millionths).
Threaded Sleeve—Brass per QQ-B-626, nickel plated per QQ-N-290. Type V, Class 1.
Terminal—Brass per QQ B-626, plated
Mounting Nut—Brass per QQ-B-626, nickel plated per QQ-N-290, Type V, Class I.
Lockwasher—Phosphor bronze per QQ-P-330, Cond. A, Spring temper. Nickel plated per QQ-N-290, Type V, Class I.

ENVIRONMENTAL AND MECHANICAL DATA

Thermal Shock— −65°C to 125°C Method 107 Cond. B MIL-STD-202.
Salt Spray—48 hours—Method 101, Cond. B. MIL-STD-202.
Vibration—Method 201 MIL-STD-202.
Durability—1000 insertion-withdrawal cycles.
Withdrawal Force— 8 oz. minimum (0.080 ± 0.001 probe)
Insertion Force—5 lb. max.
Shock Test—MIL-STD-202, Method 213, acceleration at 50G.

ELECTRICAL CHARACTERISTICS

Rated Current—5 amperes, max.
Operating Voltage—2000 volts RMS at sea level, 350 volts RMS at 80,000 feet.
Insulation Resistance—5,000 megohms per Method 302, MIL-STD-202 Cond. A 100 vdc.
Dielectric Withstanding Voltage—3000 volts RMS, 60 Hz, at sea level per Method 301, MIL-STD-202.
Millivolt Drop—at 5 amperes, 15 mv after completion of all environmental and durability tests.
Capacitance— < 10 pf at 1500 KC.

MINIATURE PC MOUNT JACKS

Raytheon Printed Circuit Test Jacks are miniature units designed specifically for printed circuit applications. Two types are offered; a **standard** model for dip solder board application, and a **short** model for use on boards soldered on automatic flow soldering equipment, or for back-to-back board mounting.

The units consist of a small diameter nylon insulator, a Beryllium-copper spring pin contact, and a gold-plated contact sleeve. Nine brilliant insulator colors are available for convenient visual circuit identification. They accept the standard. .080 dia. test prods.

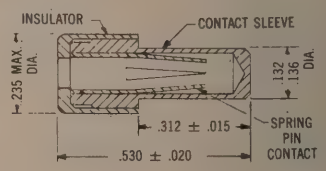
ELECTRICAL AND MATERIAL SPECIFICATIONS

Rated current: 5 amperes maximum
Operating voltage: 1500 volts RMS, 60Hz at sea level, and 300 volts RMS, 60Hz at 80,000 feet.
Contact Resistance: Less than .0015 ohm, at room temperature with standard .080 test prod.
Insulator material: Nylon, per MIL-M-20693.
Contact Sleeve material: Brass, yellow per QQ-B-626, Comp 22, half hard temper, underplate of .0002 minimum thickness of copper per class 3 of MIL-C-14550, overplate of .004 thick tin plate per type 1 of MIL-T-10727.
Contact material: Beryllium copper per QQ-C-533, Condition A. Gold plated (50 millionths) per MIL-G-45204 type 11, class 1.

ENVIRONMENTAL AND MECHANICAL DATA

Thermal Shock: MIL-STD-202, Method 107, Condition B (−65°C to +125°C)
Salt Spray: MIL-STD-202, Method 101, Condition B (48 hours)
Humidity: MIL-STD-202, Method 103, Condition B (96 hours)
Fungus: Non-nutrient material.
Solderability: Per MIL-STD-202
Insertion force: 5.0 lbs. maximum
Withdrawal force: 0.4 lbs. minimum (.080 ± .001 test probe)

Standard Style: For panels up to 1/4" thk.



Short Style: For panels up to 3/16" thk.

RIGHT ANGLE PC MOUNT TEST JACKS

Raytheon right angle test jacks fulfill a need for a high quality, single .080 contact connector for use with closely spaced printed circuit boards. Straight-forward design and use of highest quality materials combine to provide a miniature connector with an unusual degree of reliability at modest cost.

Their entry contact design prevents damage to contact through careless probe insertion.

These jacks are listed in U.S. Navy Handbook of Miniature Parts for Electronic Equipment (NAVSHIPS-93440(B)) because of their high reliability.

They are also color coded in ten Federal Standard 595 colors.

As illustrated in the figures, two terminal spacings are available, either on .300" or .400" centers.

SNAP-IN MOUNTED/SUBMINIATURE

These subminiature jacks are suitable for use on standard, miniature, or subminiature electronic equipment. Designed for minimum size, they are ruggedly constructed and accept a standard .080 diameter test prod. They nylon insulator is available in any of nine brilliant colors to permit convenient visual coding of circuit check points. An outstanding feature of this jack is the ease and speed with which it may be mounted on a panel or chassis. This is done merely by inserting the insulator in a hole of suitable diameter and pressing the contact assembly into the insulator until it is firmly seated. (See dimension data for recommended insertion tool). The portion of the insulator extending behind the panel expands slightly, locking the unit firmly in place. The entire mounting operation is performed from the front of the panel.

ELECTRICAL SPECIFICATIONS

1. Contact Resistance (at room temperature, with standard .080 diameter test prod): Less than .0015 ohm.
2. Capacitance to ground (jack mounted on .052" thick metal panel): 3mmfd.
3. Voltage breakdown: Arcing at 10 KVDC (front of jack to panel, mounted on .052" thick panel.

CIRCUIT BOARD MOUNTING BRACKETS

The Raytheon Circuit Board Mounting Bracket is a heavy duty component designed to mount terminals, printed circuits and resistor boards rigidly. Stacked assemblies need Fig. 1 style.

Each bracket will support a load of one-half pound when subjected to vibrational frequencies through 55 CPS with table excursions up to .060 inches or impact loads through 2000 foot-pounds.

- Four sizes for panels from 1-3/8" to 3-7/16" wide
- Provides Rigid Support under Shock or Vibration
- Mounts Single or Double Panels
- Meets Military Specifications MIL-E-16400A (Ships), MIL-E-5400, and MIL-P-11268B (Sig C.)
- Formed from .090" Cold-Rolled Carbon Steel, Cadmium Plated

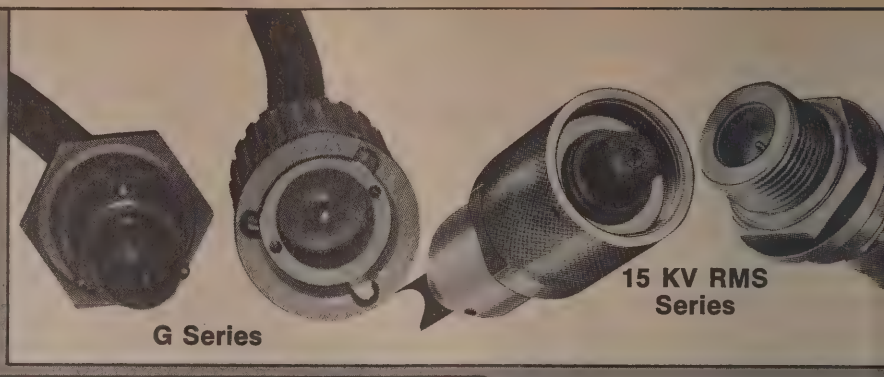
Rowe Coaxial Connectors and Cable Assemblies

Employ high-voltage, corona-free design techniques. They are ideal for use in pulse as well as DC voltage applications, through 150 KV. A wide variety of molded-on or field assembly types are offered. Available in quick disconnect or screw couplings.

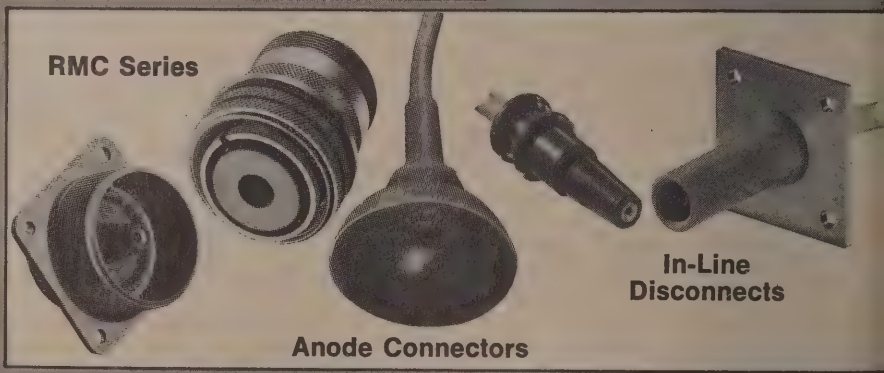


Rowe Triaxial Connectors and Cable Assemblies

A full spectrum of both molded-on and field assembly types are available for a wide variety of cable types such as the triaxial version of RG-8, up through and including specialized construction for operation in excess of 100 KV.

Rowe Single Contact Connectors and Cable Assemblies

Offered is an extensive listing of single contact high-voltage assemblies, which include anode connectors, in-line disconnects and others which are used unshielded to solve your simple high-voltage interconnection problems.



Rowe Multiple Contact Connectors and Cable Assemblies

Offer contact arrangements from one to thirty contacts, panel receptacles, cable plugs, rack and panel combinations, in-line types and many others. Both field assemblies and molded-on types are standard in this line.

Rowe Industries has designed and developed over 700 specialized interconnections for which tooling is available.

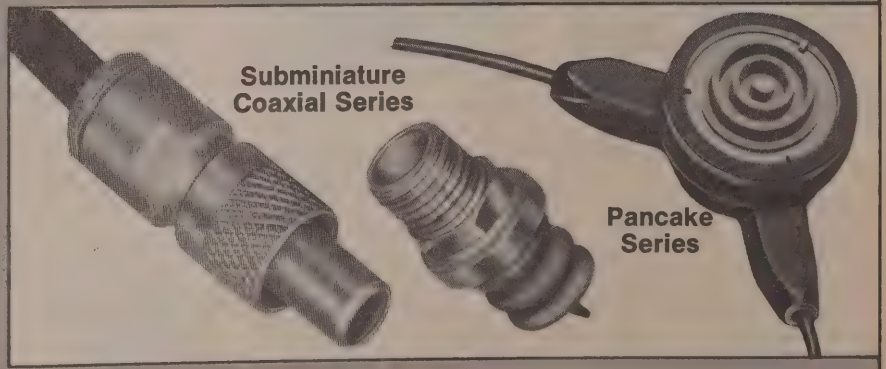
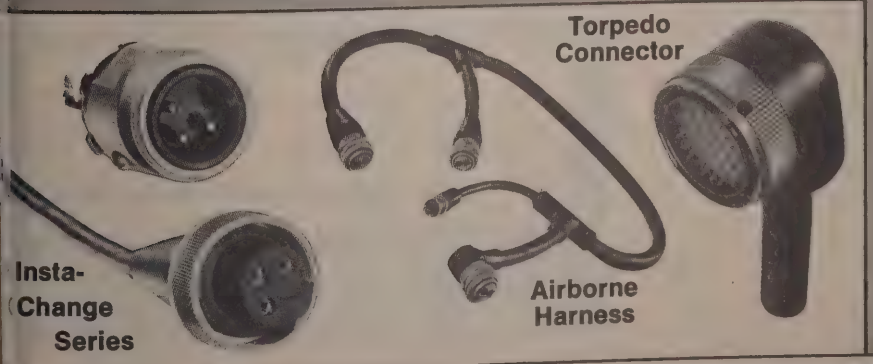
Rowe
Miniature Coaxial
Connectors and Cable Assemblies

Employ the same high-voltage design techniques as the coaxial series, but are much smaller in size for use in restricted spaces. Available in quick disconnect and screw couplings (the JA Series can be adapted to such standard type cables as RG 58 and RG 59).

Rowe
Subminiature Coaxial
Connectors and Cable Assemblies

Are ideally suited for use where space is at a premium. Employing the traditional Rowe high capability features, the subminiature sizes offer unusually high voltage operating capabilities, through 20 KV.





Rowe
Low-Voltage, Molded-On
Connectors and Cable Assemblies

For use in severe environments. We can mold your STD connectors to cable for an environmental seal and provide a molded strain relief. Our exclusive Insta-Change series was designed for factory, mining, nuclear and oil well use.

Hydrostatic pressure testing.

We're specialists in complete interconnection systems and, in particular, connectors and cable assemblies for extreme environments and unique applications. In fact, we've designed and manufactured hundreds of different connectors and cable assemblies for nuclear instrumentation and control, high voltage, corona-free thru 200 KV+, underwater instrumentation, geophysical, high and low temperatures, corrosive environments, high altitude and deep space, high and low pressures and other sophisticated military and industrial systems.

Rowe engineers design and specify custom products to meet exacting requirements and Rowe craftsmen produce them to the highest quality standards. In addition, we operate one of the most complete testing facilities in the industry. Our destructive and non-destructive testing capability includes:

Electrical Testing
Dielectric strength, corona measurement, RFI/EMI and DIT-MCO computer controlled circuit testing.

Mechanical and Physical Testing
Plating verification thru microscopic analysis, shock and vibration, hydrostatic pressure and helium leak, tensile strength,contact force measurement, optical comparitor equipment, complete x-ray lab.

Environmental Testing
Altitude thru 150,000 feet, temperature, humidity, corrosive atmospheres, accelerated life combining various conditions simultaneously.

Quality Control
Rowe's quality control and inspection systems meet or exceed MIL-Q-9858, ISR-1, NRC's 10CFR50 appendix B and standards of all aerospace and industrial firms.

With so many interconnections to choose from, chances are that we've already developed the one that meets your needs. If not, we'll custom design one for you.

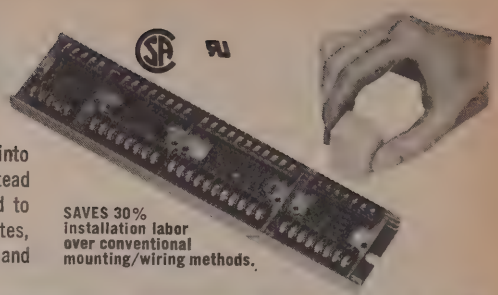
SNAPTRACK™ RELAY/TIMER MOUNTING SYSTEM

A low cost, convenient method for installing plug-in relays, timers, tubes, etc. Assemblies snap into continuous lengths of Snaptrack, up to 4 feet long, requiring 2 fasteners per foot of track instead of per socket assembly. Sockets and break-resistant barrier terminal blocks are wave soldered to epoxy/glass p.c. board featuring 2 oz. copper conductor. Standard screws feature wire-clamp plates, eliminating need for crimp-on terminals. Strip the wire, place under plate and screw down. UL and CSA certified.



SAVES 30% installation labor over conventional mounting/wiring methods.

COIL INDICATOR LAMP OPTION

Wired-in relay coil indicator lamps are available on most Snaptrack socket assemblies. Offers better display than lamp built into relay. Infinite life lamps stay with socket . . . saves cost.

To specify, add suffix per table at right. Ex: **8BR-1** is socket with 120VAC neon lamp.

RDI barrier

NEW! SERIES 3 QUARTER INCH

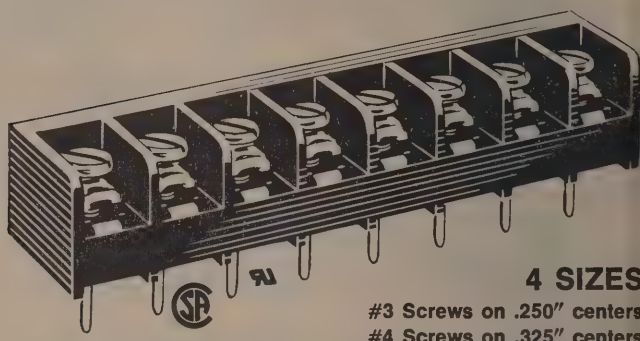
...a fresh approach to field wiring

.250" ctr - ctr spacing featuring #3-48 screws.

New packaging design opportunities are yours as the new sub-miniature series 3 joins RDI's unique terminal blocks. All the popular terminal shapes & styles are available as featured in larger blocks.

RDI pioneered molding in resilient plastic, wire-ready (raised) screws, flat p.c. pins, back-barrier, integral stand-offs.

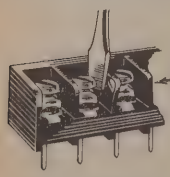
All RDI terminal blocks are available from local authorized distributors.



4 SIZES

#3 Screws on .250" centers
#4 Screws on .325" centers
#6 Screws on .375" centers
#8 Screws on .4375" centers

here's why RDI is the leader in terminal block design...



BREAK RESISTANT BARRIERS

RAISED SCREWS... READY FOR WIRING

featuring wire-clamping screws... secures 2 different wires, eliminates need to lug wires.

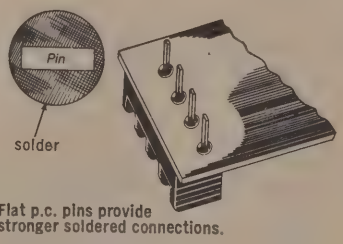
Binder head screws also available

BACK BARRIER safeguards components from field wiring...

contains strands of wire-stops shorting with adjacent wire.

Standoffs allow cleaning flux from the top side of pcb.

Integral Stand-offs



Flat p.c. pins provide stronger soldered connections.

SPECIFICATIONS

BARRIER MATERIALS
Standard: Polypropylene, U.L. grade 94V-0, 105°C operating, black.
Premium: Polyester, U.L. grade 94V-0, 130°C operating, black.

TERMINALS
Standard: Steel, bright-acid-tin plated.
Premium: Brass, bright-acid-tin plated

SCREWS
Standard: Zinc dichromate plated steel binder head or with captive wire clamping plate.
Premium: Zinc dichromate plated brass. Special order.
Sizes: #3-48, 4-40, 6-32, 8-32.

AMP AC FAULT FINDER

CHECKS ALL THESE ELECTRICAL CIRCUIT CONDITIONS

• Open Ground • Open Hot • Open Neutral • Correct
• Hot/Ground—Reversed • Hot/Neutral—Reversed

This revolutionary AC Fault Finder has indicator lights and a chart on both sides to describe the condition for each lighting arrangement. Plug in and illuminated signals indicate: reverse polarity, faulty wiring, missing grounds and/or correct wiring conditions.

FEATURES:

Just plug in—simple & easy-to-use
No tools, meters, wires needed.
Easy to read from any angle—labeled on both sides
Break resistant plastic.
Designed for conventional 3 wire 120 V AC outlets
Checks dual wire outlets with use of polarized adapter and ground wire. **Std. Pkg. 12**

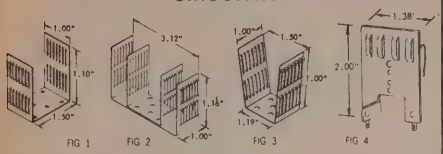
HEAT SINKS FOR SEMI-CONDUCTOR CIRCUITRY



LIGHTWEIGHT — ECONOMICAL — VERSATILE

SMITH HEAT SINKS can be depended upon for economical and efficient cooling of semi-conductor devices under individual environmental operating conditions. Designed with pre-punched transistor hole patterns of pre-painted aluminum with louver design for more efficient heat transfer, and of silver-bearing copper, also louvered, for constant retention under severe shock and vibration environments, ideal for printed circuit boards and metal surfaces where minimum space and weight are important considerations

THERMAL RESISTANCE

Thermal Resistance Hca is the measure of the effectiveness of a heat dissipator in keeping down the temperature of a semi-conductor while heat is being developed. The thermal resistance is multiplied by the number of watts dissipated; the result is a rise in temperature above ambient air. The lower the Hca figure, the cooler the semi-conductor. The Hca figures represent natural convection situations in a sea level atmosphere. Actual performance in individual situations depends upon air flow, proximity of interfering objects, thermal conductive effects of the chassis, and heat radiated or convected from other components.

THERMOVANES

Manufactured of pre-painted aluminum .060" thick. Designed for thru-board mounting, except Fig. 4 provided with mounting Lugs.

ALL HEAT SINKS ARE FURNISHED WITH PRE-PUNCHED TRANSISTOR HOLE PATTERNS

Flexible, versatile terminal block comes in a roll on tape. Cut it, slide blocks into track, snap in end stops and the assembly is complete. Pre-drilled holes in track permit quick mounting on flat or curved surfaces.

FEATURES

- Durable, tough nylon on flexible back. Bends without breaking.
- Track (G.E.) Nory' EN 265 conforms to Curved Surfaces.
- Offers quick customizing for any desired length.
- Track can be cut to desired length with AMP Special Industries cutting tool or hacksaw.
- Packaged in convenient dispenser carton.
- Easy — add-on capability.
- Block and track self-extinguishing.

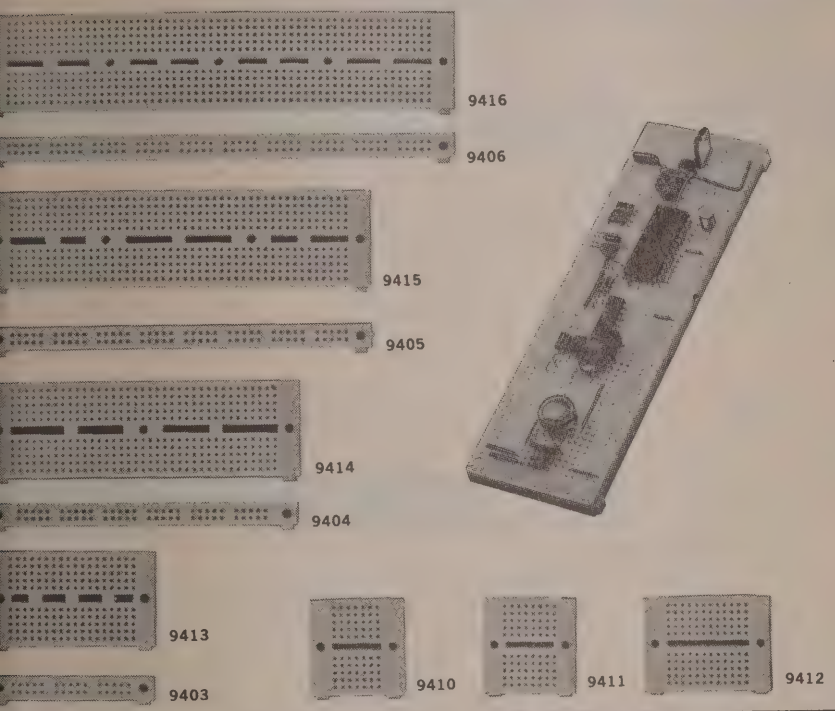
BREDBLOX & BREDSTIX
MODULAR PROTOTYPE AIDS



SPECIAL FEATURES:

MATERIAL: DELRIN, which retains both its dimensional stability and clean smooth surface after years of use.

CONTACTS: Precision stamped, corrosion resistant nickel silver, which retains its grip after thousands of insertion cycles.

MOUNTING: Mounting of both BredBlox and BredStix is exceptionally easy. SNAP-PLUGS, supplied with each unit. SNAP the entire block on to base plate when matching 1/8" holes are supplied. When installed, these plugs finish the surface of the block leaving no dirt-catching holes.
For thick plate mounting, #4 Flat head screws and nuts may be used, or #6 self-tapping screws may be inserted from below.

STACKING: Exclusive DOVE-TAIL stackers hold blocks and strips of similar size together in perfect alignment for use as portable Super-Strips.

INDIVIDUAL FEATURES:

BREDBLOX: BredBlox have two separated rows of five interconnected contacts each. The median separates the rows by .300" (minimum DIP spacing). Therefore, each pin of a DIP (or other component) inserted in the strip will have four additional tie-points per pin in which to insert connecting wires or components. They accept leads and components up to .032 diameter. Inter connections are readily made with #22 AWG solid wire. All contact sockets are on a .100 square grid. Blox are 1 5/16" wide.

BREDSTIX: BredStix are buss strips to be used in conjunction with BredBlox for distribution of power and common signal lines. They consist of two separate rows of common terminals, grouped into clusters of five. Lengths match the four most common multiple IC BredBlox to provide common power and signal distribution for all IC's. All contact sockets are separated by .100. Stix are 5/16" wide.

Std. Pkg.: BredBlox 5. BredStix 10.

BREDBORD KITS
PROTOTYPE DESIGN AIDS

new concept in solderless circuit evaluation and design aids. Smith BredBords e each supplied in easy-to-assemble Kit Form, for low cost and maximum flexibil- of use. All BredBords fit directly on standard Smith Instrument Cases to allow e addition of power supplies, clocks, level switches, etc. at the discretion of the er.

odern, color-coded binding posts (one connected to ground-plane) allow inter- ce to meters, scopes and other devices. BredBords are built on heavy duty ass-epoxy boards. Insulated and screened on top, with full copper ground plane elow. Each kit is supplied complete with all parts and hardware, including the clusive Smith Snap-Mount pins, and complete assembly instructions.

BredBord 1

TERMINALS: 630 TEST POINTS. 94 seperate 5 point terminals, plus 4 bus lines of 40 common test points each.

FEATURES

1. One piece, burr free construction for maximum electrical conductivity.
2. Electro-tin plating for maximum corrosion resistance.
3. Construction of pure electrolytic (ETP) copper annealed to relieve stress points and to insure maximum installed strength.
4. Barrel to pad transition designed to minimize flexing and bending.
5. Funnel barrel construction for positive and easy wire insertion — eliminating strand hangups.
6. Multiple "V" grooves in selective sizes for maximum holding power and current flow.
7. Insulation has a non-slip ridge for ease of positioning crimping tool.

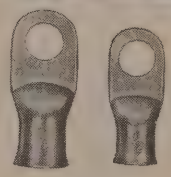
NEW POWER TERMINALS



- One piece, electrolytic copper, drawn seamless terminals
- I D Tolerance is evenly drawn to eliminate "Hot Spots"
- Flared entry design facilitates wire insertion
- Lugs are totally closed to eliminate accumulation of moisture and corrosion
- Ten sizes — #6 to #4/0 AWG in various stud diameters
- Each lug is stamped with wire size for easy identification

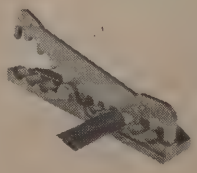
POWER TERMINAL KIT

- Kit includes assortment of 50 most popular power terminals — #6 to #4/0 AWG
- Kit includes the Model 9691 Crimping Tool
- Packaged in an unbreakable plastic box — compartmented to identify each size

No. 9690 **Net ea. $48.00**

CRIMPING TOOL



- Compact size, machined hardened steel
- Crimping slots designed to hold terminal. Each slot identified by wire size for precision crimping
- Crimping action accomplished either in a vise or by a single hammer blow
- Single crimp detent affords a pull-out force exceeding U.L. requirements
- Complete with instructions and wire stripping information

No. 9691 **Net ea. $18.00**

STEATITE AND PORCELAIN INSULATORS

STEATITE INSULATED THRU-PANEL BUSHINGS

Consists of a pair of identical steatite insulators along with cushion washers and hardware. The 9555 assembly has interlocking insulators which are self-centering in mounting hole and may be used on very thin panels.

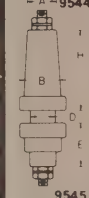
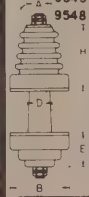
THRU-PANEL INSULATORS





Compression mounted by means of a stud throughout the entire length of the unit. Extrusion of insulator base extends thru mounting hole, increasing the breakdown rating. Units have flat mounting surfaces and are furnished with cushion washer. Types with jacks have terminal permitting connection above, as well as below, panel.

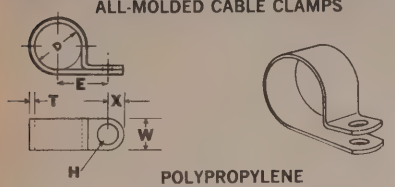
ALL-MOLDED CABLE CLAMPS



POLYPROPYLENE

Marked for easy identification. Polypropylene cable clamps feature excellent support at low cost. Manufactured entirely from propylene, they exhibit no environmental stress cracking and have excellent heat resistance at prolonged periods of time. Propylene clamps are impervious to most acids, alkalines, organic solvents and detergents. Conforms to applicable Mil. Specs. **Std. Pkg. 100**

TEFLON* TRANSISTOR HOLDERS

se holders provide insulated top and botton chassis mounting support of transistors. They e thru-holes and turreted solder terminals for wiring transistor leads and passive compo- nts, eliminating the need of a pad and providing total insulation and strain relief.

Holders shown represent the basic configurations available for JEDEC Packages TO-5 (.200" Dia. Pitch Circle) and TO-18 (.100" Dia. Pitch Circle). Other styles and variations are constantly being added. Consult our ENGINEERING Dept for special requirements.

ELECTRONIC ENGINEERS CATALOGUE

The 1978 edition is out...and the response is in...
IMMEDIATE AND OVERWHELMING

ACCEPTANCE

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to—and from—Western Europe.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 product headings & cross-references alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

5-way® BINDING POSTS

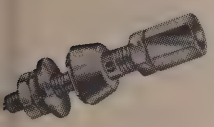
5 WAYS TO CONNECT ● GOLD-PLATED BRASS PARTS ● RANGE OF COLORS

FLUTED NUT TYPES

Plastic parts of standard (not miniature) size types molded of Lexan polycarbonate resin; brass parts are gold-plated. Rated for 30 amperes, 1000 volts working. Nickel-plated brass types available on special order.

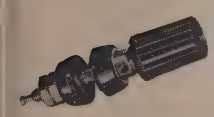
HEX NUT TYPES

Rated for 30 amperes, 1000 volts working. Brass parts are gold-plated; plastic parts are of nylon compounded to meet military specifications MIL-P-20693A, Type IV. Nickel-plated brass types available on order.



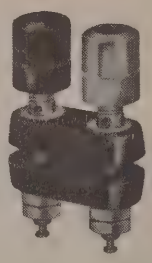
GROUNDING TYPE

For making rapid connections to ground. Made of finely machined brass nickel-plated and polished. Panel grounding collar frozen to shaft has "D" type shoulder for locking in keyed panel hole.



MINIATURE TYPES

Fluted nut design only. Rated for 15 amperes, 1000 volts working. Gold-plated brass parts; nylon plastic parts compounded to meet military specification MIL-P-20693A, Type IV. Types with nickel-plated brass available also.



DOUBLE ASSEMBLY TYPES

For instrument and equipment panels requiring binding posts mounted on ¾" centers. Rated for a current capacity of 30 amperes and a working voltage of 1000 volts. Brass parts are gold-plated; panel insulators in black only. Rugged, self-contained assembly makes mounting more accurate, faster and easier than two individual binding posts and gives maximum strength where connections are frequently made.

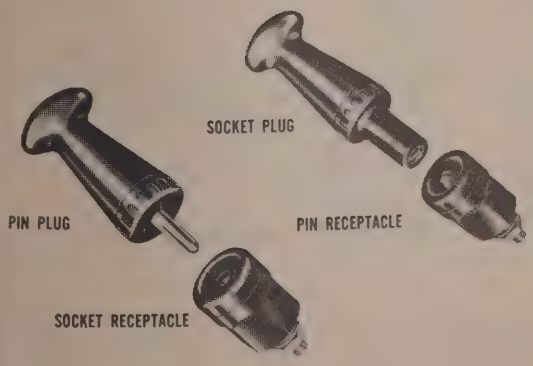
SUPERCON® ELECTRICAL CONNECTORS



Nylon plastic parts; gold-plated brass current-carrying parts. Wiring connections to the same plug can be either soldered or solderless. Plug cable-fastening screws permit a wide range of cable sizes. Plug grips are of a simple, two-piece threaded construction for quick assembly. All receptacle plastic parts are molded of the same color to permit more rapid and accurate circuit identification front and back of panel when installed. The 25, 50 and 100 ampere types are listed by Underwriters' Laboratories, Inc.

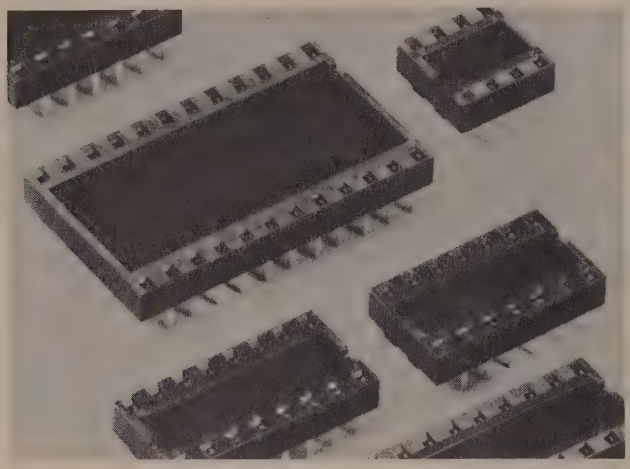
Low Profile DIP Sockets Edge Grip



- Universal mounting and packaging
- Anti-wicking feature
- Solder standoffs for easy cleaning
- Redundant contact points for low contact resistance, higher reliability and repetitive insertion.

Here's the line of low profile solder tail sockets that makes wrought gold contact surfaces available at a price competitive with tin. And finally makes low price *and* high performance available by using a new, durable tin inlay. Only you know your performance requirements. But now, using gold or tin inlay, you can pick your own kind of savings – with TI sockets.

F Series (Military) Connectors

Texas Instruments F Series is a line of high reliability, precision connectors comprising a versatile system to meet the requirements of electronic equipment.

F Series connectors feature:
- Gold plated screw machined contacts
- Closed entry Be-Cu female sockets
- Diallyl phthlate molded bodies
- Passivated stainless steel hardware

The connectors meet the requirements of MIL-C-55302 and are suitable for use in military as well as non-military equipment, wherever severe environmental conditions exist.

For use in:
- Civil and Military avionics equipment – Airborne and ground support
- Communications equipment – Airborne and ground based
- Civil and Military radar – Airborne and ground based
- Airport landing systems
- Missiles
- Instrumentation
- Computers
- Test equipment

F Series connectors are designed to connect
- printed circuit boards
- chassis, and
- cables

in virtually any combination.

The wide selection of body styles, contact designs, and assembly hardware available in this series permit custom designed connectors at off-the-shelf prices. Available with 10 to 160 contact positions.

Comprehensive literature is available which fully illustrates each F Series connector in all of its possible contact sizes. This Designers' Guide also shows the numerous contact and hardware variations which are possible. The guide, along with a list which can be used to cross reference these connectors to the proper military numbers, may be obtained by contacting the factory.

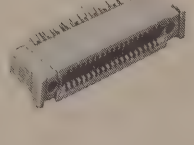
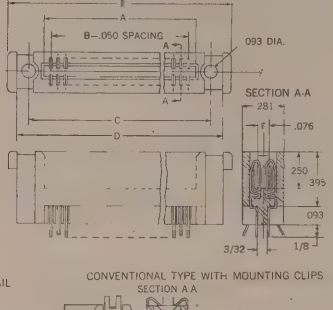
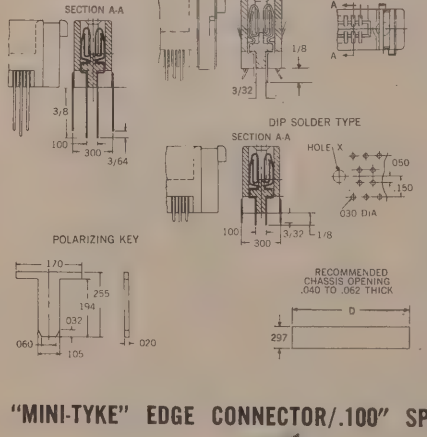
MINIATURE PC CONNECTORS

"TYKON" EDGE CONNECTORS/.050" SPACING - DOUBLE READOUT FOR 1/16" PRINTED CIRCUIT BOARDS







FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: High density (.050" centers) miniature edge connector with special ribbon-type contacts.

Potential applications include standard and thin film memory planes, diodes on insulating substrates and virtually any type of modular plug-in unit.

Available in wide range of sizes with variety of terminations and mounting styles.

SIZES: Available in 6, 10, 15, 20 and 25 contact position sizes with intermediate sizes available on special order.

TERMINATIONS: Available with conventional ribbon-type wiring tails; dip solder or wire wrap versions also available.

MOUNTING STYLES: Conventional wiring tail types available with special mounting clips for snap-in removable semi-flush panel mounting or without clips and using plain .093" dia. holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIAL & PLATING: Beryllium copper with 30 micro-inches gold finish over 50 micro-inches copper.

MOUNTING CLIP MATERIAL & PLATING: Carbon steel with cadmium plate plus yellow chromate finish.

POLARIZING KEY MATERIALS: Made of cellulose acetate and must be ordered separately.

PERFORMANCE SPECIFICATIONS: Contact factory.

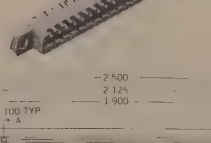
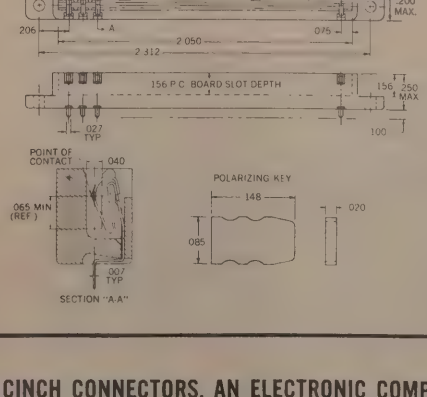
"MINI-TYKE" EDGE CONNECTOR/.100" SPACING - SINGLE READOUT FOR 1/32" PRINTED CIRCUIT BOARDS





FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Extremely low profile connector for compact packaging — overall 1/4" height of connector less than half that of standard PC connectors.

Preloaded contact construction provides uniformity of gap and assures adequate contact pressure. Ideally suited for a wide range of miniature PC board plug-in applications including airborne equipment, test equipment and digital components.

SIZE: Available in 20 contact position size only.

TERMINATION: Dip solder tails for insertion and wave soldering in PC mother board.

MOUNTING STYLE: Plain .094" Dia. holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIAL & PLATING: Beryllium copper with 50 micro-inches gold finish over 50 micro-inches copper.

POLARIZING KEY MATERIAL: Made of nylon and must be ordered separately.

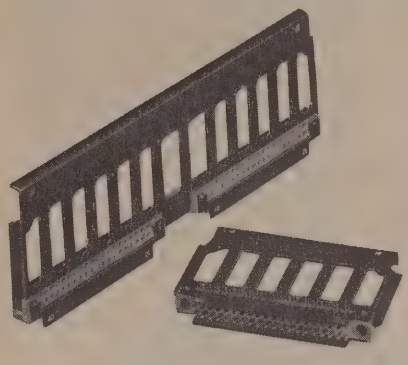
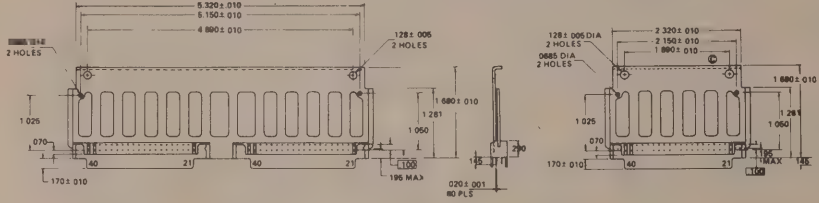
NAFI 40 & 80 CONTACT PC CONNECTOR & MODULES

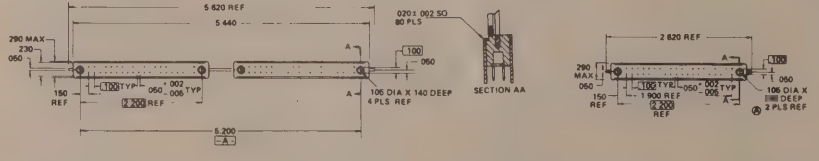


This miniature connector assembly can be quickly and easily disassembled and reassembled for wave solder installation of PC boards as well as for field servicing and retrofit.

These 40 and 80 pin connectors are designed to meet, or exceed, the requirements of MIL-STD-1389 and MIL-M-28787.

These assemblies function as headers for the support of a printed circuit board measuring approximately 2 5/16", or 5 5/16" x 1 5/32". They provide for the assembly of dual-in-line packages, the leads of which will extend through the cutouts in the metal frame portion, into the printed circuit board allowing for their interconnection by wave soldering. The metal frame acts as a heat sink to carry away the heat generated by the dual-in-line devices.





The connector contains 40 contacts, 2 rows of 20 each arranged in .100" x .100" centers, which are gold plated brass.

These assemblies may be mated to back panel assemblies with insulated or grounded mini-mod receptacles described on this page, or with any receptacle arrangement conforming to NavOrd specification WS6157.

ELECTRICAL SPECIFICATIONS

Current Rating: 3.0 amps.
Contact Resistance: 6.0 milliohms max.
Dielectric Strength: 1000V RMS, 1200V DC.
Insulation Resistance: 100,000 megohms min.

MATERIALS AND FINISHES

Contact Strip: Glass filled diallyl phthalate per MIL-M-14F, Type SDG.

Contact Pins: Brass alloy per QQ-B-613, 50 microinches gold minimum over nickel.
Frame: Black anodized aluminum per QQ-A-250.

MECHANICAL SPECIFICATIONS

Molded-in pins will withstand 20 oz. pull.
Guide ribs will withstand 10 in.-lbs. torque.
Extractor fin withstands 6 in.-lbs. torque.
Pin shield withstands 6 lbs. pull.

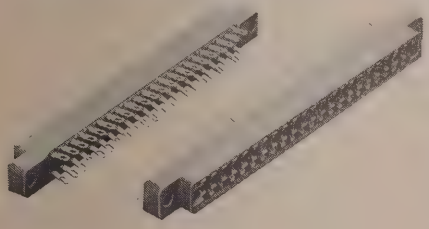
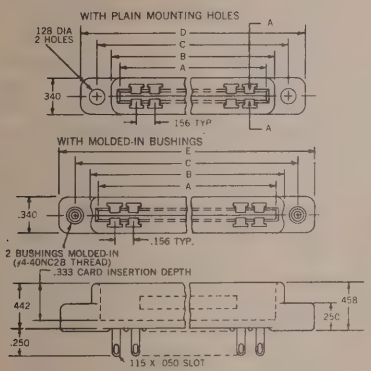
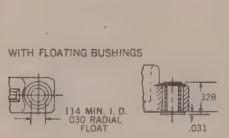
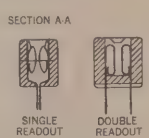
STANDARD PC CONNECTORS

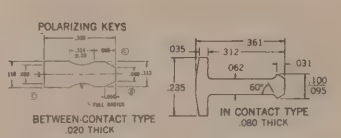
STANDARD EDGE CONNECTORS WITH SOLDER TAB CONTACTS/ .156" SPACING - SINGLE OR DOUBLE READOUT FOR 1/16" PRINTED CIRCUIT BOARDS











FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Patented bifurcated bellows contacts Pat. No. 3274532 provide added contact reliability especially in applications where vibration and board irregularities are involved.

SIZES: Both single and double readout versions are available in 6, 10, 12, 15, 18, 20, 22 and 25-contact position sizes.

TERMINATION: Bifurcated contacts with conventional .115" x .050" slot solder tabs.

MOUNTING STYLES: Available with either .128" diameter holes for standard mounting molded-in bushings or floating bushings. .142" diameter plain holes also available on special order.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Contacts are available in either phosphor bronze or beryllium copper. Standard finish is 30 micro-inches gold in the contacting area and 10 micro-inches gold on the remainder of the contact. Beryllium copper contacts can also be supplied with special finish of 50 micro-inches gold over 100 micro-inches copper to meet MIL-C-21079 C.

POLARIZING KEY MATERIALS: Two types of polarizing keys are available, and must be ordered separately as follows: Part No. 456-07-35-003 (for between-contact polarization) is made of glass epoxy; Part No. 474-11-54-200 (for in-contact polarization) is made of diallyl phthalate.

PERFORMANCE SPECIFICATIONS: Contact factory.

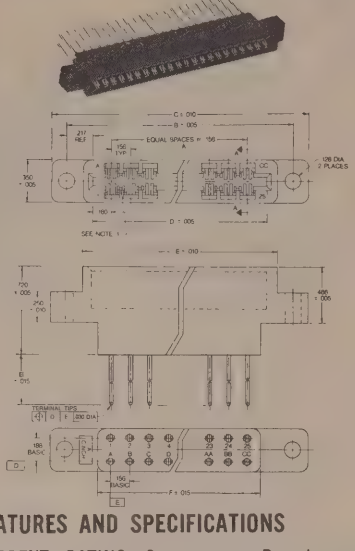
TRW CINCH CONNECTORS

PC BOARD CONNECTORS WITH TERMINALS ON .156 CENTERS

PRINTED CIRCUIT BOARD CONNECTORS/WITH WIRE WRAP .031 x .062 TERMINALS ON .156 CENTERS



CONTACT RESISTANCE (Millivolt Drop @ 3 Amp): 16 millivolt max.

TOTAL INSERTION FORCE: 20 lbs. max. Performed in accordance with Paragraph 4.6.6.2 of MIL-C-21097 using .070 inch thick blade.

INDIVIDUAL CONTACT ENGAGING AND SEPARATION FORCE: 2 - 16 oz. Performed in accordance with Paragraph 4.6.6.1.1 of MIL-C-21097B using .062 inch thick blade.

INDIVIDUAL SEPARATION FORCE: 1 oz. min. Performed in accordance with Paragraph 4.6.6.1.2 of MIL-C-21097 using .054 inch thick blade.

DURABILITY: 100 cycles with steel blade .070 inch thick. Contact resistance and individual contact separation force requirements met after test.

INSULATOR MATERIALS: General purpose impact phenolic — color black.

POLARIZING KEY: Nylon

CONTACT: Phosphor bronze

CONTACT PLATING: .00006 min. gold over copper in contacting area .0001 min. gold on remainder of contact.

GENERAL DESCRIPTION: 10 to 30 contact positions double read-out .156 center to center spacing. For 1/16 (.054-.070) thick printed circuit card. Bifurcated — cantilever type contacts. Wire wrap termination .031 x .062. Between contact polarizing.

FEATURES AND SPECIFICATIONS

CURRENT RATING: 3 amperes. Based upon all contacts carrying specified current and a temperature rise of 30°C above ambient.

RATED VOLTAGE (Sea Level): 900 V AC RMS 1200 V DC. (Based on 1/3 voltage breakdown)

TEST VOLTAGE (Sea Level): 2000 V AC RMS 2700 V DC. (Based on 75% voltage breakdown)

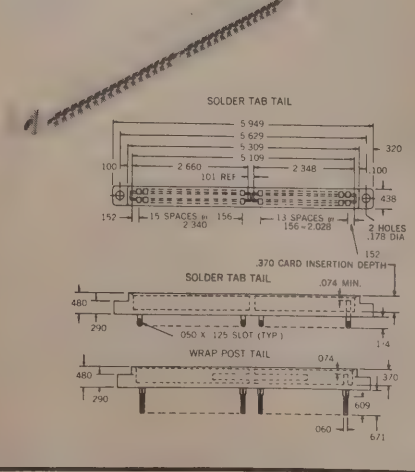
SPECIAL DESIGN PC CONNECTORS .156 CENTER SPACING

SPECIAL EDGE CONNECTORS WITH CENTER BRIDGE DESIGN/ .156" SPACING - DOUBLE READOUT FOR 1/16" PRINTED CIRCUIT BOARDS



FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Center bridge construction utilized in insulator to minimize warpage. Available with both solder tab and wrap post termination.

SIZE: Available in 30-position size only.

TERMINATIONS: Available with conventional solder tab tails or .060" x .030" wrap post contacts.

MOUNTING STYLE: Plain .178" diameter holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Contacts are available in either phosphor bronze or beryllium copper with 30 micro-inches gold on the contacting area and 10 micro-inches gold on the remainder of contact.

POLARIZING KEY MATERIALS: Available with "in-contact" polarization only; polarizing key is made of diallyl phthalate and must be ordered separately. (Part No. 474-11-54-200).

PERFORMANCE SPECIFICATIONS: Contact factory.

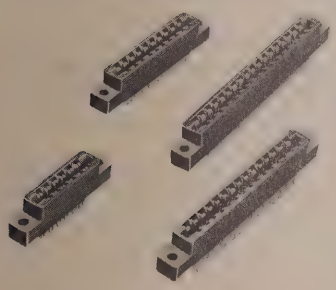
SERIES 90 ECONO-LINE LOW-COST P.C. EDGE CONNECTORS
ON .156" CENTERS FOR 1/16" BOARDS — .333 DEEP CARD SLOT



Most of the performance features of TRW/Cinch Connectors standard printed circuit edge connectors are found in this low-cost version for commercial applications. Except for the reduced amount of gold-plating, the Series 90 Econo-Line connectors meet all the latest requirements of MIL-C-21097, Std. 202.

The Series 90 incorporates a newly developed high tensile brass, Alcoloy* 688, in its bifurcated bellow contacts. The contact area is selectively plated with 20 microinches of gold over 30 microinches of nickel that provides a non-migrating base. A green, glass-filled thermoplastic polyester replaces the more expensive diallyl phthalate used in the standard connector insulator.

Econo-Line connectors are supplied in 6, 10, 12, 15, 18, 22 and 25 positions, with either single or double readout in either conventional solder eyelet or dip solder tails.

*T.M. Olin Corporation.

PERFORMANCE DATA

TRW CINCH CONNECTORS

CINCH D-SUBMINIATURE CONNECTORS†

All Cinch D-Subminiature Connectors undergo final assembly and inspection in the ultra-modern, temperature controlled Cinch "clean room." In this room, contacts, insulators and shells are stored and assembled under tight quality control inspection. Ultrasonic cleaning capabilities are also available on request.

GENERAL DESCRIPTION

The Cinch D-Subminiature Connectors described in this catalog are designed for applications where space and weight are prime considerations. These high contact density connectors are especially well-suited for aircraft, missile and ground support installations. Although designed essentially for rack-and-panel installations, D series connectors may be adapted for cable attachment by means of accessory junction shells with integral clamps.

In addition to the original D series with solder pot contacts in a two piece insulator, Cinch now offers Golden D, Mark I Connectors with solder pot contacts in a monobloc insulator for improved moisture resistance; Royal D, Mark III connectors with crimp snap-in contacts in the Little Caesar assembly for high performance, high reliability applications, and the Burgun-D with insertable and removable stamped or machine contacts for commercial applications.

All D-Subminiature Connectors will inter-mate if insert arrangements correspond. Mark I and Mark III connectors are designed to meet or exceed the requirements of MIL-C-24308 Rev. A.

A wide range of insert arrangements is offered accommodating up to 50 contacts accepting standard AWG wire as indicated in the individual specifications. Combination layouts are available, with provisions for coaxial and/or high voltage contacts. Printed circuit and wire wrap terminations are also available. The versatility of the D series is further enhanced by the variety of insulating materials and finishes, as well as a complete line of accessories.

The D-Subminiature series is handled by leading electronic distributors throughout the country. Questions regarding modifications of these designs or any connector requirement should be addressed to your local Cinch representative and will receive his immediate attention.

CONNECTORS INDIVIDUALLY PACKED IN HEAT-SEALED CONTAINERS TO ASSURE EXTENDED SHELF-LIFE

To protect D-Subminiature Connectors from contamination and other corrosive elements in the air, Cinch individually packs each connector in heat-sealed polyvinyl-chloride containers (as shown). This assures every customer of an extended shelf life. A separate compartment is also provided in each container for the loose crimp-type contacts supplied with the Royal D Mark III Connectors. Connectors can also be packed in individual polyethylene bags if desired.

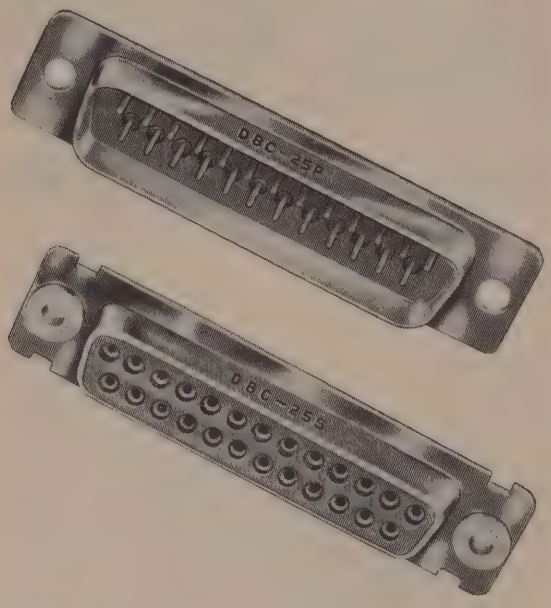
TRW CINCH CONNECTORS

BURGUN-D MARK IV CONNECTORS



The TRW/Cinch Burgun-D subminiature connector is designed for commercial applications where space, weight, and economy are important considerations.

It is especially suited to plug-in module, cable to panel and cable to cable installations, in computers and peripherals, test equipment, communications equipment and a wide range of other applications.

The Burgun-D (Mark IV) Series utilizes rear-release crimp snap-in contacts, that are readily inserted and removed by means of a simple, expendable insertion/extraction tool.

It offers these important features:

- Mates with existing original D and Mark I, Mark II and Mark III connectors.
- Operates at temperatures to 250°F (120°C).
- Size 20 contacts accommodate wire size #18 through #30 AWG stranded wire. (Screw machine only.)
- Closed-entry sockets automatically corrects misaligned pins.
- Rated at 5 amperes for #20 wire.
- Available in 9, 15, 25, 37, and 50 contact arrangements.
- Variety of contacts for hand and machine assembly and PC board insertion.

A COMPLETE LINE OF HARDWARE and accessories including junction shells, hoods, dust caps and lock assemblies is available and listed in TRW/Cinch Catalogs CD-12, and C-46.

FOR IMMEDIATE DELIVERY from stock, contact your TRW/Cinch D-subminiature industrial distributor.

Insulator: Glass-filled burgundy nylon (per Fed. Spec. L-P-395B).

Contacts:

Machined — Copper alloy.

Stamped — Cadmium copper.

Contact Plating:

Selective Stamped — 30 microinches of gold (min.) over 50 microinches of nickel (min.) at contacting area, with gold flash overall.

Overall Stamped — 20 microinches of gold (min.) over 60 microinches of nickel (min.).

Machined — 20 microinches of gold over 60 microinches nickel (min.).

Rivets and Washers: Stainless steel (float mounting).

MECHANICAL FEATURES

Coupling: Friction and lock accessories.

Polarization: Keystone-shaped shells.

Contact Type: Crimp snap-in.

ELECTRICAL DATA

Contact Termination: Crimp.

Wire Size:

Size 20 Contacts — #20, #22, and #24 AWG stranded wire.

Size 20-18 Contacts — One #18 or two #22 AWG stranded wires.

Current Rating: Size 20 Contacts — 5 amps.

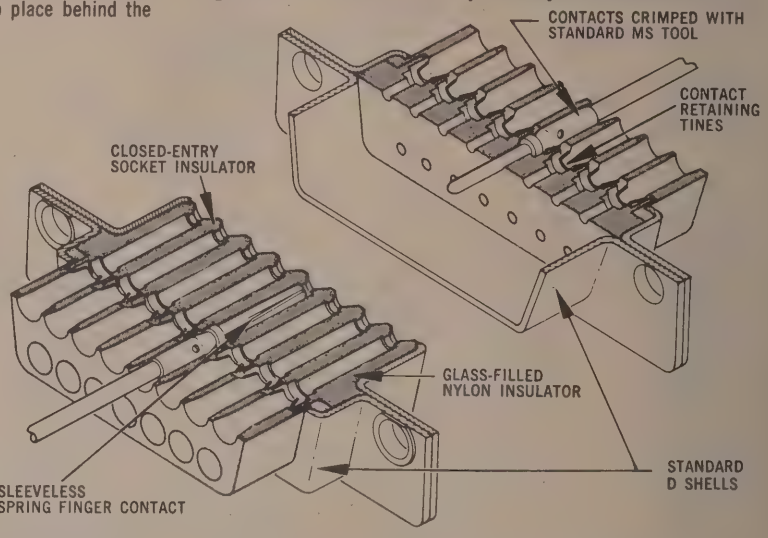
REAR RELEASE CONTACT RETENTION SYSTEM

The BURGUN-D connector features a rear insulator with integral, molded contact retaining tines. These plastic tines permit the insertion and extraction of contacts from the rear of the connector with a simple, expendable plastic insertion/extraction tool. During contact insertion, the retaining tines expand as the contact passes thru. These rugged tines snap into place behind the contact shoulder when the contact is fully inserted. The tool is inserted to expand the tines, allowing easy extraction of the wired contact.

The retention system and the integral contact retaining tines guarantee functional reliability in many environments.

- Mates with existing D types.
- Operates in temperatures to +250°F.
- Crimp snap-in contacts.
- Highly reliable socket contacts.
- Insertion/extraction with expendable tool.
- Corrects misaligned contacts.



MACHINED CONTACTS

Machined contacts are supplied loose for use with hand crimp tools or in vibration hopper feeder crimp machines. A vibrator-feed, semi-automatic tool, 599-11-11-225 is available. These contacts are supplied in three wire cup sizes.

STAMPED CONTACTS

Stamped contacts are supplied loose for use with hand crimp tools, or on reels for use with the semiautomatic machines, selectively gold plated or with gold plate overall. These contacts will accommodate wire sizes #20 through #28 AWG by adjusting or changing the crimp die set. (For other wire sizes consult factory.)

HOW TO ORDER — TYPES D*MA, D*M & D CONNECTORS

D | B | MA | M | R | 15 | P | A | * | FO

- **D** — Series Prefix
- **B** — Shell Sizes A, B, C, D, E
- **MA** — No designator — 2 pc. nylon insulator — solder type contacts — original "D" series
  - M: Monobloc insert — solder type contacts Mark I series
  - MA: Monobloc insert — crimp type contacts Mark III series
- **M** — M: For connectors having .00005 gold plate over .0001 min. copper plate on contacts — omit for standard Mark I and Mark III only.
- **R** — No designator — standard .120 diameter hole
  - E — 4-40 clinch nut for rear panel mounting
  - F — float mounts for rear panel mounting
  - R — reverse float mount for front panel mounting
- **15** — Contact Arrangement, See page 12
- **P** — P — Pin; S — Socket
- **A** — Printed circuit terminal modifier — applicable to the Mark I Series (monobloc, solder type).
  - A — Right-angle printed circuit connector with .040 diameter terminals; with bracket assembly and accommodates printed circuit boards up to 1/16 maximum thickness. (Plug only.)
  - B — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 3/32 maximum thickness.
  - H — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 1/8 maximum thickness.
  - L — Right-angle printed circuit connector with .030 diameter terminals with bracket assembly and accommodates printed circuit boards up to 3/32 maximum thickness. (Plug only.)

  Printed Circuit Terminal Modifier — Applicable to the original "D" series.
  - V — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 1/16 maximum thickness.
- ***** — Modification — consult factory
- **FO** — Connector less contacts (FO not stamped on connector)

CURRENT RATINGS

Cinch vs. Military.

The Cinch rating for #20 contacts is 5 amps, which means 5 amps for all contacts simultaneously. MIL-W-5088 rates #20 contacts at 7.5 amps maximum. The explanation is as follows:

MIL-W-5088B, Paragraph 3-9-2-1-2 specifies:

"Table I current ratings for cables in bundles are based upon 15 or more cables carrying no more than 20% of the total carrying capacity of the bundle."

Table I specifies a current rating of 7.5 amps maximum for single wires in bundles of 15 or more wires. NOTE: Wires and contacts are both considered to be in the category of conductors.

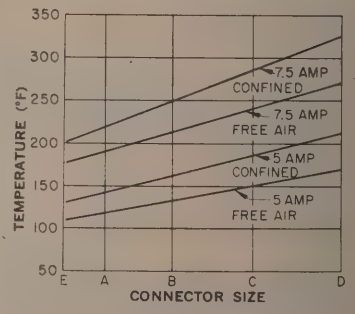
Explanation

If 15 wires (normally rated at 7.5 amps per wire maximum, or at a total bundle current of 112.5 amps) are not to carry more than 20% of the total 112.5 amps, the **average** current rating per wire is 20% of 112.5 amps (total bundle capacity) divided by 15 (number of wires).

Conclusion

The Military rating of #20 contacts or wires is 1.5 amps average (based on 15 wires per bundle or 15 contacts per connector) vs. a Cinch rating of 5 amps.

Average Maximum Temperature vs. Connector Size for various current ratings of mated pairs of D Subminiature Connectors.



Notes:
1. Free air condition. Connectors not shielded from ambient condition in any manner.
2. Confined condition. Connectors placed in insulated box (1 x 2 x 3.5) during test, with no moving air.
3. Average maximum temperature stabilization: 1 hour or less in all cases.
4. All contacts in each mated pair tested were wired in series with specified current flowing.
5. Ambient conditions 77°F. 50% rh.

TRW CINCH CONNECTORS

ORIGINAL D CONNECTORS

GENERAL INFORMATION

The Cinch Original D Plug utilizes a two-piece nylon insulator housed in a variety of five basic shell sizes: E, A, B, C, and D. These shell sizes contain 9, 15, 25, 37, and 50 #20 solder pot contacts respectively. Standard contact terminations accommodate up to #20 AWG stranded wire. Current rating is 5 amperes.*

The keystone shape of the shell assures proper polarization. Coupling is by means of friction; locking accessories are available. Also available are shells with float mounts. Connectors with #4-40 or #2-56 clinch nut mounts may be provided.

With standard nylon insulators, operating temperatures range from −65°F to +250°F (the limiting factor being the insulator material). When diallyl phthalate insulator is substituted, the operating temperature range is from −65°F to +275°F.

*Military rating of #20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 12.

MATERIALS AND FINISHES

Shells: Steel, cadmium plated with yellow chromate supplementary coating.
Pin Contacts: Brass, gold plated (.00002 min.) over nickel plate (.000060 min.).
Socket Contacts: Phosphor bronze, gold plated (.00002 min.) over nickel plate (.000060 min.).
Insulators: Nylon, two-piece.
Float Mounting Rivets and Washers: Stainless steel.

For listing of applicable specifications see page 12.

PERFORMANCE DATA

Voltage Rating: See tabulation on page 12.
Insulation Resistance: Greater than 5,000 megohms, determined in accordance with MIL-STD-202D, Method 302, Condition B.
Contact Resistance: 2.7 milliohms maximum @ 7.5 amps.
Individual Contact Separation Force: 1 to 8 ounces.
Moisture Resistance: Exceeds test requirements of MIL-STD-202D, Method 106.†
Vibration: Exceeds test requirements of MIL-STD-202D, Method 204, Condition B.†
Shock: Exceeds test requirements of MIL-STD-202D, Method 213, Condition G.†
Corrosion Resistance: Exceeds requirements of 48 hr. exposure to salt spray in accordance with MIL-STD-202D, Method 101C, Condition B.†

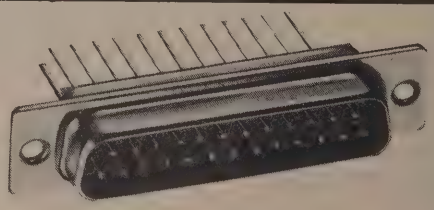
WIRE WRAP TERMINALS

RACK AND PANEL CONNECTORS WITH 0.025" SQUARE WIRE WRAP* TAILS

Cinch D-Subminiature Connectors are designed for applications where space and weight considerations are prime considerations. These high contact density connectors are especially well-suited for aircraft, missile and ground support installations. They are designed to meet or exceed most of the requirements of MIL-C-24308.

These wire-wrap versions are available in 9, 15, 25, 37 and 50 contact sizes in both plug and socket types. Two tail lengths are available: 3/8" long to accommodate two wires, and 37/64" long to accommodate three wires. Socket contacts and plug pins are copper alloy gold plated over silver. Insulators are two-piece nylon, and the outer shells are yellow chromate finished, cadmium-plated steel.



These D-Subminiature Connectors will intermate with any other D-Subminiature Connector of the same insert configuration. Mating connectors with standard termination may be adapted for cable attachment by means of accessory junction shells with integral clamps.

IMMEDIATE DELIVERY FROM CINCH DISTRIBUTORS can be provided on the 3/8" long termination types.

TRW CINCH CONNECTORS

GOLDEN D MARK I CONNECTORS

GENERAL INFORMATION

Cinch D*M Connectors feature solder pot contacts in a monobloc insulator for improved temperature characteristics and increased moisture resistance. Two insulator types are available: (a) combination layouts with coaxial and/or high voltage contacts plus standard AWG wire contacts, and (b) layouts with standard AWG wire contacts only. The five amp* solder pot contacts accommodate wire sizes up to #20 AWG stranded wire. Socket contacts are of the closed entry type. Operating temperatures range from −65°F to +300°F.

Combination layouts are supplied with unfilled coaxial and/or HV contact cavities. Coaxial and HV contacts must be ordered separately, and may be used interchangeably in any of the layouts listed. HV contacts accommodate wire sizes up to #20. In both, coaxial and HV contacts, the center contacts have solder type termination. Braid, on coaxial contacts, may be soldered or crimped to the outer conductor. Both of the above contacts are snap-in, removable type.

Standard coaxial and HV plugs contain female center contacts; receptacles contain male center contacts. Special reversed versions are available. Pin connector assemblies accommodate coaxial and HV plugs only; socket assemblies accommodate receptacles. Connector assemblies and contact inserts are matched and color coded to ease assembly. Pins and plugs are coded red, sockets and receptacles are coded blue. No insertion tool is required. Coaxial and HV inserts may be removed with Cinch Tool CET-C6B.

Five basic shell sizes are available. Polarization is by means of the keystone cornered shell. Coupling is by friction; locking accessories are available. Shells with float mounts are also available.

Printed circuit plugs are listed on page 9 with other popular modifications. For additional modifications and special plugs, consult factory. Accessories such as junction shells are shown on pages 24 and 25.

*Military rating of #20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 12.

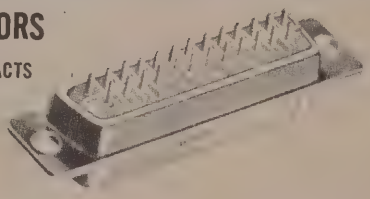
PC CONNECTORS

STRAIGHT PC CONTACTS



These compact, high contact density connectors are designed for direct, above board mounting to printed circuit boards up to ⅛" thick. They provide a highly reliable means for direct inline interconnection of printed circuitry with mother-board mounted sockets.

These right-angle plugs are available in 9, 15, 25, and 37 contact configurations. The standard units listed herein are supplied with 0.040" or 0.030" nominal diameter pins that extend 0.093" below the 90° bracket for 1/16" boards and .135 for 3/32" boards, other pin diameters and lengths may be obtained on special order.

Design and construction of these connectors meets or exceeds many of the requirements of MIL-C-24308.

These right-angle D-Subminiature connectors will mate with any other D-Subminiature connector of the same insert configuration. Mating connectors may be adapted for cable attachment by means of accessory junction shells.

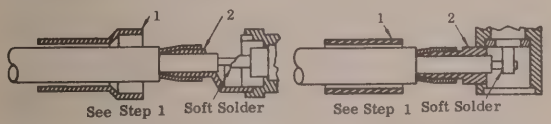
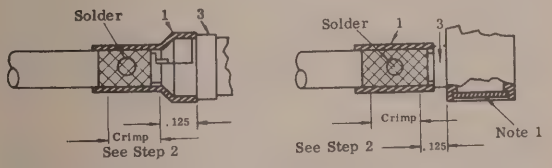
COAXIAL CABLE INSTALLATION INSTRUCTIONS

STRAIGHT COAXIAL **90° COAXIAL**



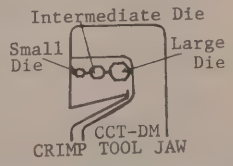
STEP 1. Slide outer ring (1) over cable jacket. Trim cable. Insert cable dielectric and center conductor into inside diameter of inner sleeve (2) solder center conductor to coaxial center contact.



STEP 2. Slide outer ring (1) forward until flush with coaxial shell, (3) confining braid between outer ring and inner sleeve. For solder type coaxials, soft solder outer ring to assembly through cross-drilled solder hole. For crimp type coaxials, crimp with tool indicated being sure to crimp in area defined.

NOTES

1. Soft solder or stake access cap into shell after cable assembly on 90° type coaxials.
2. Crimp tool description — Cannon CCT-DM (to crimp outer sleeve only).
   - A. Use small die.
   - B. Use intermediate die.
   - C. Use large die.



3. Pin assemblies will accommodate high voltage and coaxial plugs only. Socket assemblies will accommodate high voltage and coaxial receptacles only.

TRW CINCH CONNECTORS

ROYAL D MARK III CONNECTORS

GENERAL INFORMATION

The D*MA connector is a D-Subminiature Connector that utilizes the "Little Caesar" rear release contact assembly. This contact assembly allows rear insertion, release and extraction of crimp snap-in contacts. The simplified contact design with no undercuts offers greater bend resistance and a hard, closed entry socket insulator insures positive contact alignment. Crimp terminations accommodate #20, #22 and #24 AWG stranded wire and are rated for 5 amps.* ROYAL D-connectors are intermateable and interchangeable with all other D-Subminiature Connectors having compatible contact arrangement.

Polarization is by keystone shape of shell; coupling is by friction. Accessories are shown on pages 24 and 25. An extraction tool is supplied with ROYAL D-connectors. Extra contacts may be ordered for replacement purposes. See page 21 for ordering information.

MATERIALS, FINISHES AND TYPES

Shell: Steel, cadmium plated with yellow chromate supplementary coating.

Insulator: Diallyl phthalate, glass fibre filled, per MIL-P-19833, Type GDI-30F, royal purple color, monobloc construction.

Contacts: Pin—leaded copper, gold plate over nickel plate. Socket—copper alloy, gold plate over nickel plate with stainless steel sleeves.

Current Rating: (#20 Contacts) 5 amps.*

Contact Termination: Crimp, accommodating #20, #22 or #24 AWG stranded wire. The 20-18 contacts accommodate one #18 or two #22 AWG stranded wires.

Contact Type: Snap-in, removable, crimp, with rear release assembly. Contacts not interchangeable with other D Series.

Socket Type: Closed entry.

Float Mounting

Rivets & Washers: Stainless steel.

For listing of applicable specifications, see page 12.

*Military rating of #20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 12.

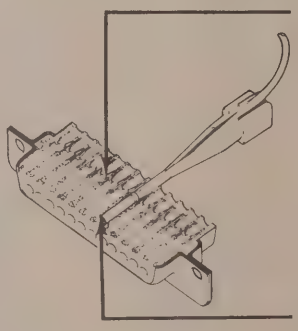
"LITTLE CAESAR" REAR RELEASE CONTACT ASSEMBLY

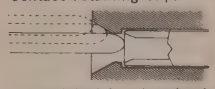
The "Little Caesar" rear release contact assembly permits contacts to be inserted by hand and to be released and extracted from the rear of the connector with a simple, expendable plastic tool.

The contact is inserted from the rear of the connector thru a cylindrical clip in the insulator until the indented tines of the clip snap securely behind the contact shoulder. The contact is released as the plastic tool is inserted into the rear of the connector, expanding the tines beyond the contact shoulder and permitting contact extraction. The simplified contact design improves bend resistance through a single holding shoulder with no undercuts.

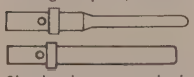
The "Little Caesar" contact assembly was selected by the National Aerospace Standards Committee for use in a major industry connector specification for vital programs demanding great operational reliability.



Contact retaining clip.

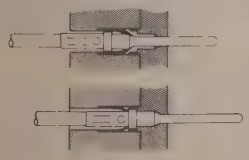


Hard dielectric, closed-entry socket inserts realigns bent or misaligned pin contacts.



Simple stronger contact without undercuts for greater bend resistance.

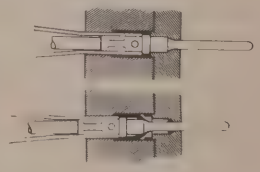
CONTACT INSERTION



Contact partially inserted.

Tines snap behind contact shoulder when contact is fully inserted.

CONTACT EXTRACTION



Insert extraction tool to fully bottomed condition.

Tines expanded beyond contact shoulder.

Remove contact by pulling on wire.

Contact partially removed.

ORDERING INFORMATION FOR ADDITIONAL CONTACTS

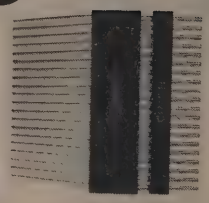
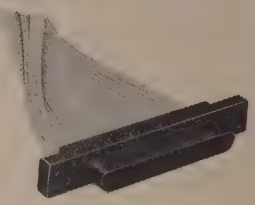
MICROMINIATURE CONNECTORS



DURA-CON*SERIES CONNECTORS ON .050" CENTERS

- High contact density with up to 266 contacts per square inch
- Lightweight
- Rugged, reliable contacts
- Shock and vibration resistant



The Cinch Dura-Con Series of Microminiature Strip and Rectangular connectors are ideally suited for space and weight reduction in miniaturized airborne electronics and for shorter signal paths in electronic data processing equipment. Both Cinch Dura-Con Series have rugged, high-performance contacts capable of providing shock and vibration proof continuity from dry circuit to three amperes current.

This is accomplished by making the pin the spring member. The Cinch Dura-Con is made from a precision miniature spring cable with a welded tip. The expanded cable provides seven spring members peripherally around the pin so that no matter what radial forces are applied, contact is maintained with the mating socket wall. Furthermore, this flexible spring pin can be bent many times without evidencing any metal fatigue. By protecting this pin in a recessed tolerance cavity, reliable mating is assured. Hence, despite its small size, the Cinch Dura-Con provides superior performance.

DURA-CON D RECTANGULAR MICROMINIATURE CONNECTORS

This series of microminiature rectangular connectors is available in contact layouts with 9, 15, 21, 25, 37, and 51 positions. In addition to the ½" long #24 AWG solid copper leads and 18" long #26 AWG stranded Type E insulated wire terminations, this connector series can be supplied with custom terminations.

Contacts: 24 size; copper alloy, gold plated.
Insulator: Glass-filled polyester 94V-0.

PERFORMANCE DATA

ELECTRICAL

Current Rating: 3 amperes.
Contact Resistance: Nominal 4 milliohms, maximum 8 milliohms.
Dielectric Withstanding Voltage:
Sea Level: 900V RMS 60 Hz. **70,000 Ft.:** 300V RMS 60 Hz.
Insulation Resistance: 5,000 megohms minimum.

MECHANICAL

Contact Engaging Force: 6 oz. per contact maximum.
Contact Separation Force: ½ oz. per contact minimum.

ENVIRONMENTAL

Temperature: −65°F to 300°F.
Vibration and Shock: No discontinuity detected (equipment sensitivity 6 nanoseconds) during 10 to 2,000 cps at .06" double amplitude or 50 g. 20 shocks 500 g.
Durability: Contact resistance still within specification after 500 cycles mating and unmating.
Salt Spray: No damage — Contact resistance still within specification after mated sample exposed 48 hours per MIL-STD-202B, Method 101A, Condition B.

DURA-CON STRIP CONNECTORS

For maximum flexibility of application, Cinch Dura-Con contacts are available in strips on .050" centers. By cutting, adding, or stacking, a variety of contact arrangements can be achieved. These versatile connector strips are available with up to 120 contact positions on special order. Moreover, guide pins that engage prior to the contact in the mating cycle, can be provided to assist in mating and polarization.

Contacts: 24 gage copper alloy, gold plated.

Insulator: Glass-filled polyester 94V-0.
